

OVERVIEW

On the night of 14 to 15 March 2019, Tropical Cyclone IDAI made landfall in central Mozambique. The cyclone brought torrential rains and winds affecting mostly the Provinces of Manica, Sofala and Zambézia, causing flash flooding and subsequent destruction.

From 2 to 13 May, in close coordination with Mozambique’s National Institute for Disaster Management (INGC), IOM DTM (Displacement Tracking Matrix) teams conducted baseline assessments at **Locality level (Localidade)**, which corresponds to the lowest administrative level in the Country. The first round covered 4 districts in Sofala province, specifically Beira City, Buzi, Dondo and Nhamatanda. The DTM teams interviewed locality chiefs capturing population estimates and geographic distribution, population movements, shelter repairs and access to services in host communities.

COVERAGE

58 Localities assessed across **8** administrative posts and **4** districts in Sofala province.

Province	District	Number of assessed localities	Coverage
Sofala	Buzi	10 out of 10	100%
	Cidade da Beira	26 out of 26	100%
	Dondo	13 ¹ out of 14	93%
	Nhamatanda	9 ² out of 11	81%
Total of 58 Localities			

(¹key-informant unavailable, ²localities are physically inaccessible)

Through the Baseline Assessments, DTM tracks the locations and sizes of four core target population categories, building an understanding of the main internal displacement patterns and dynamics in the affected region. In each locality, the number of IDPs and Returnees is captured who stay outside accommodation centers or resettlement sites.

POPULATION CATEGORIES DEFINITIONS

Resident population affected by shelter damages	General resident population whose homes were affected by shelter damage and have left or stayed in the assessed locality
Returnees	Population who have returned to their locality of origin
Arrival IDPs	People displaced outside their locality of origin who have arrived in assessed locality

MAIN FINDINGS

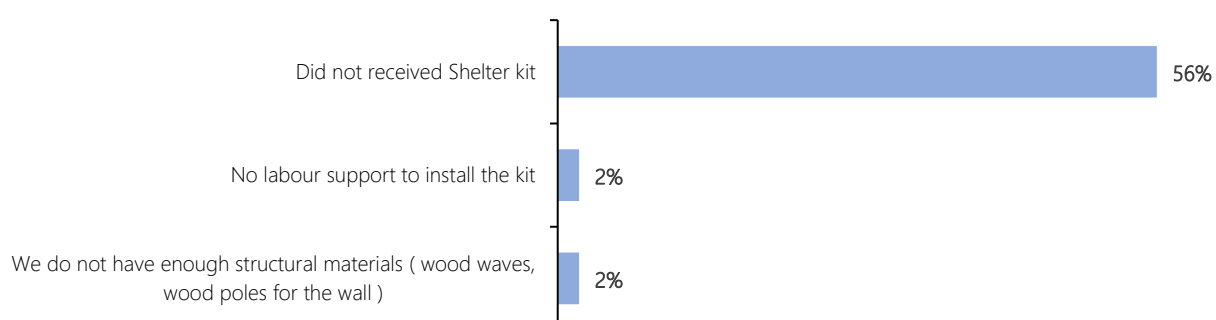

NUMBER OF POPULATION CATEGORIES BY DISTRICT

District	Affected Population		Returnees		Arrival IDPs	
	Individual	Household	Individual	Household	Individual	Household
Buzi	144,476	29,221	4,692	937	18,928	3,786
Cidade da Beira	257,474	53,421	2,808	711	1,288	382
Dondo	129,208	26,076	2,162	451	1,871	380
Nhamatanda	199,322	44,914	683	140	2,437	643
Totals	730,480	153,632	10,345	2,239	24,524	5,191
	Across 46 localities		Across 14 localities		Across 13 localities	

