IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 16 and 29 April 2023, IOM Yemen DTM tracked 75 households (450 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 72 per cent (54 HHs) of the total followed by economic reasons related to conflict, accounting for 28 per cent (21 HHs).

From 1 January to 29 April 2023, IOM Yemen DTM tracked 3,035 households (HH)³ (18,210 Individuals) who experienced displacement at least once.

IOM DTM also recorded six returnee households in Ma'rib governorate returning to their locations of origin during the reporting period.
