0 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 24 July and 30 July 2022, IOM Yemen DTM tracked 211 households (1,266 individuals)<sup>2</sup> who experienced displacement at least once.

Neutral disaster concerns as a result of the heavy rains and floods were the main reason for displacement accounting for 58 per cent (123 HHs) of the total, accounting for 32 per cent (67 HHs) displaced due to the ongoing conflict, and followed by economic reasons related to conflict, accounting for 10 per cent (21 HHs).

Between 1 January to 30 July 2022, IOM Yemen DTM tracked 7,583 households (HH)<sup>3</sup> (45,498 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern.
