DISPLACEMENT TRACKING MATRIX (DTM) AMHARA REGION ETHIOPIA

ROUND 17: May/June 2019

REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

102,761 displaced individuals comprising 24,040 households in 82 displacement sites were identified in Amhara region. These figures represent an increase of 12,617 individuals (+14%), an increase of 2,601 households (+12.13%), and since round 16 (March/April 2019), an increment of 2 sites (2.50%). 48% of sites opened during 2018 and 12% site opened in 2019. Conflict was the primary cause of displacement for an estimated 99.91% of the displaced population.

DEMOGRAPHICS: 52% of displaced individuals were male and 48% were female. 49% were younger than 18 years old while 3% were over 60 years old.

SHELTER: 6 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: None of the sites meet SPHERE standards of access to over 15 liters of water per person per day. 44 displacement sites (54%) reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 7 sites (9%), representing 1,252 individuals, reported no access to food. 87% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Diarrhea was the primary health concern in this round of data collection with 31 sites reporting this.

EDUCATION: In 17% of sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 53 sites. Alternative basic education (ABE) is available at none of the sites.

COMMUNICATION: 48% of sites reported that Families/Friends were IDPs' primary source of information followed by Mobile Phone at 29% of sites.

Figure 2 shows IDP numbers disaggregated by cause over time.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement.

Figure 1: Trends in stock totals of displacement and new displacements from 2018 and 2019

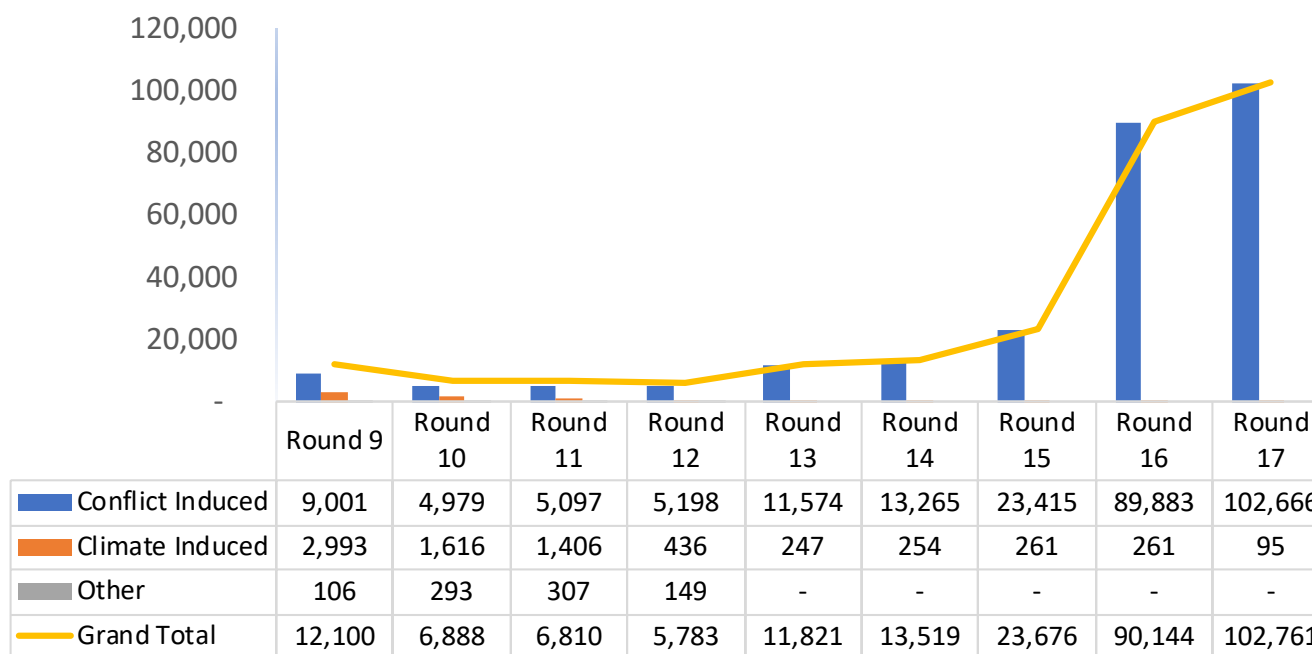

Figure 2: IDPs by cause of displacement by round

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

Conflict has consistently been reported as the primary cause of displacement in the region (as indicated by figure 4). IDPs displaced in 2019, during 2018 and before 2018 reported being displaced. In addition to this, 1,410 of IDPs (1%) reported being displaced previously. Furthermore, IDPs from 33 sites were leaving the current place of displacement. Of these, IDPs from 4 sites were going to the nearest village and IDPs from 15 sites intended to return to their place of origin.

Regarding the duration of sites: 12% of all sites identified opened in 2019 while 48% opened in 2018. 40% of sites opened before 2018.

The majority of IDPs identified in the region were displaced to locations near their areas of origin. 82% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 35% were displaced within their zone of origin.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict	Climate Induced	Grand Total
Before 2018	40,679		40,679
During 2018	49,354	95	49,449
In 2019	12,633		12,633
Grand Total	102,666	95	102,761

ROUND 17: May/June 2019

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

In 37% of the sites, IDPs foresaw a resolution to their displacement, while IDPs at 63% of did not.

At 39% of sites, IDPs prefer local integration as a durable solution to their displacement while 45% sites they prefer return.

Figure 5 shows the number of sites by obstacles to returns, while figure 6 shows support IDPs need to return or locally integrate.

Figure 5: Number of sites by obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

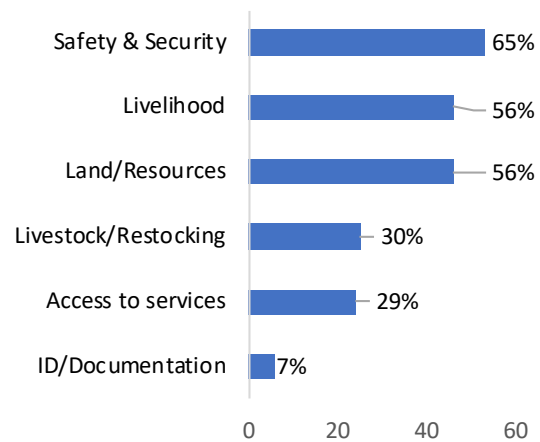

Figure 6: Number of sites by support needed to return or locally integrate

Figure 7: Demographic breakdown

Vulnerable Population	Number of IDPS
Number of breastfeeding mothers	2,193
Elderly headed households	57
Elderly persons without care givers	194
Number of members of ethnic minorities	-
Number of members of religious minorities	62
Orphaned children	39
Persons with chronic diseases/serious medical conditions	478
Number of persons with disabilities over 18	228
Number of persons with disabilities under 18	56
Number of pregnant girls under 18	2
Number of pregnant women over 18	660
Separated children	34
Single-female headed households	2,998
Single-male headed households	759
Unaccompanied children	1
Single-child headed households	60
Grand Total	7,821

DISPLACEMENT TRACKING MATRIX (DTM) AMHARA REGION ETHIOPIA

ROUND 17: May/June 2019

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, 17 rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts.

METHODOLOGY

IOM's DTM team composed of enumerators from IOM were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives.

Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.
