

BASELINE MOBILITY ASSESSMENT

**NIMROZ
SUMMARY RESULTS
ROUND 7 • OCT – DEC 2018**

In Nimroz province, there is limited availability of educational facilities while needs are high. Children, like these boys and girls, are studying together in an open-air school in Chakansur district. © IOM 2018

ABOUT DTM

The Displacement Tracking Matrix (DTM) is a system that tracks and monitors displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. For more information about DTM in Afghanistan, please visit www.displacement.iom.int/afghanistan.

In Afghanistan, DTM employs the Baseline Mobility Assessment tool, designed to track mobility, determine the population sizes and locations of forcibly displaced people, reasons for displacement, places of origin, displacement locations and times of displacement, including basic demographics, as well as vulnerabilities and priority needs. Data is collected at the settlement level, through key informant interviews, focus group discussions, and direct observations.

DTM enables IOM and its partners to deliver evidence-based, better targeted, mobility-sensitive and sustainable humanitarian assistance, reintegration, community stabilization and development programming.

5 TARGET POPULATIONS

Through the Baseline Mobility Assessments, DTM tracks the locations, population sizes, and cross-sectoral needs of five core target population categories:

- 1. Returnees from Abroad**
Afghans who had fled abroad for at least 6 months and have now returned to Afghanistan
 - 2. Out-Migrants**
Afghans who moved or fled abroad
- Internally Displaced Persons (IDPs), subdivided into the following three categories:
- 3. Fled IDPs**
Afghans from an assessed village who fled as IDPs to reside elsewhere in Afghanistan
 - 4. Arrival IDPs**
IDPs from other locations currently residing in an assessed village
 - 5. Returned IDPs**
Afghans from an assessed village who had fled as IDPs in the past and have now returned home

Data on population sizes for the 5 target population categories is collected by time of displacement, using each of the following time frames: 2012-2015 • 2016 • 2017 • 2018.

HIGHLIGHTS

-  **5** districts assessed
-  **287** settlements assessed
-  **2,033** key informants interviewed
-  **39,643** returnees from abroad [2012-2018]
-  **72,808** IDPs [2012–2018] currently in host communities
-  **17,344** former IDPs have returned to their homes [2012–2018]
-  **21,462** out-migrants fled abroad [2012–2018]
-  **28** out-migrants fled to Europe (0.1% of out-migrants)
-  **97** returnees and IDPs live in tents or in the open air
-  **1 in 5** 23% of all key informants were females – Nimroz had the largest number of female key informants nationwide
-  **2 in 5** persons in Nimroz are either IDPs or Returnees (39%)
-  **2 in 3** 66% of all returnees and IDPs reside in Zaranj district
-  **1 in 4** families in Zaranj District have no access to schools.
-  **43,295** individuals have no access to water
-  **11,872** individuals in Khashrod District have no access to health services
-  **11,893** individuals in Zaranj District have no access to markets

Displaced Individuals in all 5 Target Populations | Summary Overview by District

District	*Base Population	Total Inflow (Returnees + Arrival IDPs)	% of Pop.	Returnees	% of Pop.	Fled IDPs	% of Pop.	Arrival IDPs	% of Pop.	Returned IDPs	% of Pop.	Out Migrants	% of Pop.

The DTM team analysed that Water, Sanitation and Hygiene (WASH) and livelihood support are the main priority needs in Zaranj district. As shown in the picture above, crops are fed by the irrigation channel water but the same unsafe water is also absorbed by the nearby well — which is used by people as drinking water. © IOM 2018

KEY INFORMANTS

The overall objective of DTM's Baseline Mobility Assessment in Afghanistan is to track mobility and displacement, provide population estimates, locations and geographic distribution of displaced, return and migrant populations, as well as refugees, nomads, cross-border tribal groups, and both domestic and international labour migrants. DTM captures additional mobility information, including reasons for displacement and return, places of origin and destination, times of displacement and return, secondary displacements, and population demographics, vulnerabilities and multi-sectoral needs.

DTM predominantly employs enumerators who originate from the areas of assessment. Enumerators collect quantitative data at the settlement level, through focus group discussions with key informants (KIs). Through direct observations, enumerators also collect qualitative data on living conditions, basic services, and security and socio-economic situation.

