IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 31 March and 6 April 2024, IOM Yemen DTM tracked 34 households (HHs) (204 individuals)<sup>2</sup> who experienced displacement at least once.

Economic reasons related to the conflict were the main reason for displacement, accounting for 76 per cent (26 HHs) of the total followed by safety and security reasons as a result of the conflict, accounting for 24 per cent (8 HHs).

From 1 January to 6 April 2024, IOM Yemen DTM tracked 947 households<sup>3</sup> (5,682 Individuals) who experienced displacement at least once.

IOM DTM also recorded five returnee households in the governorate of Ma'rib returning to their locations of origin during the reporting period.
