

IOM's Displacement Tracking Matrix (DTM) continued operating Displacement Site Flow Monitoring (DSFM) at the main entry and exit points of Naivasha IDP camp. During this period, 2,160 interviews were conducted representing 9,279 individual movements in to and out of the camp. There has been a 13.0 per cent increase in surveyed day movements in this quarter. These usually take place for livelihood activities (43.0%), education (8.0%), and food distribution on-site (6.0%), while the few longer temporary movements were primarily to visit friends or family and to access healthcare services. The number of surveyed new arrivals, most of whom intend to stay for more than six months, decreased to 11 individuals compared to 21 in the previous quarter. Most of these movements were for family reasons (91.0%). Surveyed permanent exits also decreased from 71 to 57 individuals, almost all of whom traveled because of improved circumstances in areas of return.

Methodology: Displacement Site Flow Monitoring (DSFM) involves interviewing a cross-section of persons passing through the site's entry and exit points. DTM aims to understand mobility dynamics and reasons underpinning movement in and out of the site to provide partners with a better understanding of same day movement, temporary travel, new entry and permanent exit. Interviews are conducted seven days a week from 8 a.m. to 5 p.m. DSFM provides indicative traveller profiles rather than comprehensive or representative estimates.

March Population Count

8,603 ind. (2,372 households)

 4,196 (48%) Male

 4,407 (52%) Female

Same Day Travel n = 9,205

Most common reason:  Collect elephant grass

Top reasons for same day movement

Reasons continued: Collect firewood (5%), to buy things (3%), other livelihood activity (1%), visit friends / family (1%), and other (24%)

Temporary Travel n = 6

Most common reason:  Visit friends/ family

Top reasons for temporary movement

No other reasons were recorded.

New Arrivals n = 11

Main reason for movement in to the site:  To be with family

Top reasons for new movement

No other reasons were recorded.

Permanent Exits n = 57

Main reason for movement out of the site:  Life is now better in destination

Top reasons for permanent exit

No other reasons were recorded.

Daily gate count

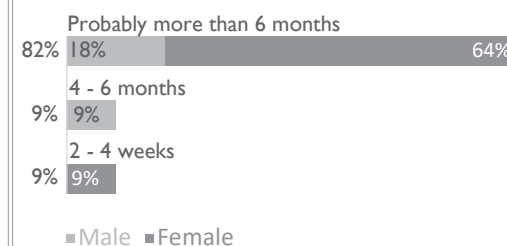

During the outbreak of COVID-19, DTM conducted daily gate counts for individual movements in and out of Naivasha IDP camp. Daily average movement from January to March 2021 are as indicated in the table below.

Month	Entry Average	Exit Average	Net Flow
January	3,714	3,996	-282
February	4,376	4,278	+78
March	4,596	4,237	+359

Intended period of stay / time spent away

Intended period of stay at the site

Nature & top destinations of permanent exit

Nature of Destination	% of permanent exit	Main location by nature of destination
Former home	81%	Wau
New home, different area	19%	Wau
Former area but new home	-	-
Other Displacement site	-	-

¹Disclaimer: [Rounding] Percentages may not add up to 100% as a result of rounding error.

Movement Dynamics

Return from temporary travel n = 6

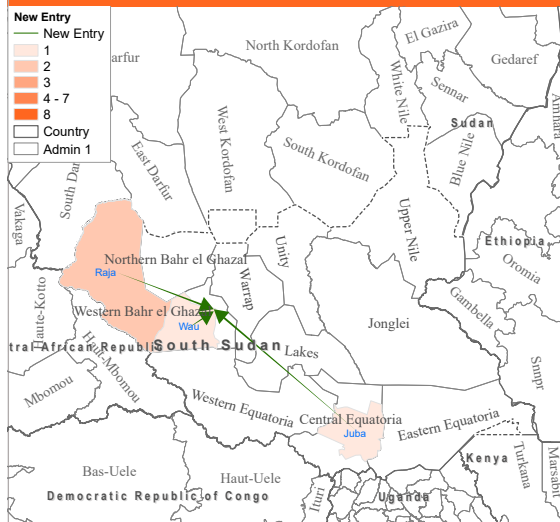

Counties of origin

Jur River	50%
Wau	50%

Embarking on temporary journey n = 0

The maps above do not include same-day travel, which tends to be limited to the immediate surroundings of the site.

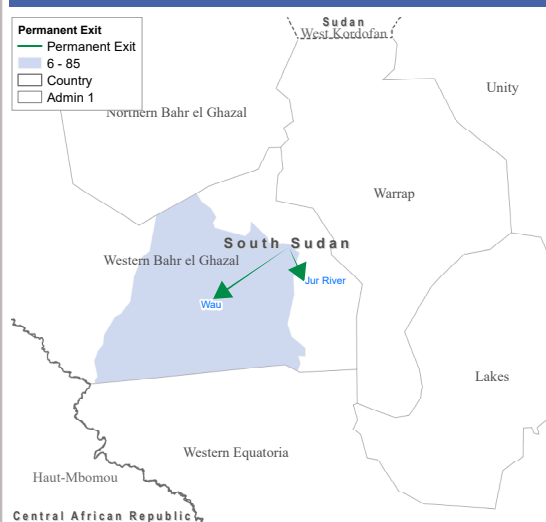

New arrivals n = 11

Counties of origin

Raja	82%
Wau	9%
Juba	9%

Permanent exit n = 57

Counties of intended destinations

Wau	84%
Jur River	16%
