OIM (2019). DTM Hurricane Dorian, The Bahamas. Round 2: Children-only Collective Sites Hosting Evacuees.

As part of the Hurricane Dorian emergency response coordinated by NEMA and its partners, the International Organization for Migration (IOM) presents the Site Profiles Report for Children-only Collective Sites Hosting Evacuees on the Island of New Providence, The Bahamas. This document is part of a series of ongoing efforts conducted by IOM in close coordination with the Protection Working Group (PWG) to inform service providers and humanitarian actors on main needs while reducing survey fatigue of key informants by streamlining assessment activities.

Before Hurricane Dorian, the collective sites presented in this report provided essential services to children under the care of the state. After the hurricane, the sites started receiving evacuees and currently house over 40 affected children, mostly from Grand Bahama. IOM in close coordination with the PWG commends the managers, staff, volunteers and donors of the Ranfurly Homes for Children, the Children's Emergency Hostel and the Nazareth Centre for their dedication to the children and support in providing information for this report.

Lastly, IOM in coordination with the PWG advises to include the entire population in these collective sites as beneficiaries to ensure adherence to the protection principle, as outlined in the Humanitarian Charter, to "Ensure people's access to assistance according to need and without discrimination."

General Objective:

Provide information on population and main needs of Children-only Collective Sites Hosting Evacuees affected by Dorian Hurricane in the Island of New Providence.

Specific Objectives:

1. Streamline relevant and timely information for all humanitarian partners involved in the emergency response.
2. Identify main gaps or needs by sector to support response coordination.

Methodology:

Instrument: semi-structured questionnaire with categorical variables developed in coordination with the protection working group partners.

Data Collection: key informant interviews (collective center managers and/or staff) complemented by field visits and observation.

Reference period: 2-3 October 2019.

KEY FACTS AND FIGURES

46

EVACUEES IN CHILDREN-ONLY COLLECTIVE SITES

33
FEMALE

13
MALE

This group represents **31%** OF THE TOTAL POPULATION ON-SITES

VULNERABLE GROUPS

4

Evacuees with physical disabilities

1

Evacuees with mental disabilities

7

Evacuees with potential chronic illnesses

EDUCATION

- Children in these sites have **ACCESS TO EDUCATION SERVICES** both formal (off-premises) and informal (in the premises).
- **MOST OF THE CHILDREN (>75%)** attend local schools.

MAIN NEEDS

Key informants in 2 out of 3 sites reported **soap** as one of the **most frequent needs** for its population.

Key informants in 2 out of 3 sites reported **clothing and blankets** as one of the **most frequent needs** for its population.

Key informants of one site reported specific needs on **medicines and medical equipment** for several health problems (e.g.: heart problems, hypertension, etc.)

HEALTH

All of the sites have **access to regular medicines and health facilities**. However, in one of them, access to health is off-site.

Reported health problems include: hypertension, diabetes, cerebral palsy, seizure disorder, scoliosis, asthma, chest pain, etc.

INSIGHTS

Most of evacuated children in these sites arrived from Grand Bahama on 7 September.

There is no information on potential relocation of evacuated children.

SITE PROFILE

CHILDREN'S EMERGENCY HOSTEL

The Children Emergency Hostel was founded in 1962 and houses children between 1 and 12 years old. It is currently managed by The Children's Emergency Hostel, a Non-Profit Organization (<https://www.facebook.com/pg/Bahamas-Childrens-Emergency-Hostel-214776449980/about/>).

15
EVACUEES IN THIS COLLECTIVE CENTER

8 FEMALE
7 MALE

*This represents 28% of the total population on-site, which is 53.

Shelter management agency: ORGANIZATION "CHILDREN'S EMERGENCY HOSTEL" (LOCAL NGO)

Registration **Activities** ARE CONDUCTED ON-SITE

Service providers information IS AVAILABLE THROUGH A CONTACT LIST ON-SITE

MAIN NEEDS OF THE SITE

SHELTER AND SETTLEMENT

Small repairs and renovations are needed.

PROTECTION

Site not included in the emergency response as regular recipient of humanitarian assistance.

WATER, SANITATION AND HYGIENE

Water coolers, bottled water and soap are needed.

HEALTH

The main reported need was counseling and specialised services to support mental health and psychosocial well-being.

PROTECTION, NFI AND WASH
