## Bentiu PoC

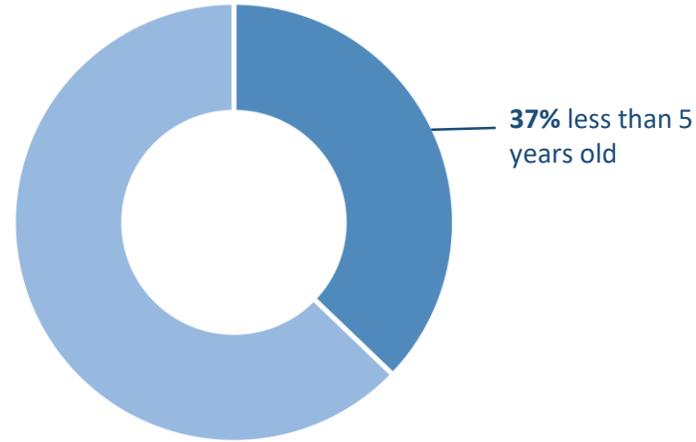

Data collection 29-31 January 2018

The Bentiu Protection of Civilian (PoC) site was established in December 2013. As of January 2019, 160,746 beneficiaries remain registered in the site. However, recognizing that there have been significant population changes since the last biometric registration, IOM-DTM conducts monthly headcounts to monitor changing dynamics and displacement trends.

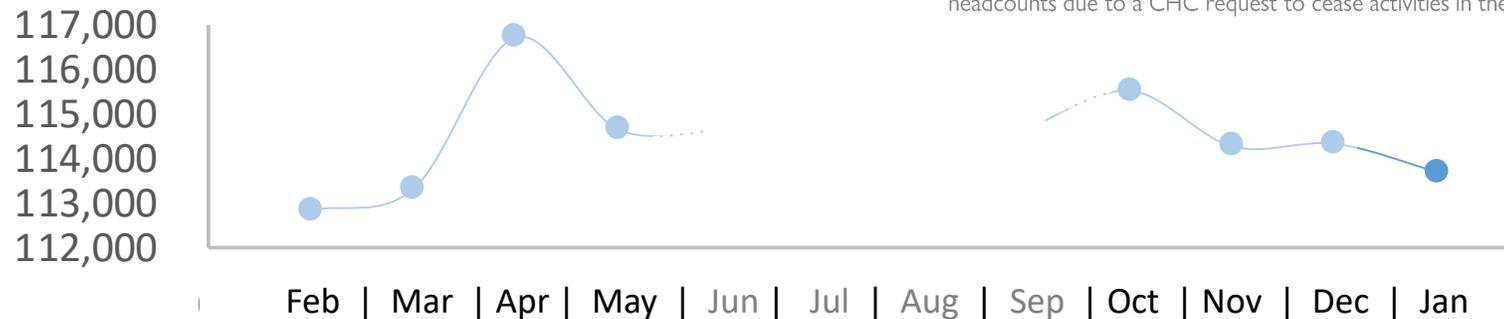

As per the January 2019 headcount, the population stands at 113,695 individuals (18,063 households).

Children under the age of five constitute over a third of the PoC site population. Overall, 54 per cent of the population are men and boys and 46 per cent are women and girls – among under five year olds boys account for 19 per cent.
