IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 9 and 15 April 2023, IOM Yemen DTM tracked 103 households (618 individuals)<sup>2</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 88 per cent (91 HHs) of the total followed by economic reasons related to conflict, accounting for 12 per cent (12 HHs).

From 1 January to 15 April 2023, IOM Yemen DTM tracked 2,941 households (HH)<sup>3</sup> (17,646 Individuals) who experienced displacement at least once.

IOM DTM also recorded 61 returnee households in the governorates of Shabwah (56 HHs) and Ma'rib (6 HHs) returning to their locations of origin during the reporting period.
