IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>2</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks IDP returnees who returned to their location of habitual residence.

Between 26 May and 1 June 2024, IOM Yemen DTM tracked 57 households (HHs) (342 individuals)<sup>3</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 51 per cent (29 HHs) of the total followed by economic reasons related to conflict, accounting for 47 per cent (27 HHs), and natural hazard, accounting for two per cent (1 HH).

From 1 January to 1 June 2024, IOM Yemen DTM tracked 1,465 households (8,790 Individuals) who experienced displacement at least once.

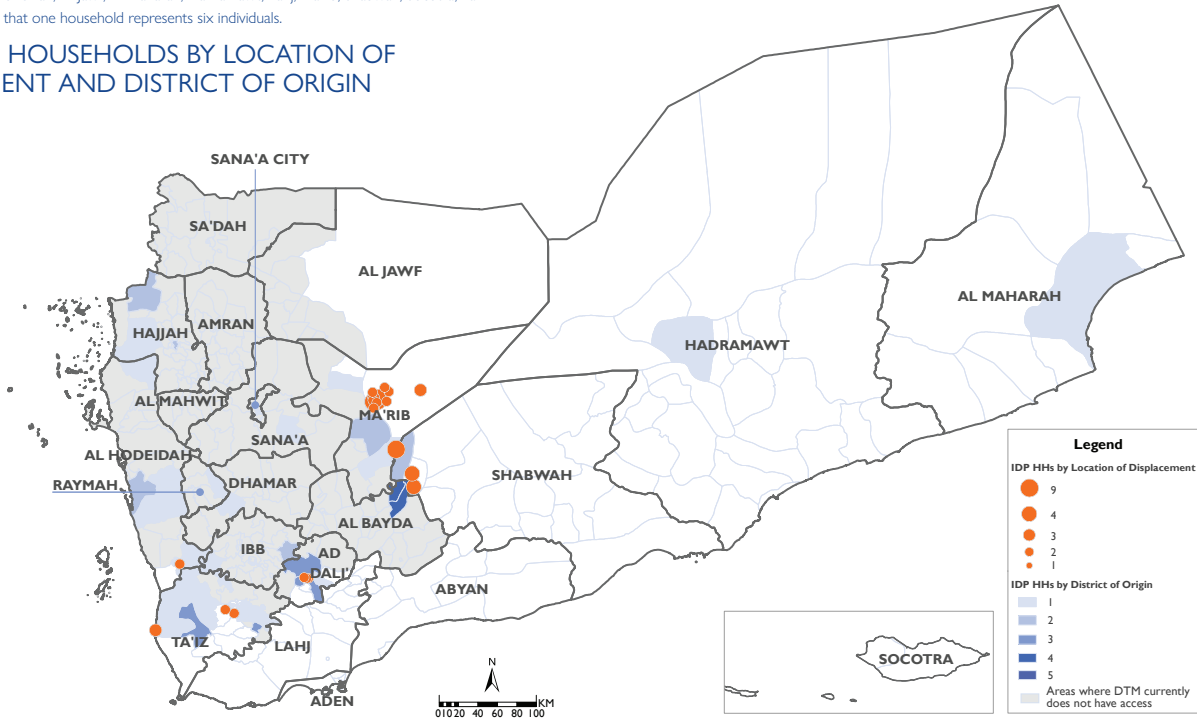

IOM DTM also recorded 25 returnee households in the governorate of Ta'iz returning to their locations of origin during the reporting period.
