

## ABOUT DTM FLOW MONITORING

DTM Flow Monitoring, conducted by IOM Afghanistan, is designed to provide insights into the mobility patterns at Afghanistan’s border points with the Islamic Republic of Iran and Pakistan. This activity involves two interlinked exercises: Flow Monitoring Counting (FMC), which monitors the number of movements across the border, and Flow Monitoring Surveys (FMS), which collect data on the profiles of randomly selected Afghan nationals crossing the border including documentation held, reasons for travel, and the intended period of stay/ travel. It is important to note that DTM collects information on total movements at a given border point, not the number of unique individuals entering or leaving the country. As a result, if one individual both left and re-entered Afghanistan during the reporting period, this would count as one outflow movement and one inflow movement. Movements can be attributed to a wide variety of reasons, including returnees coming back to Afghanistan after living abroad, people visiting family, deportees, those travelling for economic reasons, medical patients, students, or Afghans moving abroad for different reasons. Circular movements, which include those who frequently and regularly travel back and forth across the border for trade and other reasons, are also common. This monitoring offers a clear picture of population movements in and out of the country.

DTM FM is operational at four main crossing points (connected to Afghanistan’s National Highway) as well as six other crossing points with Islamic Republic of Iran and Pakistan. This weekly snapshot combines information from the FM activity and various IOM sources related to cross-border movement. For a detailed explanation of the methodology used in gathering this data, the report directs readers to the section titled “IOM INFLOW DATA” on the last page.

## HIGHLIGHTS OF THE WEEK

- **Inflow was 52 per cent larger than outflow this week.**
- **Inflows increased by 21 per cent compared to last week.**
- **This week and last week saw sharp increases among inflow from the Islamic Republic of Iran. Main reasons for inflows from the Islamic Republic of Iran included deportation and voluntary return, but the increase may also be related to Afghan nationals returning after visiting the Islamic Republic of Iran for the Arbaeen religious holiday. A similar increase was observed in June during Eid al Adha.**
- **Main destination provinces among those coming from the Islamic Republic of Iran included Herat, Farah, and Takhar. Among those coming from Pakistan, main destinations include Kandahar and Paktika, the locations of the Spin Boldak and Angor Ada border points, respectively.**
- **Among inflows from the Islamic Republic of Iran, two thirds were undocumented returnees, among which a quarter were assisted by IOM. On the Pakistan side, six per cent of movements were reported undocumented returnees, among which 88 per cent were assisted by IOM.**
- **Out of the total inflow, 93 per cent entered Afghanistan through four main border points, while only seven per cent used the other six border points. Out of the total outflow, 88 per cent departed via the main border points and 12 per cent left through the other border points.**

MAP DISCLAIMER: This map is for illustration purpose only. The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the International Organization for Migration.

ASSESSED CROSSING POINTS MOVEMENTS  
 Ordered from west to east

Crossing point	Inflow	Outflow
Islam Qala	42,079	20,752
Abu Nasr Farahi	827	1,125
Milak	15,906	4,952
Bahramcha	3,534	3,396
Nazar Posta	895	1,155
Spin Boldak	8,252	11,530
Angor Ada	427	447
Ghulam Khan	459	618
Pathan	143	23
Torkham	14,156	13,195

CONTENT DISCLAIMER: IOM data collection exercises and analysis are undertaken to inform humanitarian and basic human needs partners regarding mobility dynamics at Afghanistan’s borders with the Islamic Republic of Iran and Pakistan for better response planning. The data presented in this snapshot is representative of the movement captured at the flow monitoring points during the timeframe indicated. Data should not be generalized and do not represent a full picture of inter-regional migration, but rather of migration flows at the specific locations monitored.

