IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 24 and 30 September 2023, IOM Yemen DTM tracked 49 households (HHs) (294 individuals)² who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 78 per cent (38 HHs) of the total followed by economic reasons related to conflict, accounting for 22 per cent (11 HHs).

From 1 January to 30 September 2023, IOM Yemen DTM tracked 4,600 households³ (27,600 Individuals) who experienced displacement at least once.

IOM DTM also recorded three returnee households in the governorate of Ma'rib returning to their locations of origin during the reporting period.
