IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 28 April and 4 May 2024, IOM Yemen DTM tracked 32 households (HHs) (192 individuals)³ who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 56 per cent (18 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 28 per cent (9 HHs) and natural hazard, accounting for 16 per cent (5 HHs).

From 1 January to 4 May 2024, IOM Yemen DTM tracked 1,159 households (6,954 Individuals) who experienced displacement at least once.

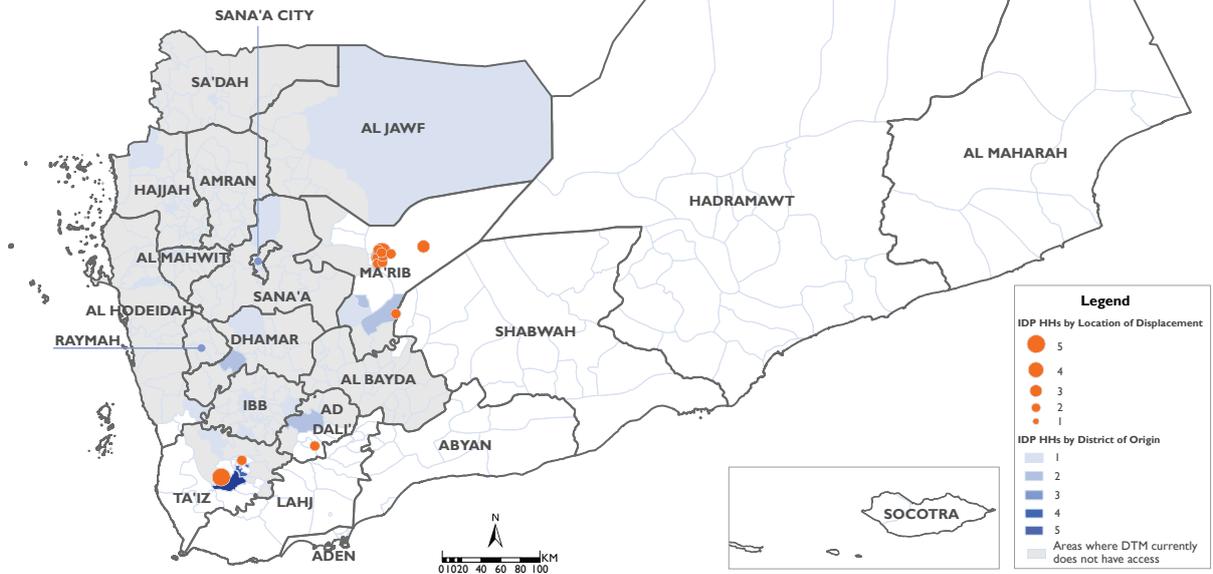

IOM DTM also recorded one returnee household in the governorate of Ma'rib returning to their locations of origin during the reporting period.
