Over the past week, the top five destinations (districts) for newly displaced individuals were Akkar (24%), Chouf (23%), Baalbek (14%), Aley (7%), and El Meten (5%).

The increase in total number of IDPs may not always align with the number of new arrivals within a specific period. This difference often occurs when Key Informants (KIs) report cumulative totals that include previously uncounted IDPs.

Methodology

The objective of the Mobility Snapshot is to support the humanitarian community in preparedness and response planning. Multi-layered data is routinely captured through Rounds using a suite of methodological tools designed to track and monitor displacement. These tools are in line with the [DTM Global Methodological Framework](#).

Data is collected nationwide through a combination of face-to-face and remote data collection methods, utilizing a network of over 50 enumerators and 1,500 key informants. These key informants consist of government officials, mukhtars, community representatives, and neighborhood focal points.
