

IOM DTM | Mobility Tracking Round 5 Baseline Locations Summary

IOM's Displacement Tracking Matrix (DTM) is pleased to share with you the following summary report.

This summary represents findings for the fifth round of Mobility Tracking, conducted in South Sudan through key-informant based assessments at sub-area and location levels. It quantifies the presence of internally displaced persons (IDPs) and returnees across South Sudan in displacement sites and host communities.

Period: Data collection for Mobility Tracking Round 5 took place during March 2019.

Coverage: 1,973 locations in all 78 Counties across of South Sudan were assessed.

Results:

Number of counties covered	Number of sub area covered	Number of locations	Estimated IDPs (Ind)	Estimated returnees (Ind) Total	% Returnees from within SSD	% Returnees from abroad
78	444	1,973	1,420,189	1,183,683	63%	37%

For the first time in this round, DTM teams succeeded in reaching complete coverage of all counties. In comparison during Round 4 (December 2018 link: [Mobility Tracking Report 4](#)) only 68 out of 78 counties were covered.

In attachment:

1. [Dataset: IOM DTM Mobility Tracking Round 5 Baseline Locations](#)
2. [Map: IDPs by county as of March 2019](#)
3. [Map: Returnees by county as of March 2019](#)
4. [Map: Locations by type as of March 2019](#)

In coming weeks DTM will be releasing more detailed reports and maps on the findings from Round 5.
