IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 10 and 16 March 2024, IOM Yemen DTM tracked 32 households (HHs) (192 individuals)² who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 78 per cent (25 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 22 per cent (7 HHs).

From 1 January to 16 March 2024, IOM Yemen DTM tracked 830 households³ (4,980 Individuals) who experienced displacement at least once.

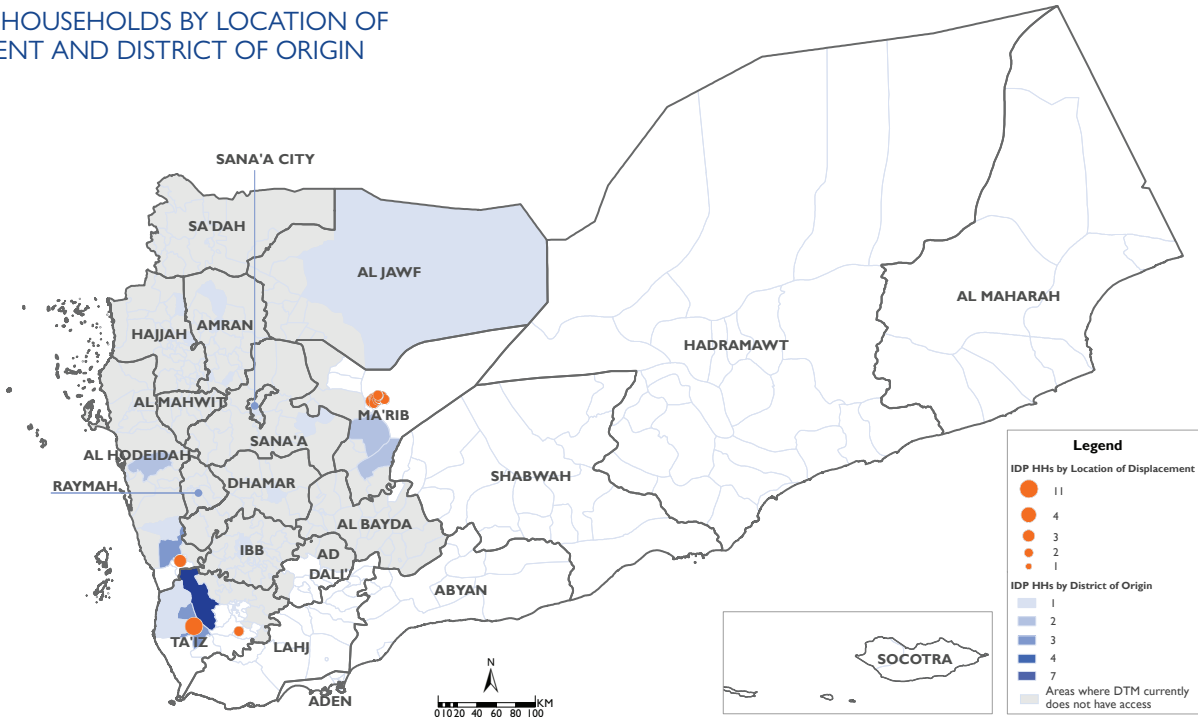

IOM DTM also recorded three returnee households in the governorates of Ma'rib (2 HHs) and Ta'iz (1 HH) returning to their locations of origin during the reporting period.
