

## ABOUT DTM FLOW MONITORING

The IOM Afghanistan's DTM Flow Monitoring activity is designed to provide insights into the mobility patterns at Afghanistan's border points with the Islamic Republic of Iran and Pakistan. The activity involves two interlinked exercises: the Flow Monitoring Counting (FMC), a headcount of individuals crossing the border, and the Flow Monitoring Surveys (FMS), which collect data on the profiles and intentions of randomly selected Afghan nationals. DTM FM is operational at four main crossing points (connected to Afghanistan's National Highway) as well as six other crossing points with Islamic Republic of Iran and Pakistan. This weekly snapshot combines information from the FM activity and various IOM sources related to cross-border movement. For a detailed explanation of the methodology used in gathering this data, the report directs readers to the section titled "IOM INFLOW DATA" on the last page.

## HIGHLIGHTS OF THE WEEK

- Both inflows and outflows increased by seven per cent from last week.
- Trends regarding planned length of stay among those crossing through main border points and other border points remain consistent. Those crossing through main border points were more likely to be uncertain about their planned length of stay in Afghanistan, while those crossing through other border points were more likely to plan a short-term length of stay.
- Those holding long-term foreign residential documentation, like Amayesh or PoR cards, were more likely to be participating in long-term movements compared to those holding passports and visas.

### ASSESSED CROSSING POINTS FIGURES

Ordered from west to east

Crossing point	Inflow	Outflow
Islam Qala	26,665	16,703
Abu Nasr Farahi	1,071	2,073
Milak	14,151	5,450
Baramcha	4,366	4,092
Dak	649	11,978
Spin Boldak	8,099	4,563
Angor Ada	42	108
Ghulam Khan	976	807
Pathan	189	7
Torkham	20,649	13,752

Total inflows	24,226	35,307

\* More information on the methodology of collecting data on different subsets of inflow groups can be found on the last page of this report in the section titled "IOM INFLOW DATA."  
 \*\* Documented returnees include Proof of Registration (PoR) holders. Source: IOM DTM Pakistan and UNHCR Pakistan  
 \*\*\* This data is collected by IOM CB-PAHA. Individuals receive post-arrival assistance from IOM and support from Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>.  
 \*\*\*\* DTM Afghanistan does not collect data on subsets of outflow groups.

## INFLOWS

The following analysis compiles responses from 5,686 total Afghan nationals (2,776 at the border with the Islamic Republic of Iran, 2,910 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups entering Afghanistan.

## IOM INFLOW DATA

DTM Afghanistan, DTM Pakistan, and IOM Afghanistan's Cross Border Post-Arrival Humanitarian Assistance (CB-PAHA) program use different methodologies to collect data on various demographic subsets of individuals entering Afghanistan (inflows). The following flow chart illustrates the relationships between the subsets and how IOM coordinates its various activities and methodologies to develop more robust and comprehensive databases on movements into Afghanistan.

## DATA ON ASSISTED AFGHAN RETURNEES

IOM Afghanistan's CB-PAHA program collects information on undocumented Afghan returnees who pass through reception centers near the border and receive assistance from IOM and Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>.

### CUMULATIVE TRENDS: NUMBER OF RETURNEES ASSISTED BY IOM (10 JANUARY - 6 JULY)

#### FROM THE ISLAMIC REPUBLIC OF IRAN

##### ISLAM QALA

##### MILAK

#### FROM PAKISTAN

##### SPIN BOLDAK

##### TORKHAM