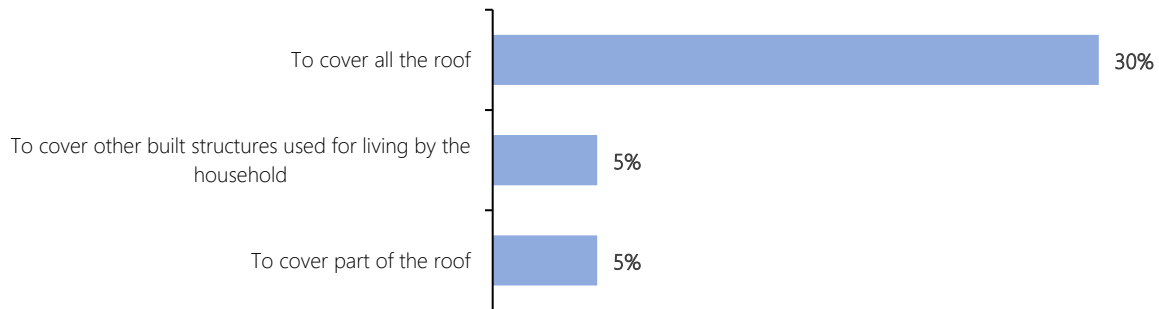

- In the 4 assessed districts of Sofala province, population displacement happened within the same district;
- More than **700,000** people were affected by shelter damage;
- The estimated displaced population who stay outside accommodation centers and resettlement locations is around **25,000** individuals and **5,000** households;
- More than **10,000** people have returned to their locality of origin.

USE OF SHELTER KIT

- In **60%** of all assessed localities, corresponding to a total of 358,831 individuals and 79,267 households affected by shelter damage, beneficiaries have not used the shelter kit because:
 - o 56% reported it was not received;
 - o 2% didn't have enough structural support material and
 - o 2% didn't have labour support to install the kit.

- In **40%** of all assessed localities where the shelter kit was used:
 - o 30% reported using it to cover the whole roof, corresponding to a total of 266,935 individuals and 59,422 households affected by shelter damage;
 - o 5% reported using the shelter kit to cover part of the roof, corresponding to a total of 19,995 individuals and 4,090 households affected by shelter damage;
 - o 5% reported using the shelter kit to cover other built structures used for living by the household, corresponding to a total of 67,562 individuals and 16,838 households affected by shelter damage;

ACCESS TO SERVICES

OPEN MARKETS

7% NO ACCESS

In **10** out of 58 assessed localities, corresponding to 7% of the total affected population (36,694 individuals), there is no access to functioning open markets.

- In 50% of these localities, the main reason for the lack of access to open markets is distance; the remaining 50% reported the absence of market.

HEALTH FACILITIES

6% NO ACCESS

In **5** out of 58 assessed localities, corresponding to 6% of the affected population (24,448 individuals), there is no access to functioning health facilities.

- In 50% of these localities, the main reason for the lack of access to functioning health facilities is distance; 20% reported costs and the remaining 30% reported lack of medicine.

