IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 21 and 27 July 2024, IOM Yemen DTM tracked 28 households (HHs) (168 individuals)³ who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 57 per cent (16 HHs) of the total followed by economic reasons related to conflict, accounting for 43 per cent (12 HHs).

From 1 January to 27 July 2024, IOM Yemen DTM tracked 1,881 households (11,286 Individuals) who experienced displacement at least once.

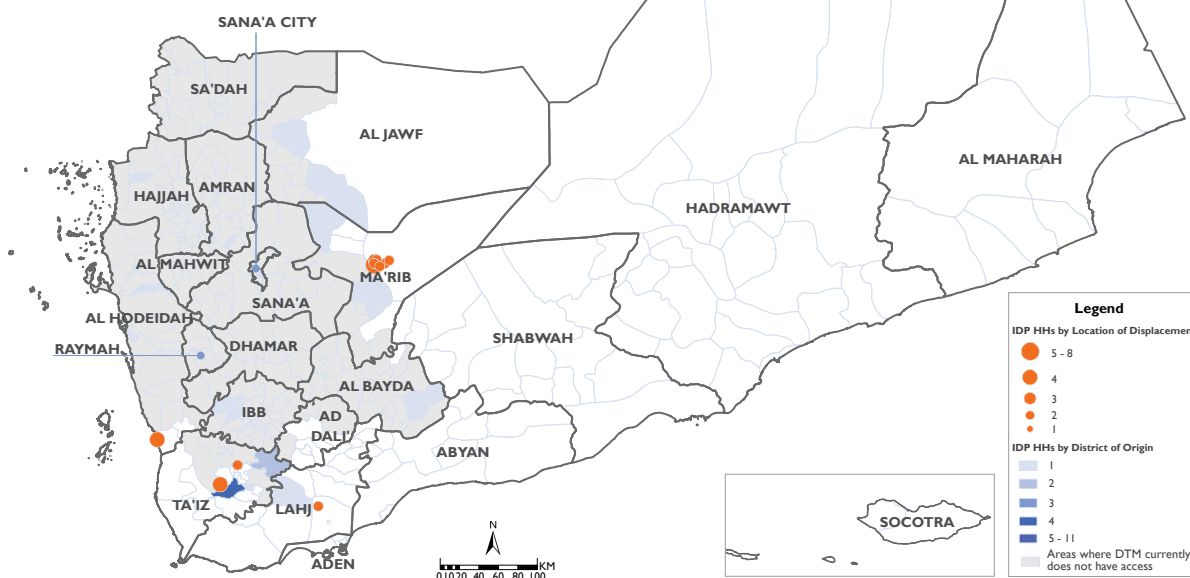

IOM DTM also recorded three returnee households in the governorate of Al Hodeidah returning to their locations of origin during the reporting period.
