Unity State Event Tracking Report
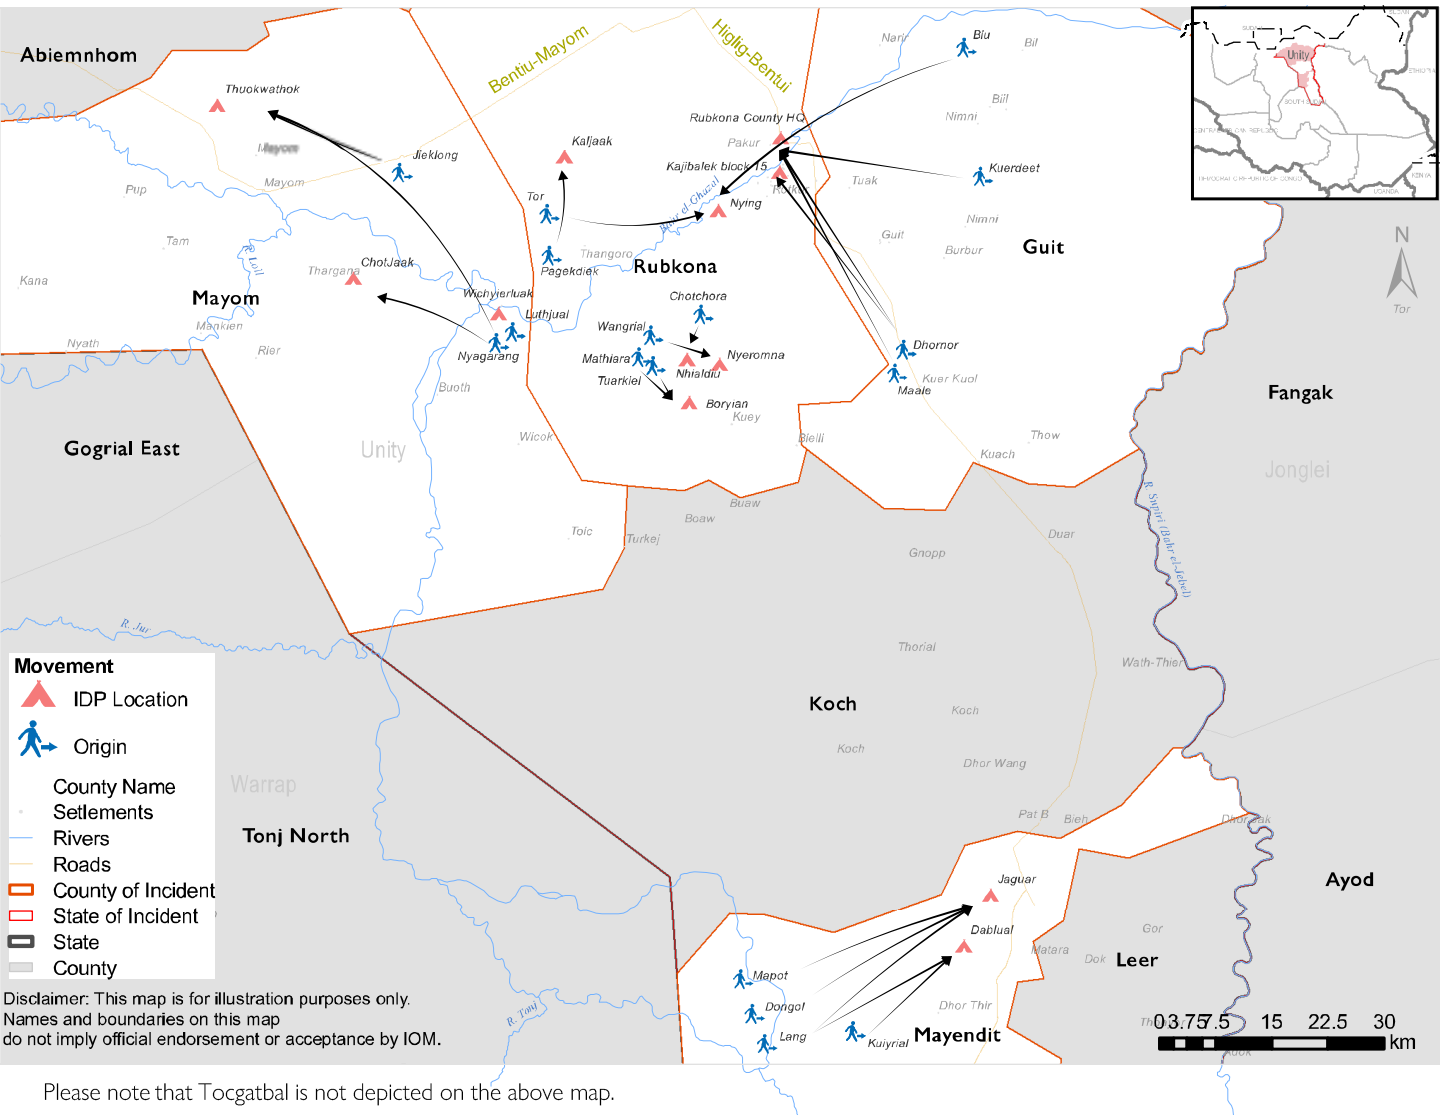

Publication date: 29 May 2020

Mayom, Rubkona & Mayendit County, Unity State

IOM's Displacement Tracking Matrix (DTM) conducted an Emergency Event Tracking through interviews with key informants and direct observations in order to gather information on locations of displacement, key needs, and demographic profiles of displaced households affected by clashes between cattle-keeping communities and youth groups across Mayom, Rubkona, Guit, and Mayendit counties. Interviews from key informants have collectively confirmed the arrival of 6,363 IDPs (1,008 households) now displaced across 12 locations in the three counties assessed between 12 and 19 May 2020.

IDPs have found refuge among host communities in the counties of Mayom, Rubkona, and Mayendit as well as collective centres and sites in Rubkona. According to statements shared by affected communities displaced, households have the intention to return to their habitual residence within 3 months should the security situation stabilize. Most urgent needs identified during assessments were food, shelter, non-food items (NFI), health, sanitation, and protection.

IOM DTM employs Event Tracking as a more rapid and localized assessment tool complementing overall efforts to report on IDP and returnee figures nationally (see Mobility Tracking round 7 reports and maps on displacement.iom.int/south-sudan). IOM teams access IDP / returnee locations and consult local key informants including community representatives, local authorities or humanitarian partners and triangulate findings to provide partners with the most accurate as possible, actionable and current data.
