## IOM YEMEN DTM RAPID DISPLACEMENT TRACKING

YEMEN IDP DASHBOARD | REPORTING PERIOD: 13 TO 19 NOVEMBER 2022

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 13 and 19 November 2022, IOM Yemen DTM tracked 125 households (750 individuals)<sup>2</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 95 per cent (119 HHs) of the total and followed by economic reasons related to conflict, accounting for five per cent (6 HHs).

From 1 January to 19 November 2022, IOM Yemen DTM tracked 9,497 households (HH)<sup>3</sup> (56,982 Individuals) who experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining in an irregular pattern mainly from mid-August 2022.