Due to security risks, enumerators cannot carry smart-phones or tablets in the field, therefore they collect data, daily, using a paper-based form, which is pre-filled with data from the previous round for verification of existing data and to expedite the assessment process. Completed forms are submitted weekly to the provincial DTM office and verified for accuracy by the team leader and data entry clerk. Once verified, the data is entered electronically via mobile devices, using KoBo forms, and submitted directly into DTM's central SQL server in Kabul, where it is systematically cleaned and verified daily, through automated and manual systems. This stringent review process ensures that DTM data is of the highest quality, accuracy and integrity.

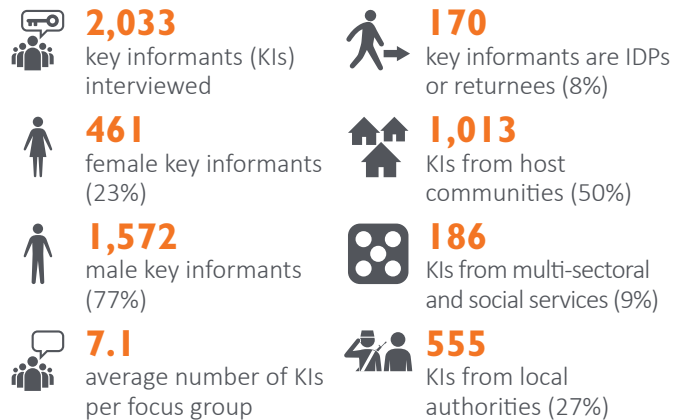

When DTM assesses a province for the first time, enumerators collect data through two rounds of two-layered assessments:

1. District-level assessment (B1): this assessment aims to identify settlements with high inflows and outflows of Afghan nationals and provide estimated numbers of each target population category.
2. Settlement-level assessment (B2): based on the results of B1, this assessment collects information on inflows and outflows of each target population category at each settlement (village), identified through B1. Additional villages are also identified and assessed, based on referrals from KIs.

Since DTM has now assessed all 34 provinces, only settlement-level assessments will be conducted in the future. Pending continued funding, DTM aims to conduct baseline mobility assessments, nationwide, twice per year.

DTM's field enumerators collect data at the settlement level, predominantly through focus group discussions with key informants. While assessing communities, enumerators also observe the living conditions and availability of multi-sectoral services. In the rare case that DTM's District Focal Points cannot physically reach a community, due to insecurity, conflict, or risk of retaliation, DFPs meet the focus groups at safe locations outside their communities or conduct the assessments by phone.

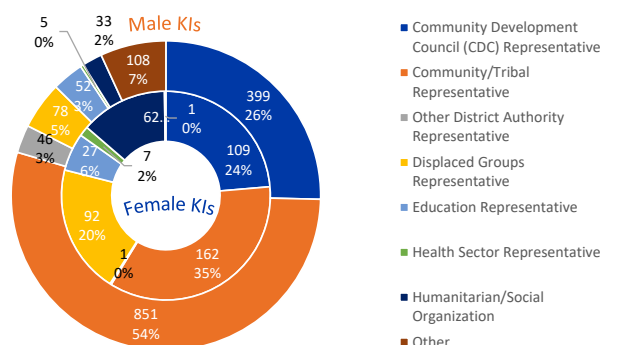

By actively recruiting more female enumerators, though challenging, DTM has made significant strides to improve gender inclusion in focus group discussions, although there is much room for improvement. In Nimroz, DTM was able to have women represent 23% of the female key informants, which is major achievement given that the national average is 4%.

Key Informants by Type and Sex | Nimroz

RETURNNEES

Returnees are Afghan nationals who have returned to Afghanistan in the assessed location after having spent at least six months abroad. This group includes both documented returnees (Afghans who were registered refugees in host countries and then requested voluntary return with UNHCR and relevant national authorities) and undocumented returnees (Afghans who did not request voluntary return with UNHCR, but rather returned spontaneously from host countries, irrespective of whether or not they were registered refugees with UNHCR and relevant national authorities).

The number of returnees from abroad to Nimroz decreased by 52% in 2016 compared to the period between 2012 and 2015. In 2017, this trend continued with a minor decrease of 5% and a more significant decrease of 70% in 2018.

