

Lao People's Democratic Republic

Flooding in Sanamxai District

Temporary Shelter Report #2 (14 August 2018)

International Organization for Migration (IOM)
The UN Migration Agency

Overview of the Report

The International Organization for Migration (IOM) deployed staff to support the Joint Rapid Assessment led by the Ministry of Health, focusing specifically on information regarding the camps / temporary shelters for those displaced by the flooding in Attapeu, Sanamxai District right after the flooding. Since then, IOM continued working together with the Ministry of Labour and Social Welfare on data collection and information management on the displaced population.

The figures in this report does not represent the total number of displaced population nor the total needs, but an overview of findings based on initial observations, interviews with local leadership, affected persons, and the Government. This report contains analysis from a second round of raw data collected from the field, together with the Ministry of Labour and Social Welfare and other partners. The purpose of the analysis is for assisting the planning interventions in Attapeu Province. IOM will continue supporting the Ministry of Social Welfare on additional data gathering.

Demographics of Displaced Population By Site (08/08/2018)

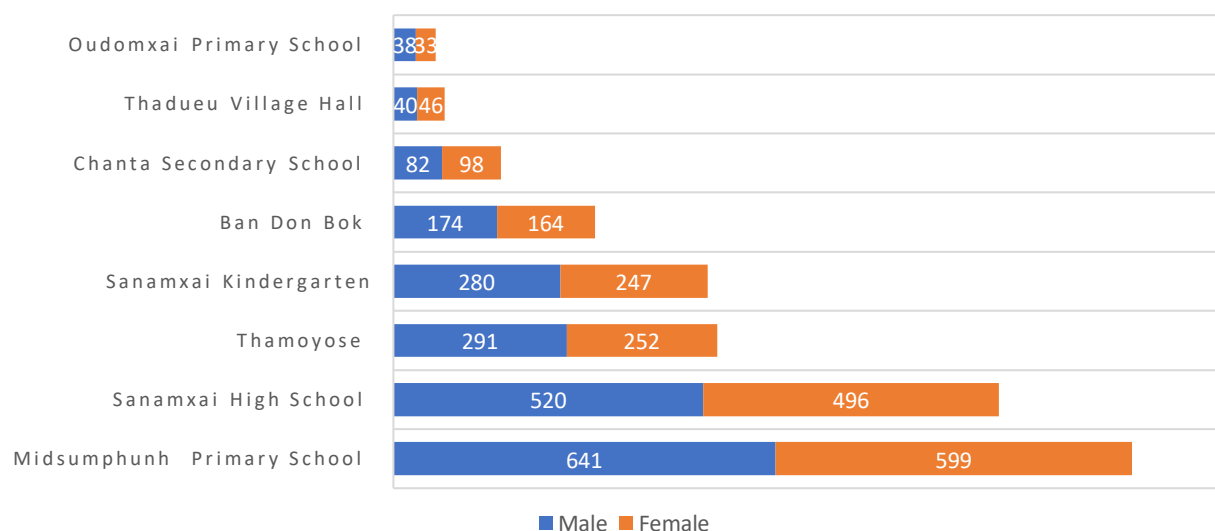

Figure 1: Number of internally displaced people in the Sanamxai District by site

955 IDP Families

4,270 IDP Individuals

10 sites
Used as temporary shelters

TOTAL						955	4,270
* During the assessment, Site #9 Donekhong was not accessible and therefore excluded from the table.							
** data collected around 8 th of August 2018							

Site # 1: Mitsampan Kindergarten

122 IDP Families (527 individuals)

280

247

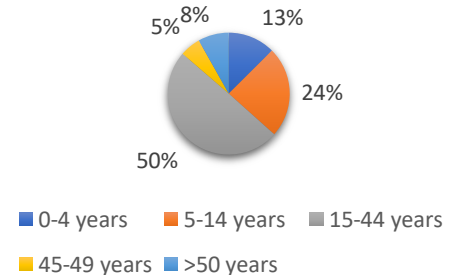

193 (up to 14 years)

Primary (reported) needs:

- **Toilets**
- **Drinking water** (other than bottled water)
- Additional **shelter space** (due to overcrowding)

Site #1: Age Breakdown

- Type of site: school
- < 50% living in tents
- < 25% self made shelter
- <75% living indoors

Major health issues reported:

- **Diarrhea**
- **Flu**

- Number of functioning toilets on site: 5 – **recommend an additional 21 toilets**
- **No separation** of bathing facilities for women and men

