IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 2 and 8 June 2024, IOM Yemen DTM tracked 38 households (HHs) (228 individuals)³ who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 53 per cent (20 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 42 per cent (16 HHs), and natural hazard, accounting for five per cent (2 HH).

From 1 January to 8 June 2024, IOM Yemen DTM tracked 1,530 households (9,180 Individuals) who experienced displacement at least once.
