IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 15 and 21 May 2022, IOM Yemen DTM tracked 95 households (HH) (570 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 82 per cent (78 HHs) of the total, followed by economic reasons related to conflict, accounting for 18 per cent (17 HHs).

Between 1 January and 21 May 2022, IOM Yemen DTM tracked a cumulative 5,939 households (35,634 individuals) that experienced displacement at least once. Since the beginning of the year, the number of tracked new instances of displacement has been declining steadily.