EDUCATION FACILITIES

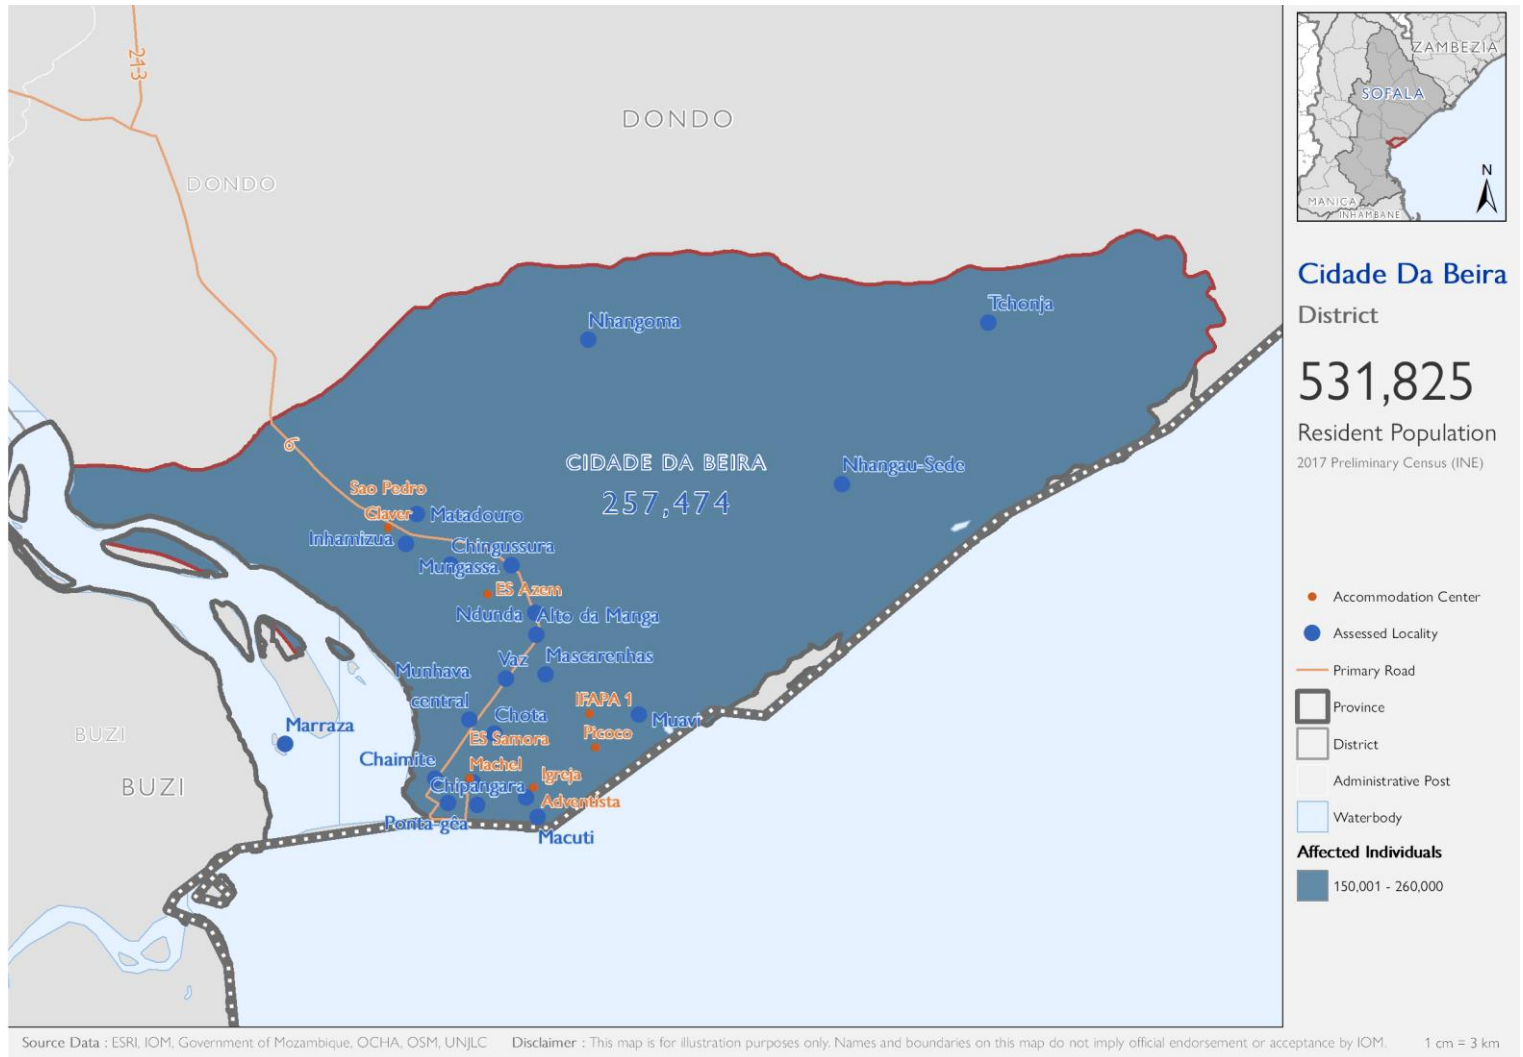

4% NO ACCESS

In **57** out of 58 assessed localities, corresponding to 96% of the affected population (686,034 individuals) there is access to functioning education facilities.

