IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements² in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 8 and 14 September 2024, IOM Yemen DTM tracked 86 households (HHs) (516 individuals)³ who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 81 per cent (70 HHs) of the total followed by economic reasons related to conflict, accounting for 14 per cent (12 HHs), and natural hazard reasons accounting for five per cent (4 HH).

From 1 January to 14 September 2024, IOM Yemen DTM tracked 2,633 households (15,798 Individuals) who experienced displacement at least once.