39,643
returnees from abroad

3,094
returned from Pakistan (7.8%)

30,325
undocumented returnees from Pakistan + Iran (77%)

36,526
returned from Iran (92.1%)

+ ►► **TOTAL INFLOW** [RETURNEES + ARRIVAL IDPs]

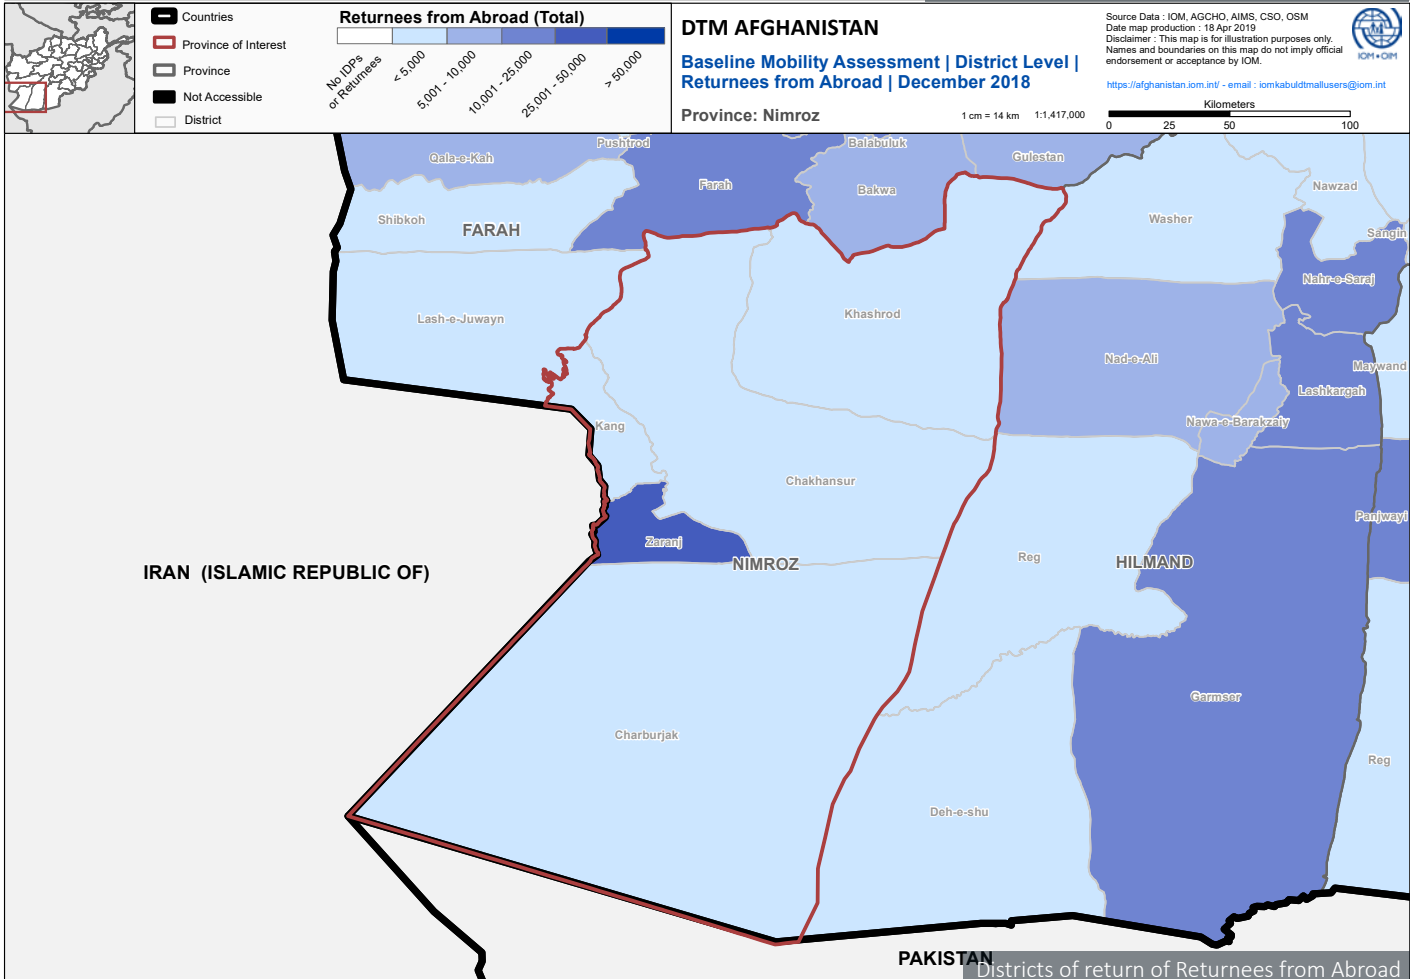

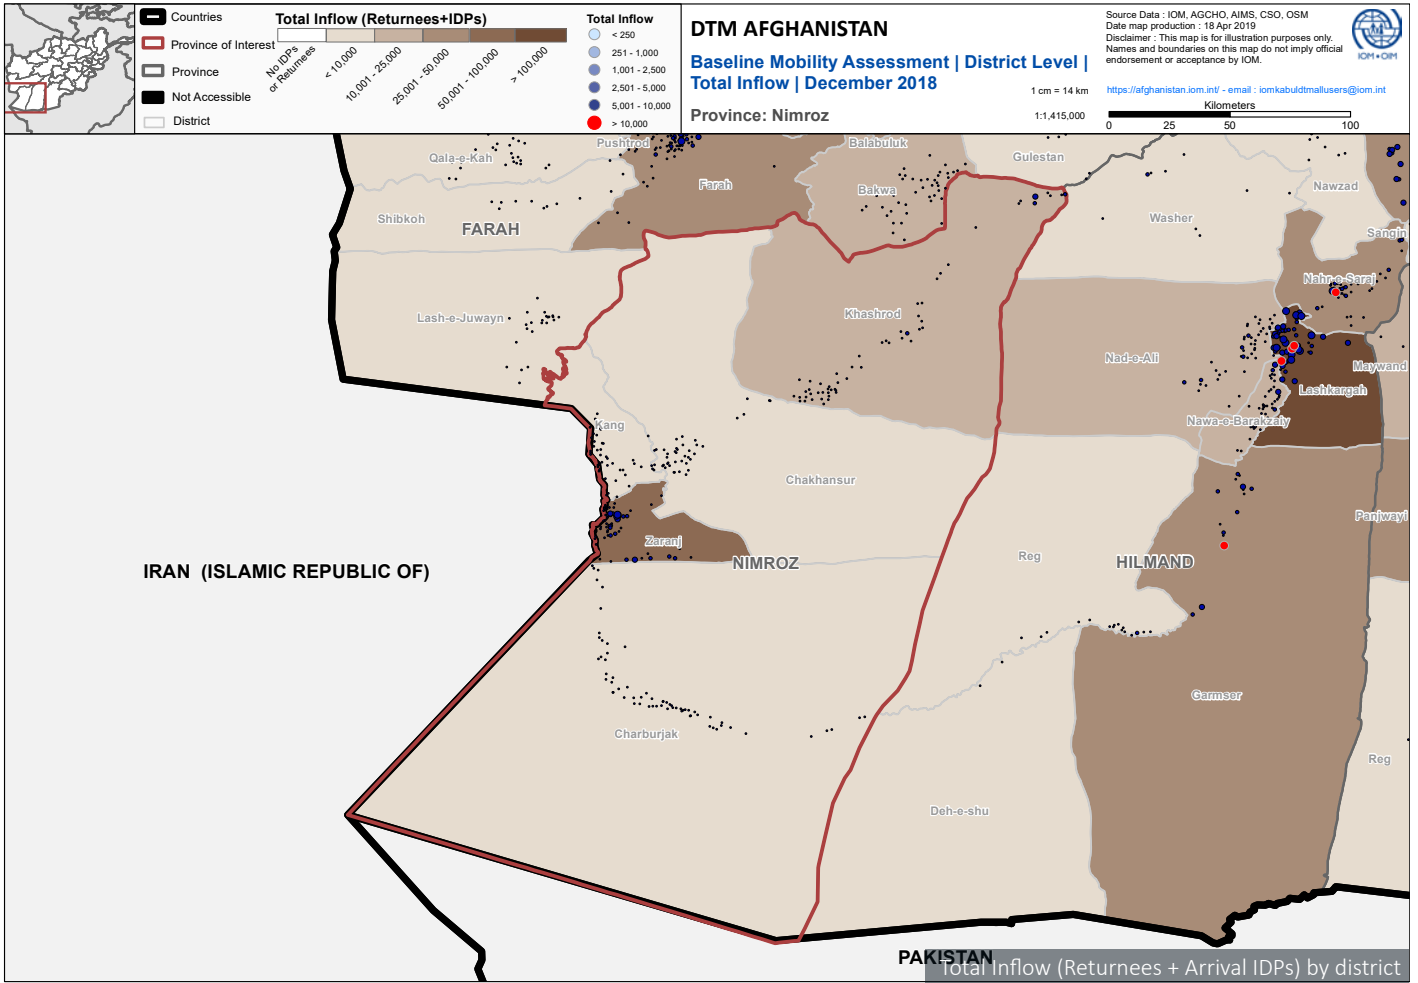

Total Inflow (Returnees + IDPs) | Summary by District

District	Returnees	Arrival IDPs	Total Inflow
Zaranj	25,998	47,879	73,877
Khashrod	3,794	18,381	22,175
Kang	3,584	2,645	6,229
Chakhansur	4,004	1,974	5,978
Charburjak	2,263	1,929	4,192
Grand Total	39,643	72,808	112,451

Overall, Nimroz province hosts a total inflow of 112,451 returnees and IDPs, of which 35% (39,643) are returnees and 65% (72,808) are IDPs. The table below shows the 20 settlements in Nimroz that are most affected by this influx. These 20 settlements (7% of the 287 settlements assessed in Nimroz) host 45% of the province’s returnees and IDPs. These communities are especially fragile and susceptible to social instability induced by this large influx and the subsequent competition for limited, already overstretched resources and job opportunities. 16 of the 20 most affected settlements are in Zaranj district, which have 80% (39,949) of the returnees and IDPs from this group.