SELF REPAIR ACTIONS OF HOUSE DAMAGE

TYPE OF ACTION TAKEN BY THE POPULATION TO REPAIR THEIR DAMAGED HOUSES		NUMBER OF LOCALITIES	PERCENTAGE OF AFFECTED POPULATION BY SHELTER DAMAGE
Collected/recovered materials	Collected/recovered materials from damaged/destroyed houses	41 out of 58 localities	69%
	Used recovered materials to repair the roof	31 out of 58 localities	60%
	Used recovered material to repair the walls	12 out of 58 localities	14%
	Used recovered materials to repair other parts of the house	20 out of 58 localities	39%
Bought materials	Bought materials to repair the roof	24 out of 58 localities	36%
	Bought materials to repair the walls	8 out of 58 localities	9%
	Bought materials to repair other parts of the house	15 out of 58 localities	26%
Have not taken any action		3 out of 58 localities	3%

BEIRA CITY DISTRICT

DEMOGRAPHICS

District	Affected Population		Returnees		Arrival IDPs	
	Individual	Household	Individual	Household	Individual	Household
Cidade da Beira	257,474	53,421	2,808	711	1,288	382
Number of localities	In 17 out of 26 localities		In 6 out of 26 localities		In 5 out of 26 localities	

MAIN FINDINGS:

- More than half of the localities (**65%**) reported having been affected by shelter damage, amounting to a total of 257,474 individuals and 53,421 households;
- In 23% of all assessed localities, people have started returning to their locality of origin;
- In 19% of all assessed localities, IDPs have arrived from other localities in the district.

