60% decrease in displacement from the previous week (72 HHs)¹

8 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 7 and 13 July 2024, IOM Yemen DTM tracked 29 households (HHs) (174 individuals)³ who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 62 per cent (18 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 38 per cent (11 HHs).

From 1 January to 13 July 2024, IOM Yemen DTM tracked 1,745 households (10,470 Individuals) who experienced displacement at least once.

IOM DTM also recorded eight returnee households in the governorates of Ta'iz (6 HHs) and Ma'rib (2 HHs) returning to their locations of origin during the reporting period.