Rank	Settlement	District	Individuals
1	Noorani	Zaranj	8,175
2	Spin Kalay	Khashrod	4,300
3	Haider Abad	Zaranj	4,140
4	Haji Ghafor Narvi	Zaranj	3,035
5	Haji Momin	Zaranj	2,974
6	Sultan Wais	Zaranj	2,551
7	Dorayee	Khashrod	2,469
8	Gulistan	Zaranj	2,304

SECTORAL NEEDS

TOP 5 DISTRICTS

Evidence-based prioritization is essential to the delivery of better targeted assistance and basic services. DTM provides partners with lists of priority areas in most need of assistance, based on a variety of sectoral indicators, at Province, District and Settlement levels.

(NOTE: The number of individuals reported below is based on the Total Inflow: IDPs + Returnees)

TOP 5 Districts with the most Returnees and IDPs (Returnees + IDPs)

Rank	District	Individuals
1	Zaranj	73,877
2	Khashrod	22,175
3	Kang	6,229
4	Chakhansur	5,978
5	Charburjak	4,192

STORIES FROM THE DISPLACED

A Single Mother of Two in Need of Help

Maryam is the mother of two, a boy and a girl, and is from Nimroz province. In 2010, she moved to Iran with her children and husband in search of a better life. Tragically, two years later, her husband died in a tragic car accident in Iran.

After she lost her husband, Maryam's life in Iran became very difficult. She therefore decided to move back to her home village in Chakansur district, Nimroz province.

She sold her house and belongings to have enough money to make the trip back home. She and her family were among the 4,004 returnees from abroad to return to Chakansur district. When she first returned to her village, she was receiving assistance from her brother. However, over time, her brother's financial troubles prevented him from further assisting Maryam.

She had to turn to her neighbours, who gave her money in order to purchase basic items such as food and clothing. However, this year, due to a lack of water for farming as a result of the drought, her neighbours cannot support themselves let alone support Maryam. Currently, she is living in very poor conditions and is asking for assistance to help her and her children survive.

**Please note that the names have changed and village locations have been kept anonymous to protect the identity of the interviewee.*

With no source of income, Maryam, like many other returnees and IDPs, is desperately waiting for assistance to support her children. © IOM 2018