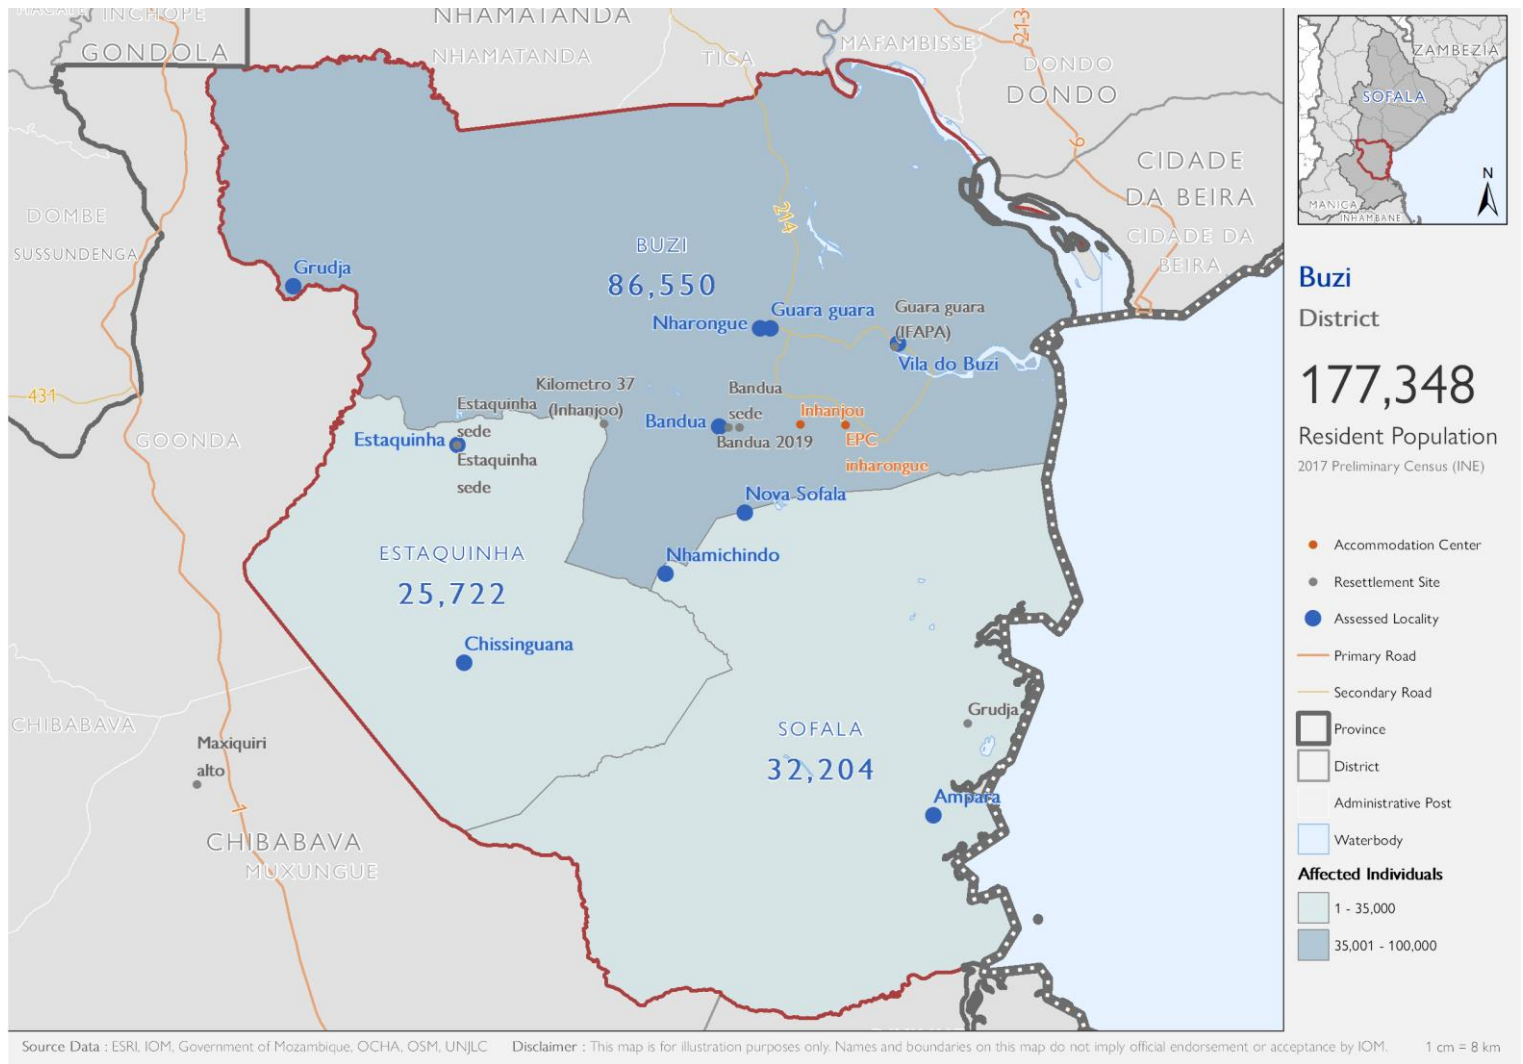

USE OF SHELTER KIT

In **62%** of all assessed localities, corresponding to a total of 159,389 individuals and 25,649 households affected by shelter damage, beneficiaries have not received the shelter kit.

ACCESS TO SERVICES

Access to open markets, and functioning health and education facilities are reported in above **84%** of all assessed localities.

BUZI DISTRICT

DEMOGRAPHICS

District	Affected Population		Returnees		Arrival IDPs	
	Individual	Household	Individual	Household	Individual	Household
Buzi	144,476	29,221	4,692	937	18,928	3,786
Number of localities	In 8 out of 10 localities		In 2 out of 10 localities		In 2 out of 10 localities	

MAIN FINDINGS:

- Most of the localities (**80%**) have reported being affected by shelter damage, amounting to a total of 144,476 individuals and 29,221 households;
- In 20% of all assessed localities, people have started returning to their locality of origin;
- In 20% of all assessed localities, IDPs have arrived from other localities in the district;

