The Transhumance Tracking Tool (TTT) collects key data on transhumance movements in Kaduna and Katsina States, with the aim to provide the information needed for supporting peaceful transhumance.

To better understand the transhumance movement trends and the impact of vulnerabilities on transhumant communities, IOM has developed the Transhumance Tracking Tool (TTT) through its Displacement Tracking Matrix (DTM). The TTT is composed of four components including an Early Warning system that detects and identifies transhumance-related events which could cause conflicts between herders and farmers (event alert) as well as massive, early, late or unexpected movements of herds (movement alert) which often lead to conflicts. These conflicts are often related to the use of natural resources or agro-pastoral practices. The system helps prevent conflicts, them and support their resolution and mitigation by informing competent stakeholders to reduce tensions in the affected areas of intervention. These alerts, once transmitted to the various actors, are used for conflict prevention or actions towards resolutions.

This report presents results from the early warning tool for the month of March 2024. A network of key informants selected from members of the Community Response Networks (CRNs) and Local Government Area (LGAs) - based team leads, were employed for data collection.

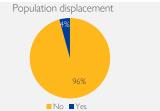

In March 2024, the TTT early warning tool captured 112 alerts in Faskari and Kaita LGAs of Katsina State, Kachia and Kaura LGAs of Kaduna State. The triangulated alerts included events (42%) and sudden movements (58%) during the period. Bondog ward located in Kaura LGA and Gidan Tagwai ward located in Kachia LGA shared the highest number of recorded event alerts in these locations.

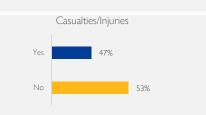

TYPES OF ALERTS

CONSEQUENCES OF THE EVENTS

KADUNA AND KATSINA STATES, NIGERIA — EARLY WARNING

<u>Data Collection:</u> : March 2024 <u>Publication Date May</u> 2024

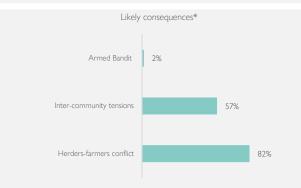

The movement alerts for March indicated that 46 per cent of the movement reported related to 'massive movements' and 34 per cent were categorized as 'other important movements.' These movements involved 46,241 live stocks and all the transhumance movements recorded were within Nigeria. The probability of the reported movement alerts resulting to massive movements of herders-farmers groups was 46 per cent with 82 per cent likelihood of causing herders-farmers conflicts. Additionally, the probability of risk materialization was 71 per cent likelihood and 29 per cent unlikelihood.

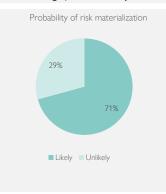

Sixty-five per cent of the total primary event alerts were related to banditry and kidnapping. This was followed by Non-state armed groups (17%), Farmer-Herder conflicts (5%), other type of event (9%) intra-community tensions (2%) and inter-community tensions (2%). The herders-farmers conflicts related to transhumance movement were reportedly caused by competition around animal resources (by product), Damage in surrounding fields by pastoral groups and farm/crop destruction. Among the key actors involved in the event alerts were local farmers and breeders (83%) and pastoral groups in transhumance (100%).

Among the key actors involved in conflict management were the community response network (17%) and pastoral organization community leaders (83%). Notwithstanding, 100 per cent of the events that occurred were resolved.

KADUNA AND KATSINA STATES, NIGERIA — EARLY WARNING

DASHBOARD #8

Data Collection: March 2024 Publication Date: April 2024

In response to the transmission of alerts by key informants and investigators to focal persons in Kaura LGA of Kaduna State, actions were undertaken by different local actors for conflict resolution. Responses were provided to mitigate the situation indicated by the "event alerts" and to avoid an imminent inter-community conflict or tension indicated by the "movements alerts". Thus, subject to the type of alerts, corresponding actions are taken to resolve or prevent conflicts related to transhumant movements. Highlighted below are some course of actions taken to register and resolve alert types.

RESPONSES TO EVENTS ALERT

There were active involvement of the local /and or national authorities, local farmers and breeders and pastoral groups in transhumance in the resolution of all the conflicts signaled by the alerts in Kaduna and Katsina states. The members of these communities responded to certain conflict related alerts by providing appropriate solutions to promote peaceful transhumance in the states.

different or bypass livestock route.