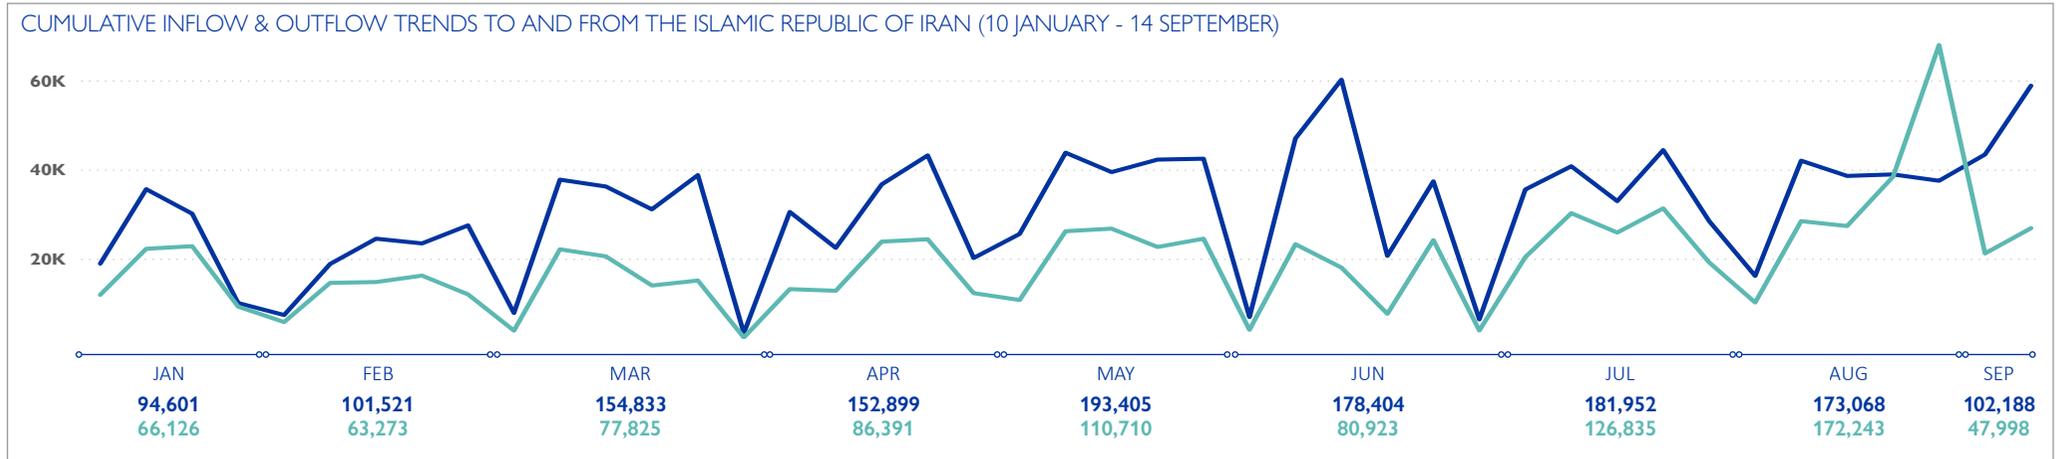

KEY INFLOW FIGURES BY BORDER COUNTRY\*

Figure	IRN	PAK
Total inflow movements	58,812	27,866
Documented returnees**	NOT AVAILABLE	683
Undocumented returnees***	21,445	1,615
Assisted by IOM	5,383	1,417

\* More information on the methodology of collecting data on different subsets of inflow groups can be found on the last page of this report in the section titled "IOM INFLOW DATA."

\*\* Documented returnees include Proof of Registration (PoR) holders. Source: IOM DTM Pakistan and UNHCR Pakistan

\*\*\* This data is collected by IOM CB-PAHA. Individuals receive post-arrival assistance from IOM and support from Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>.

\*\*\*\* DTM Afghanistan does not collect data on subsets of outflow groups.

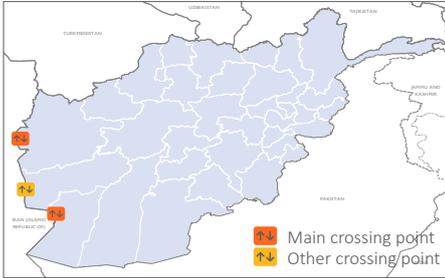

## INFLOWS

The following analysis compiles responses from 5,335 total Afghan nationals (2,639 at the border with the Islamic Republic of Iran and 2,696 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups entering Afghanistan.

### INFLOWS FROM THE ISLAMIC REPUBLIC OF IRAN

## IOM INFLOW DATA

DTM Afghanistan, DTM Pakistan, and IOM Afghanistan’s Cross Border Post-Arrival Humanitarian Assistance (CB-PAHA) program use different methodologies to collect data on various demographic subsets of individuals entering Afghanistan (inflows). The following flow chart illustrates the relationships between the subsets and how IOM coordinates its various activities and methodologies to develop more robust and comprehensive databases on movements into Afghanistan.

### 1 TOTAL INFLOWS

COLLECTED AT BORDERS WITH PAK AND IRN

DTM Afghanistan counts every individual, regardless of nationality, documentation status, or planned length of stay in Afghanistan, who enters Afghanistan from the Ghulam Khan, Islam Qala, Milak, Spin Boldak, and Torkham border points. This exercise is referred to as Flow Monitoring Counting (FMC). DTM Afghanistan also surveys a random sample of those counted using its Flow Monitoring Survey (FMS) exercise.

### 2 TOTAL NUMBER OF RETURNEES

COLLECTED AT BORDER WITH PAK

DTM Pakistan collects the number of Afghan nationals returning to Afghanistan via the Spin Boldak and Torkham border crossing points. Returnees are classified as Afghans who intend to return and live in Afghanistan for an extended period of time, as opposed to those just travelling for trade or to visit Afghanistan temporarily. There is no similar exercise at the border with the Islamic Republic of Iran.

### 3 TOTAL NUMBER OF DOCUMENTED RETURNEES

COLLECTED AT BORDER WITH PAK

### 4 TOTAL NUMBER OF UNDOCUMENTED RETURNEES

COLLECTED AT BORDERS WITH PAK AND IRN

The number of documented returnees comes from DTM Pakistan data collection. The number of undocumented returnees comes from IOM CB-PAHA data collection.

### 5 TOTAL NUMBER ASSISTED BY IOM

COLLECTED AT BORDERS WITH PAK AND IRN

IOM CB-PAHA assists undocumented Afghan returnees in reception centers located close to the Islam Qala, Milak, Spin Boldak, and Torkham border points.

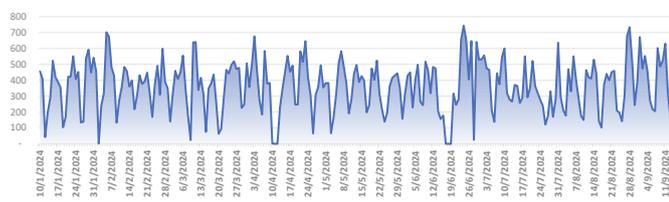

## DATA ON ASSISTED AFGHAN RETURNEES

IOM Afghanistan’s CB-PAHA program collects information on undocumented Afghan returnees who pass through reception centers near the border and receive assistance from IOM and Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit <https://afghanistan.iom.int/situation-reports>.

### CUMULATIVE TRENDS: NUMBER OF RETURNEES ASSISTED BY IOM (10 JANUARY - 14 SEPTEMBER)