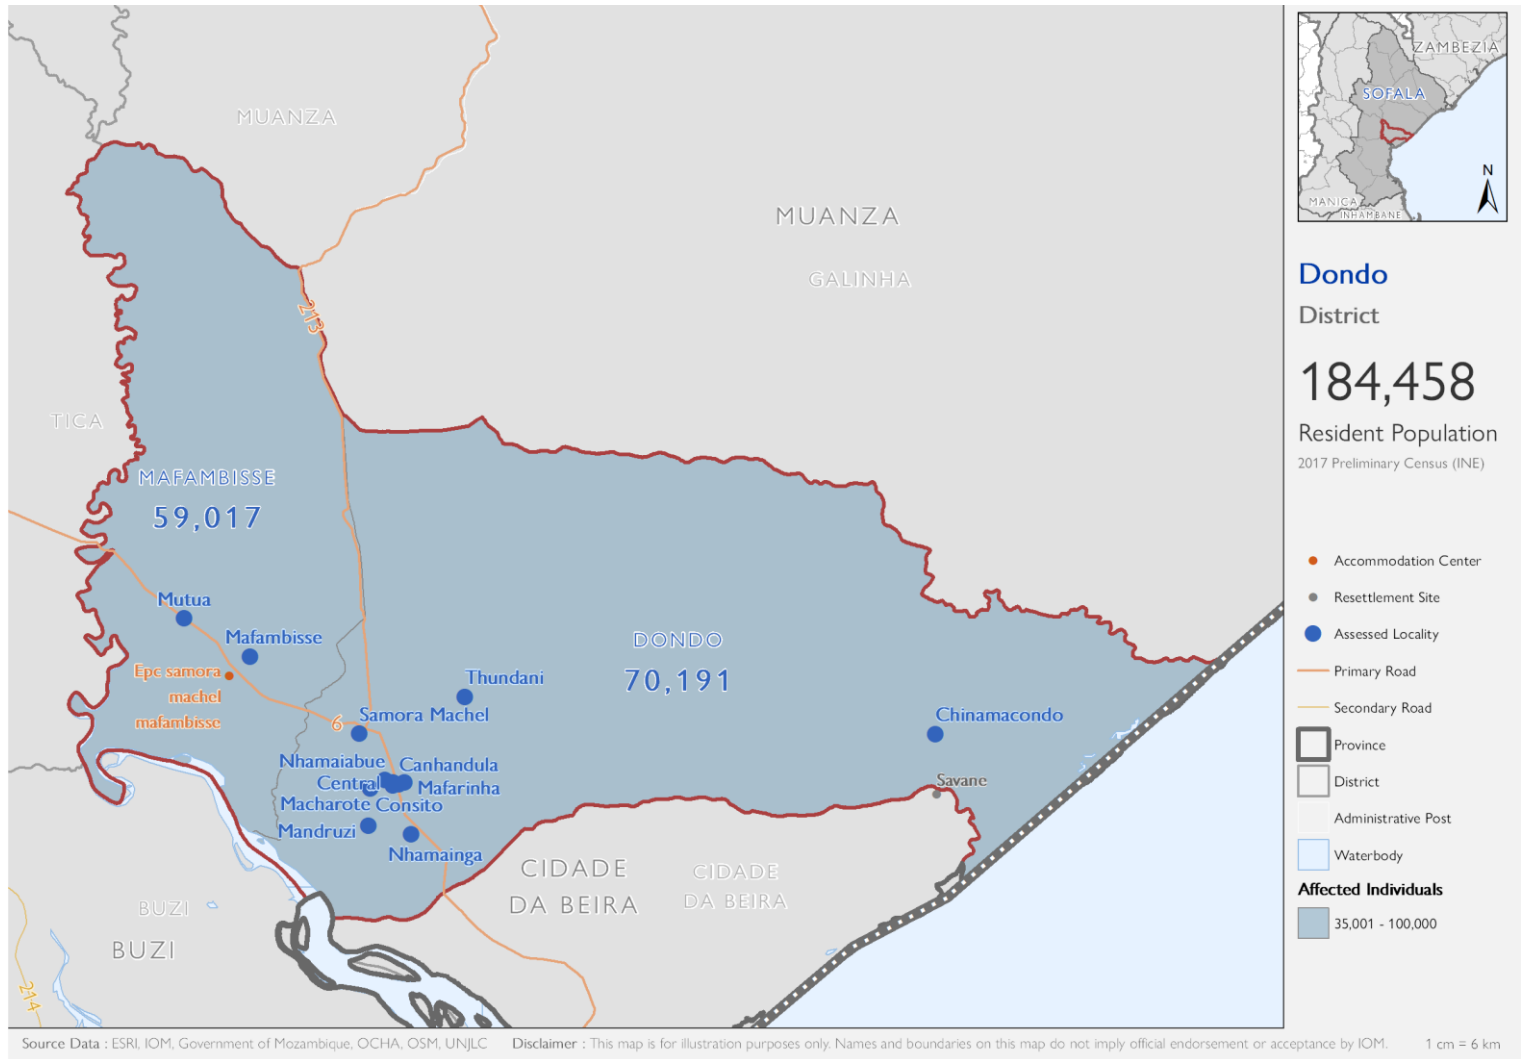

USE OF SHELTER KIT

89% of all assessed localities reported having used the shelter kit; of which, 76% to cover the whole roof and 13% to cover part of the roof. The remaining 11% of localities reported not receiving the kit.

ACCESS TO SERVICES

All **10** assessed localities reported full access to open markets, and functioning health and education facilities.

DONDO DISTRICT

DEMOGRAPHICS

District	Affected Population		Returnees		Arrival IDPs	
	Individual	Household	Individual	Household	Individual	Household
Dondo	129,208	26,076	2,162	451	1,871	380
Number of localities	In 12 out of 13 localities		In 4 out of 13 localities		In 2 out of 13 localities	

MAIN FINDINGS:

- Most of the localities (**92%**) have reported being affected by shelter damage, amounting to a total of 129,208 individuals and 26,076 households;
- In 41% of all assessed localities, people have started returning to their locality of origin;
- In 15% of all assessed localities, IDPs have arrived from other localities in the district.

