DISPLACEMENT TRACKING MATRIX (DTM) AFAR REGION, ETHIOPIA

ROUND 15: JANUARY - FEBRUARY 2019

AFAR REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT: 49,437 displaced individuals comprising 8,980 households in 55 displacement sites were identified in Afar region. These figures represent a decrease of 1,182 individuals (-2.34%), an increase of 200 households (+2.28%) and an increase of 1 site (+1.85%) since round 14 (November/December 2018). No sites have opened since the start of 2019, 97% sites opened before 2018 and 3% opened in 2018. Drought was the primary cause of displacement for an estimated 35% of the displaced population.

DEMOGRAPHICS: 49% of displaced individuals were female and 51% were male. 58% were younger than 18 years old while 6% were over 60 years old.

SHELTER: 41 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: None of the sites meet SPHERE standards of access to over 15 liters of water per person per day. 48 displacement sites (87%) reported having no latrines.

**All data, including graphs and maps presented in this report comprise data collected between 1 to 31 January 2019.*

FOOD, NUTRITION AND LIVELIHOODS: 3 sites (5%), representing 762 individuals, reported having no access to food. 89% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Malaria was the primary health concern in this round of data collection with 21 sites reporting this health concern.

EDUCATION: In 20% of sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 89% sites. Alternative basic education (ABE) is available at 6 sites.

COMMUNICATION: 64% of sites reported that families/friends were IDPs primary source of information followed by site management at 29% of sites.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

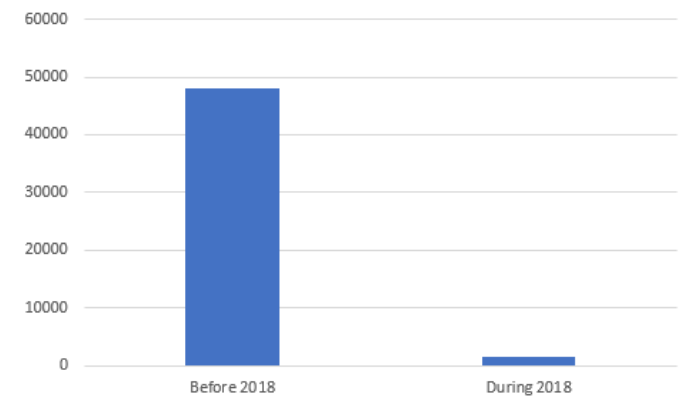

Figure 1: Trends in stock totals of displacement and new displacements before 2018 and during 2018

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) AFAR REGION, ETHIOPIA ROUND 15: JANUARY - FEBRUARY 2019

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

Drought has consistently been reported as the primary cause of displacement in the region (as indicated by figure 4). IDPs displaced before 2018 and during 2018 reported being displaced by drought. However, no IDPs were reported being displaced previously. Furthermore, IDPs from none of the sites were leaving their current place of displacement and neither do they intend to return to their place of origin.

Regarding the duration of sites, none of the sites identified were opened in 2019 while 3% opened between January and December 2018 and 97% of sites opened before 2018.

The majority of IDPs identified in the region were displaced to locations near their areas of origin. 97% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 95% were displaced within their zone of origin.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict Induced	Climate Induced	Other	Grand Total
Before 2018	3,521	39,087	5,332	47,940
During 2018	-	1,497	-	1,497
Grand Total	3,521	40,584	5,332	49,437

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

DISPLACEMENT TRACKING MATRIX (DTM) AFAR REGION, ETHIOPIA ROUND 15: JANUARY - FEBRUARY 2019

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

At all of the sites, IDPs did not foresee a resolution to their displacement.

At all of sites, IDPs prefer reintegration as a durable solution to their displacement while at none of the sites, did they prefer return. None of the sites reported that IDPs prefer relocation.

Figure 5 shows the number of sites reporting various obstacles to returns, while figure 6 shows support IDPs need to return or reintegrate.

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

Figure 6: Number of sites by support needed to return or reintegrate

Figure 7: Demographic breakdown

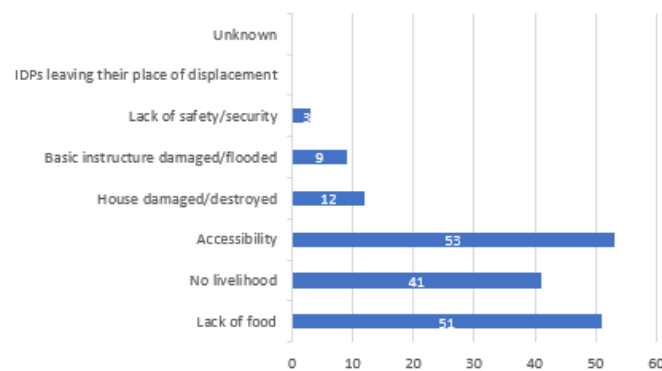

Figure 5: Number of sites reporting obstacles to return

Vulnerable Population	Number of IDPs
Number of breastfeeding mothers	5,797
Elderly-headed households	3,844
Elderly persons without care givers	3,566
Number of members of ethnic minorities	0
Number of members of religious minorities	3
Orphaned children	1,639
Persons with chronic diseases/serious medical conditions	275
Number of persons with disabilities over 18	422
Number of persons with disabilities under 18	233
Number of pregnant girls under 18	1,147
Number of pregnant women over 18	4,539
Separated children	1,411
Single female-headed households	1,054
Single male-headed households	540
Unaccompanied Children	610
Single-child headed Households	329
Grand Total	25,409

DISPLACEMENT TRACKING MATRIX (DTM) AFAR REGION, ETHIOPIA ROUND 15: JANUARY - FEBRUARY 2019

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, fifteen rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from

the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator

tool based on the age range and sex of the household members of 20 randomly selected households from the site.