Vulnerable groups:

- Pregnant women: 4
- Persons with physical disabilities: 5
- Person with chronic disease: 2

Site # 2: Mitsampan Primary School

275 IDP Families (1,240 individuals)

641

599

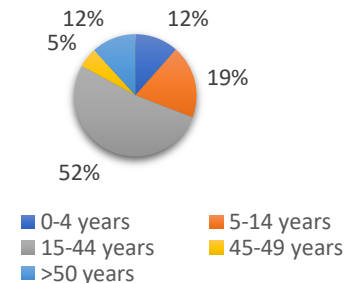

383 (up to 14 years)

Primary (reported) needs:

- Additional **shelter space** (due to overcrowding)
- Cooking utensils

Site #2: Age Breakdown

- Type of site: school
- < 25% living in tents
- >75% living indoors

Major health issues reported:

- **Diarrhea**
- **Cold**

- Number of functioning toilets on site: 22 – **recommend an additional 40 toilets**
- **No separation** of toilets bathing facilities for women and men

Vulnerable groups:

- Persons with physical disabilities: 3
- Persons with mental disabilities: 7
- Person with chronic disease: 6

Site # 3: Sanamxai High School

 **251 IDP Families (1,017 individuals)**

 **520**  **496**  **359 (up to 14 years)**

Primary (reported) needs:

- Additional **shelter space** (due to overcrowding)
- Toilets
- Cooking utensils

Site # 3: Age Breakdown

■ 0-4 years ■ 5-14 years ■ 15-44 years
■ 45-49 years ■ >50 years

- Type of site: school
- < 50% living in tents
- <75% living indoors

Major health issues reported:

- **Diarrhea**
- **Cold**

- Number of functioning toilets on site: 25 – **recommend an additional 25 toilets**
- **No separation** of toilets bathing facilities for women and men

Vulnerable groups:

- Persons with physical disabilities: 2
- Persons with mental disabilities: 3

Site # 4: Oudomxai Primary School

 **16 IDP Families (71 individuals)**

 **38**  **33**  **28 (up to 14 years)**

Primary (reported) needs:

- Additional **shelter space**
- Toilets
- Cooking utensils

Site #4: Age Breakdown

■ 0-4 years ■ 5-14 years ■ 15-44 years
■ 45-49 years ■ >50 years

- Type of site: school
- >75% living indoors

Major health issues reported:

- **Diarrhea**
- **Cold**

- Number of functioning toilets on site: 1 – **recommend an additional 3 toilets**
- **No separation** of toilets bathing facilities for women and men

Vulnerable groups:

- Pregnant women: 1
- Persons with mental disabilities: 1

Site # 5: Thadueu Village Hall

18 IDP Families (86 individuals)

40

46

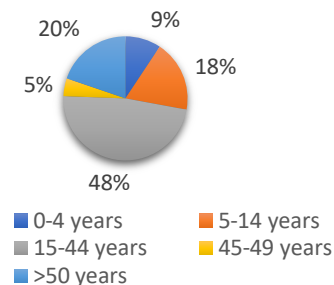

24 (up to 14 years)

Primary (reported) needs:

- Toilets
- Additional **shelter space** (due to overcrowding)
- Medicines for general treatment
- Cooking utensils

Site # 5: Age Breakdown

- Type of site: Community building
- >75% living indoors

Major health issues reported:

- **Diarrhea**

- Number of functioning toilets on site: 1 – **recommend an additional 3 toilets**
- **No separation** of toilets bathing facilities for women and men

Vulnerable groups:

- Pregnant women: 1
- Person with chronic disease: 1

Site # 6: Ban Don Bok

86 IDP Families (338 individuals)

174

164

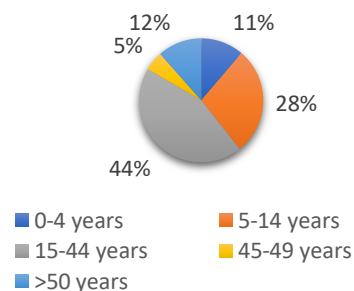

133 (up to 14 years)

Primary (reported) needs:

- Additional **shelter space**
- Toilets
- Rice
- Cooking utensils and mats/blankets

Site #6: Age Breakdown

- Type of site: empty building
- < 25% self made shelter
- >75% living indoors

Major health issues reported:

- **Diarrhea**
- **Cold**
- **Skin rashes**

- Number of functioning toilets on site: 1 – **recommend an additional 16 toilets**
- **No separation** of toilets bathing facilities for women and men

