

DISPLACEMENT TRACKING MATRIX

EMERGENCY TRACKING

MOSUL OPERATIONS DATA SNAPSHOT: 16 MARCH 2017

The Emergency Tracking (ET) system is a crisis-based tool that aims at tracking sudden displacement or return movements triggered by specific crises. The ET figures reported on this portal are not cumulative of the all persons affected by the Mosul crisis thus

far, rather the ET update provides only a snapshot of the current displacement situation for the indicated date. The data and information reported on this page are related solely to the displacement caused by the Mosul operations which started on 17 October 2016. IOM IRAQ

WHERE ARE PEOPLE COMING FROM?

WHERE ARE PEOPLE STAYING?

NUMBER OF DISPLACED INDIVIDUALS IDENTIFIED BY EMERGENCY TRACKING SINCE 17 OCTOBER

As of March 15:

- Haj Ali camp reported an overall increase of approximately 233 IDP families;
- Qayyarah airstrip emergency site reported an overall increase of approximately 691 IDP families;
- Further validation allowed to identify approximately 400 IDP families in Hammam al-Alil centre;
- According to field visits and preliminary information provided by key informants, Khazer M2 received approximately 310 IDP families, while Chamakor received approximately 1,000. Data will be adjusted after further verification and compared to the official figures the camp management will provide.

*Emergency tracking numbers are not cumulative. They reflect a snapshot of displacement on the day of reporting. The number of individuals is calculated by multiplying the number of identified families by six, which is the average size of an Iraqi family.

The IOM Iraq Displacement Tracking Matrix (DTM) is the standard data source being used in Iraq to guide the humanitarian response. Emergency tracking for the Mosul operations began identifying people displaced resulting from military actions that began on 17 October.
