DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA

ROUND 16: March/April 2019

TIGRAY REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

94,542 displaced individuals comprising 46,873 households in 183 displacement sites were identified in Tigray region. These figures represent an increase of 11,574 individuals (13.95%), an increase of 8,580 households (22.41%) and an increase of 21 sites (12.96%) since round 15 (January/February 2019). 15.3% sites opened during 2018 and 3% opened in 2019. Conflict was the primary cause of displacement for an estimated 100% of the displaced population.

DEMOGRAPHICS: 59% of displaced individuals were male and 41% were female. 34% were younger than 18 years old while 3% were over 60 years old.

SHELTER: None of the sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: Only 18 sites meet SPHERE standards of access to over 15 liters of water per person per day. 104 displacement sites (57%) reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: All sites reported having access to food. 98% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Pneumonia was the primary health concern in this round of data collection with 63 sites reporting this.

EDUCATION: In 13% of sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 183 sites. Alternative basic education (ABE) is available at none of the sites.

COMMUNICATION: 68% of sites reported that authorities were IDPs' primary source of information followed by local leaders at 32% of sites.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement. Figure 2 shows IDP numbers disaggregated by cause over time.

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA

ROUND 16: March/April 2019

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

Conflict has consistently been reported as the primary cause of displacement in the region (as indicated by figure 4). IDPs displaced before 2018, during 2018 and in 2019 reported being displaced by conflict. None of the IDPs reported being displaced previously. Furthermore, IDPs from no sites were leaving their current place of displacement.

Regarding the duration of sites, 3% of all sites identified opened in 2019, while 15.3% opened in 2018. 81.7% of sites opened before 2018.

The majority of IDPs identified in the region were displaced to locations near their areas of origin. 7.46% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 7.46% were displaced within their zone of origin.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict	Grand Total
Before 2018	77,246	77,246
During 2018	14,462	14,462
In 2019	2,834	2,834
Grand Total	94,542	94,542

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

ROUND 16: March/April 2019

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

At 97.27% of the sites IDPs foresaw a resolution to their displacement, while IDPs at 2.73% of sites did not.

At 99.45% of sites, IDPs prefer local integration as a durable solution to their displacement while at 0.55% of the sites IDPs prefer return.

Figure 5 shows the number of sites reporting various obstacles to return, while figure 6 shows support IDPs need to return or locally integrate.

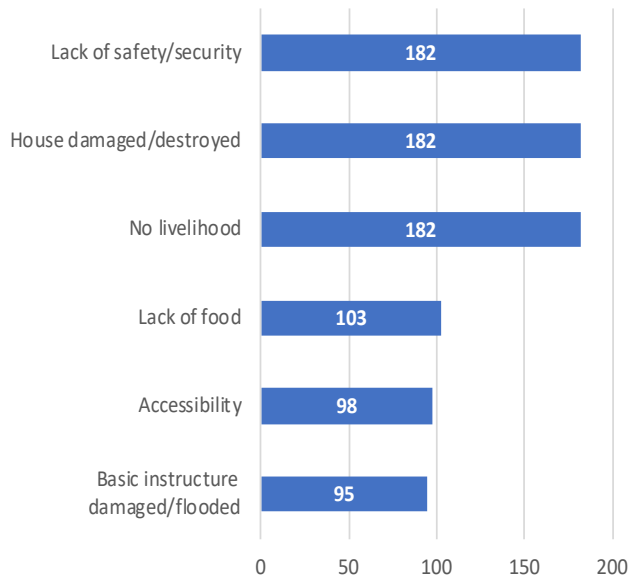

Figure 5: Number of sites by obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

Figure 6: Number of Sites by support needed to return or locally integrate

Figure 7: Demographic breakdown

Vulnerable Population	Number of IDPs
Number of breastfeeding mothers	2,619
Elderly headed households	799
Elderly persons without care givers	690
Number of members of ethnic minorities	0
Number of members of religious minorities	0
Orphaned children	130
Persons with chronic diseases/serious medical conditions	970
Number of persons with disabilities over 18	383
Number of persons with disabilities under 18	130
Number of pregnant girls under 18	1
Number of pregnant women over 18	944
Separated children	131
Single-female headed households	3,555
Single-male headed households	7,012
Unaccompanied children	4
Single-child headed households	134
Grand Total	17,502

DISPLACEMENT TRACKING MATRIX (DTM) TIGRAY REGION, ETHIOPIA

ROUND 16: March/April 2019

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, fourteen rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTMs implementing partner, the Danish Refugee Council (DRC).

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives.

Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.