Vulnerable groups:

- Pregnant women: 2
- Persons with physical disabilities: 1
- Persons with mental disabilities: 1
- Person with chronic disease: 2

Site # 7: Thamoryose

60 IDP Families (543 individuals)

291

245

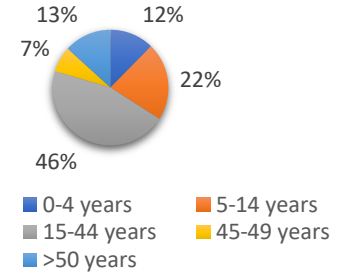

185 (up to 14 years)

Primary (reported) needs:

- Drinking water and water for bathing and cooking
- Toilets
- Rice
- Mats/blankets

Site #7: Age Breakdown

- Type of site: community building
- < 25% in tents
- >75% living indoors

Major health issues reported:

- **Diarrhea**
- **Muscle ache**

- Number of functioning toilets on site: 2 – **recommend an additional 25 toilets**
- **No separation** of toilets bathing facilities for women and men
- **No safe water for bathing and cooking**

Vulnerable groups:

- Pregnant women: 1
- Persons with physical disabilities: 1

Site # 8: Phindong

69 IDP Families (268 individuals)

137

131

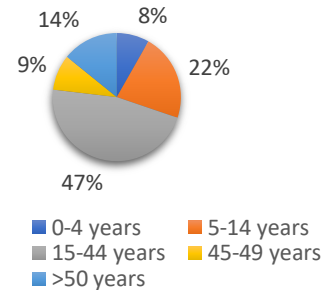

81 (up to 14 years)

Primary (reported) needs:

- Drinking water + water for bathing and cooking
- Toilets
- Rice
- Clothing

Site #8: Age Breakdown

- Type of site: school/host community
- < 25% self made shelter
- >75% living indoors

Major health issues reported:

- **Diarrhea**
- **Flu**

- Number of functioning toilets on site: 1 – **recommend an additional 12 toilets**
- **No separation** of toilets bathing facilities for women and men
- **No safe water for bathing and cooking**

Vulnerable groups:

- Pregnant women: 5
- Persons with physical disabilities: 1
- Persons with mental disabilities: 3
- Person with chronic disease: 5

Site # 10: Chanta Secondary School

58 IDP Families (180 individuals)

82

98

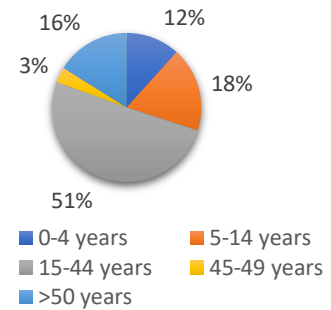

54 (up to 14 years)

Primary (reported) needs:

- Toilets
- Additional water for bathing and cooking
- Medical services during night
- Shelter
- Blankets/mats/pillows

Site #10: Age Breakdown

- Type of site: school
- < 25% in tents
- >75% living indoors

Major health issues reported:

- Diarrhea
- Cold
- Skin rashes

- Number of functioning toilets on site: 3* – **recommend an additional 6 toilets**
- **No separation** of toilets bathing facilities for women and men
- **Water provided through a pipe-line is not sufficient to meet community needs**

Vulnerable groups:

- Pregnant women: 6
- Persons with physical disabilities: 1
- Person with chronic disease: 1

Immediate Recommendations and Guidance Support

- Address vulnerabilities tracked including unaccompanied children, orphans, pregnant women etc.
- Urgent assessment needed for site #9 Donekhong to determine IDP population and priority needs

- Make a map of the site
- Begin decongestion and ensure that all families sleeping in the site are from the affected areas
- Provide tents or tarpaulins and support additional expansion areas to decongest as much as possible
- Ensure that the most vulnerable remain indoors
- Develop contact lists of service providers

- Work with Shelter partner to provide recovery kits to allow people to return

- Provide minimum 1 latrine/toilet per 50 people, but 1 latrine/toilet per 20 people in the ideal scenario
- Separate women's and men's bathing and toilet facilities
- Provide a space for cooking
- Dig drainage to lower risks of dampness and disease

- Health and hygiene promotion
- Make a referral plan for the ill

- Register all distributions and their contents
- Ensure that children and elderly or other vulnerable receive distribution first

- Request supplementary feeding for children, pregnant and lactating women

- Register incidents
- Create a referral plan for cases
