IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>2</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 30 June and 6 July 2024, IOM Yemen DTM tracked 44 households (HHs) (264 individuals)<sup>3</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 64 per cent (28 HHs) of the total followed by economic reasons related to conflict, accounting for 34 per cent (15 HHs), and health reasons, accounting for two per cent (1 HH).

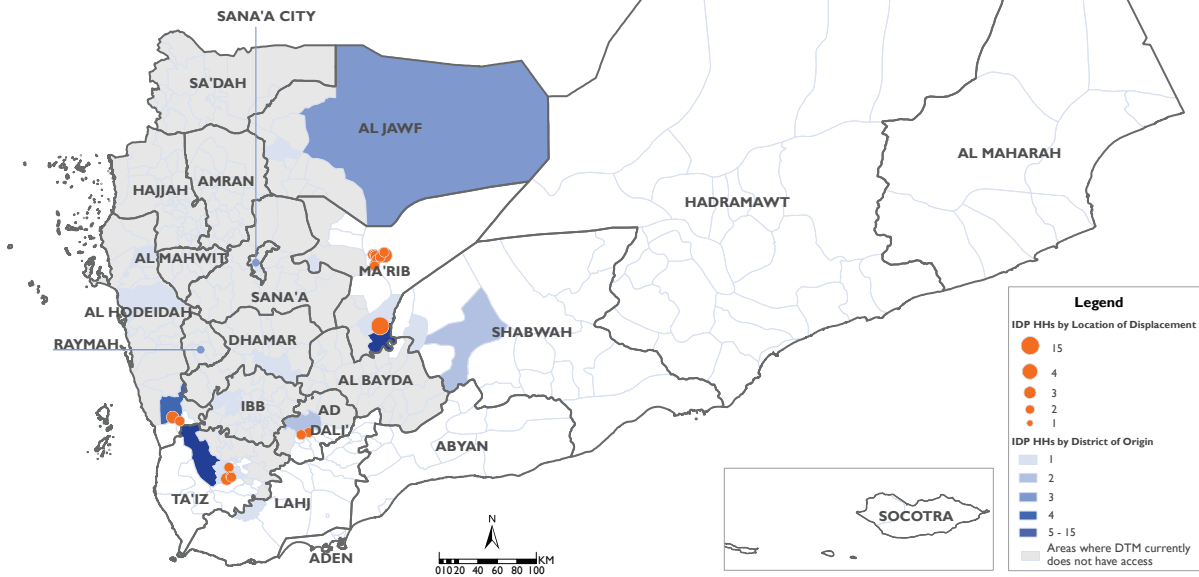

From 1 January to 6 July 2024, IOM Yemen DTM tracked 1,688 households (10,128 Individuals) who experienced displacement at least once.
