

As per the **September 2019 population count, 115,960 individuals (16,938 households) currently live in the site.** Whilst DTM observed a decrease of over 13,000 individuals between January and March 2019, the population has since seen a net increase of over 15,000 (15.5%).* DTM teams access each shelter on a monthly basis when feasible and ask about the number of individuals (divided by sex and age) who slept there during the previous night to get a snapshot of how many individuals reside at the site on the day of assessment.

As of September 2019, 148,769 beneficiaries are registered in the site and have access to services. However, recognizing that there have been significant population changes since the last biometric registration, IOM DTM conducts regular population counts to monitor population dynamics and displacement trends.

Monthly trend in Bentiu PoC, September 2018 – September 2019**

* [Displacement Site Flow Monitoring \(DSFM\)](#) suggests that this increase could in large part be due to new arrivals from Sudan.

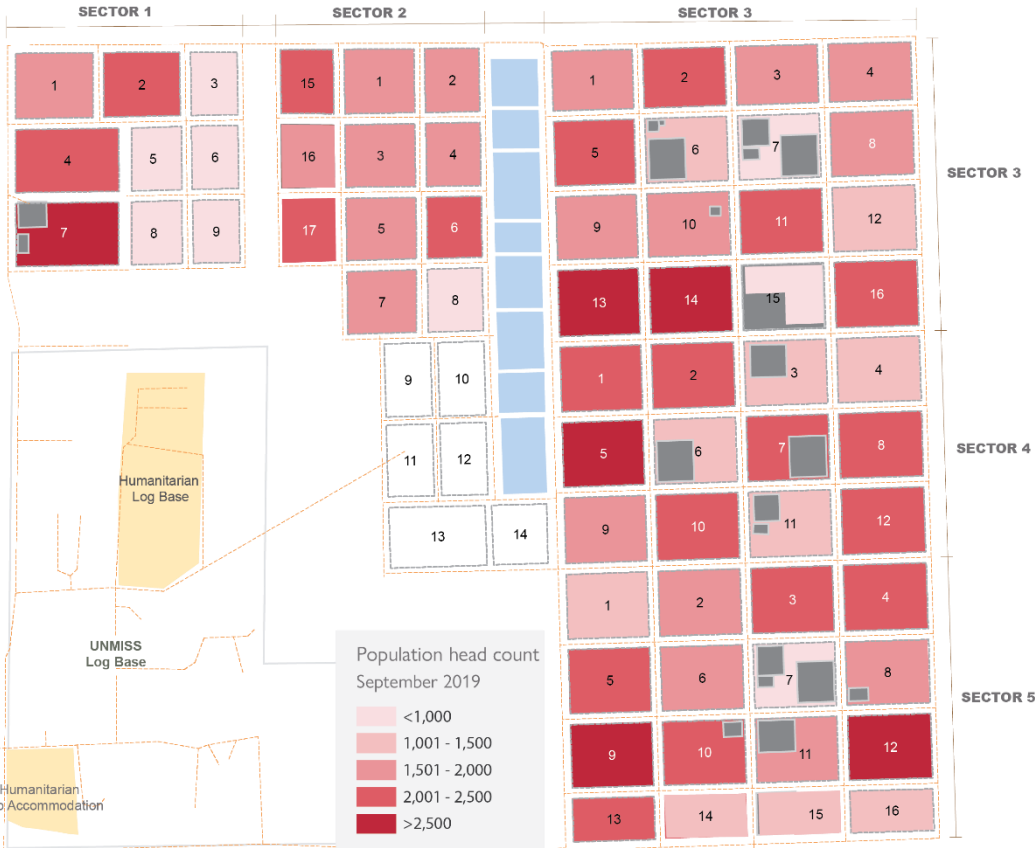

**The months of April, May, June and August, IOM was not able to conduct population counts.

Population in Bentiu PoC (September 2019)

Sector 5, 30,385	Sector 3, 28,404	Sector 4, 23,126	Sector 2, 20,225	Sector 1, 13,820
------------------	------------------	------------------	------------------	------------------

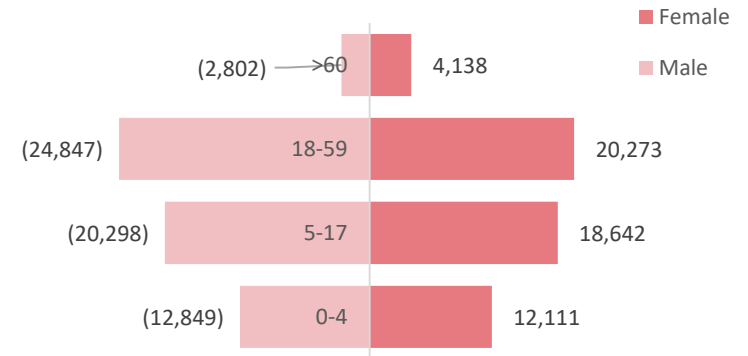

Overall, the population of Bentiu PoC site has seen a net increase of 15.5 per cent since March and a 12.1 per cent increase since July 2019. The most populous sector is Sector 5 with 26 per cent of the overall population, followed for sector 3 (24%) and Sector 4 (20%).
