

Wau Town features one PoC site and five collective centres in which IOM DTM conducts monthly headcounts to monitor changing population dynamics and displacement trends. In June 2019, the monthly count was conducted in Wau PoC AA site, as well as Cathedral, Nazareth, St. Joseph, Lokoloko and Masna collective centres where a total of 32,449 individuals were identified. Throughout 2018 until February 2019, DTM observed a steady decline of Wau PoC AA site's population. However, between March and May, the population increased due to displacement caused by clashes between pastoralists and farmers in Kuarjena and Rocrocdong, Jur River that broke out in early March 2019. Overall, the population in the assessed Wau displacement sites decreased by 12 per cent (representing 4,476 individuals) since the previous month.

Population by zone and block, Wau PoC AA (June 2019): 17,435 individuals (51% Female)

Wau PoC AA and collective sites by population size, June 2019