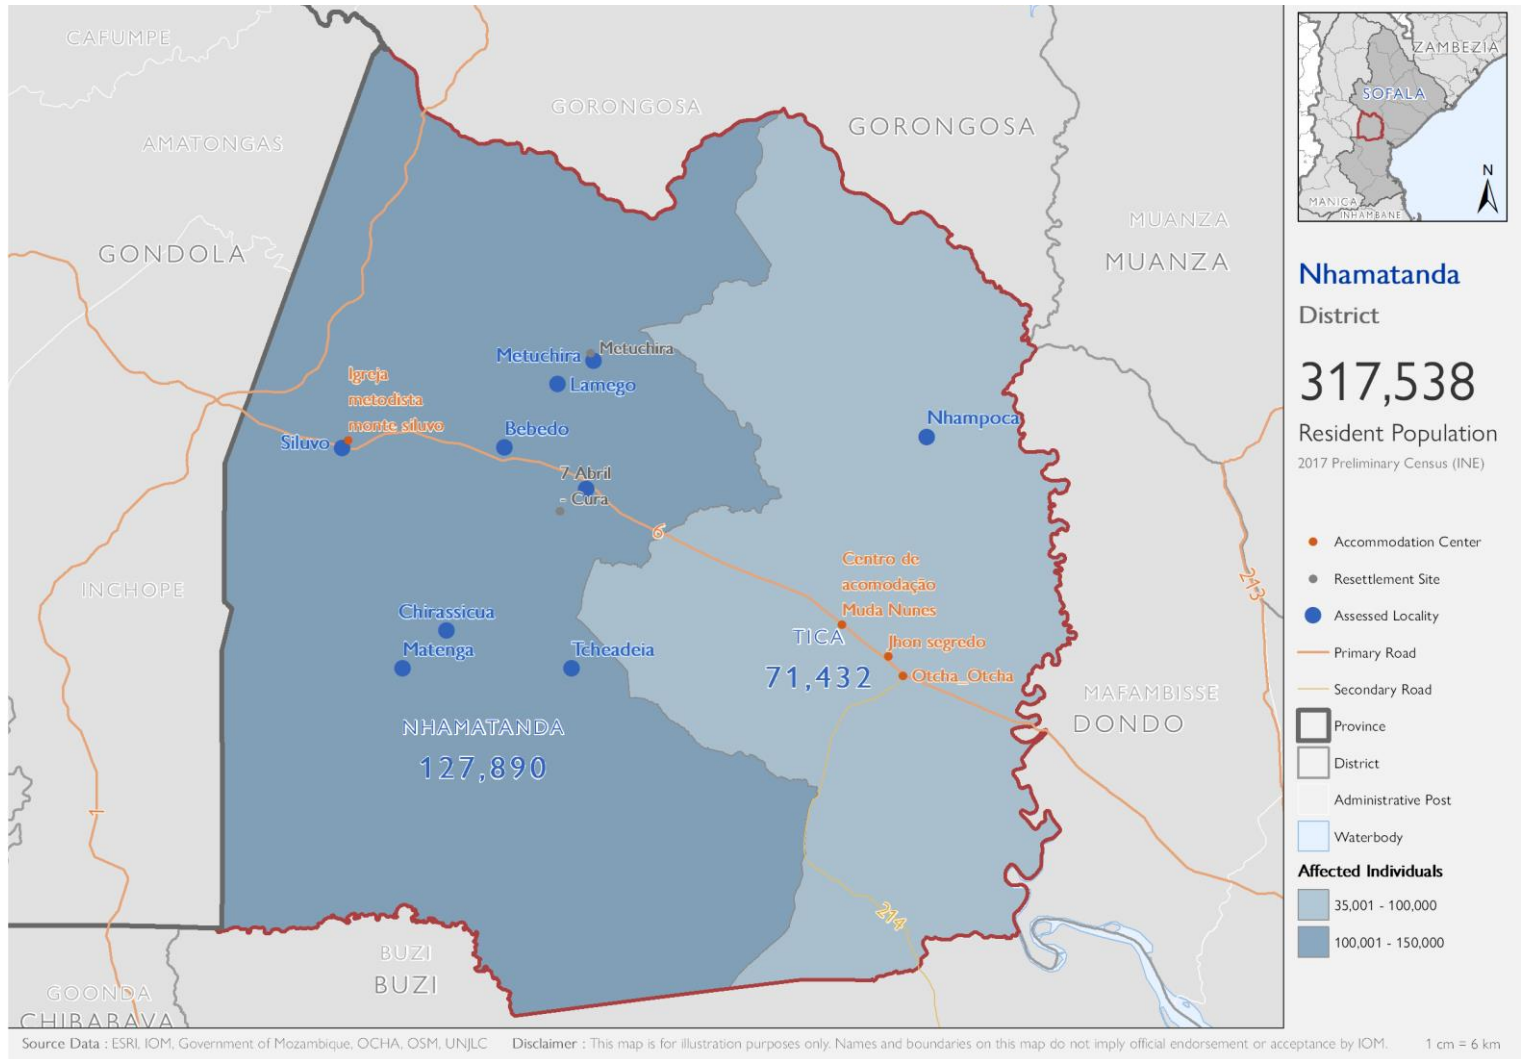

USE OF SHELTER KIT

In **92%** of all assessed localities, corresponding to a total of 118,265 individuals and 24,120 households affected by shelter damage, beneficiaries have not received the shelter kit.

ACCESS TO SERVICES

All **13** assessed localities reported full access to open markets, and functioning health and education facilities.

NHAMATANDA DISTRICT

DEMOGRAPHICS

District	Affected Population		Returnees		Arrival IDPs	
	Individual	Household	Individual	Household	Individual	Household
Nhamatanda	199,322	44,914	683	140	2,437	643
Number of localities	In 8 out of 9 localities		In 2 out of 9 localities		In 4 out of 9 localities	

MAIN FINDINGS:

- In most of the localities (**89%**) reported having been affected by shelter damage, amounting to a total of 199,322 individuals and 44,914 households;
- In 22% of all assessed localities, people have started returning to their locality of origin;
- In 44% of all assessed localities, IDPs have arrived from other localities in the district;

USE OF SHELTER KIT

In **33%** of all assessed localities, corresponding to a total of 65,238 individuals and 16,148 households affected by shelter damage, beneficiaries have not received the shelter kit.

ACCESS TO SERVICES

Access to functioning health and education facilities are reported in all assessed localities, and access to open markets is accessible in **84%** of all localities.
