## New Arrival Malnutrition Screening Summary (children 6-59 months)

An exhaustive nutrition screening using mid-upper arm circumference (MUAC) and Oedema for acute malnutrition was conducted by Nutrition Sector partners for 123 children of 6-59 months. Of the 123 children screened, the MUAC reading was: 2 children (from accessible area) were in the Red category, 4 were in the Yellow category and 117 were measured in the Green category. No case of Oedema was reported in the 3 LGAs that sent in reports.

The results also include 91 children from neighbouring Cameroon and Niger (85 moved to Bama, 2 to Gwoza 2 to Ngala). Out of the 91 children measured, 2 were in the red category, 86 were in the green category and 3 children were in the yellow category.
