IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 11 and 17 August 2024, IOM Yemen DTM tracked 40 households (HHs) (240 individuals)³ who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 58 per cent (23 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 35 per cent (14 HHs), and natural hazard reasons accounting for seven per cent (3 HH).

From 1 January to 17 August 2024, IOM Yemen DTM tracked 2,156 households (12,936 Individuals) who experienced displacement at least once.

IOM DTM also recorded one returnee household in the of Al Hodeidah governorate returning to their locations of origin during the reporting period.
