IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements in terms of numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 22 and 28 August 2021, IOM Yemen DTM tracked 170 households (HH) (1,020 individuals) displaced at least once.
