

HIGHLIGHTS

South Sudan is currently facing a complex humanitarian crisis characterized by extensive internal displacement. This situation is driven by a variety of factors, including communal conflicts, land disputes, insecurity, violence, natural disasters, and cross-border movements. Each of these elements contributes to ongoing instability and increased vulnerabilities experienced by the population.

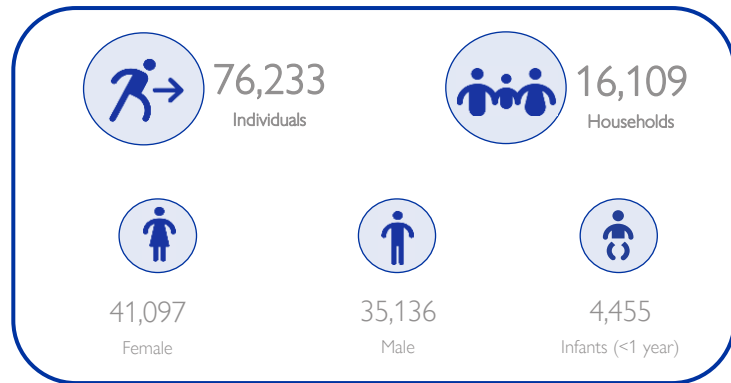

Between 16 and 31 August 2024, the Displacement Tracking Matrix (DTM) recorded significant displacement events affecting a total of 76,233 individuals. The majority of these displacements occurred in Upper Nile state, where 39,736 individuals were affected in Renk County. Additionally, Jonglei state experienced the displacement of 10,816 individuals in Fangak and Pochalla counties, while Northern Bahr el Ghazal recorded 8,160 displaced persons in Aweil West and Aweil North counties. Information from key informants revealed that these displacements were primarily due to disasters associated with flooding.

The consequences of these displacements have led to an urgent need for humanitarian assistance among the affected populations. Those who have been displaced have identified their most pressing requirements as food, non-food items, and shelter. These priorities underscore the critical need for immediate humanitarian intervention to address the basic survival needs of those impacted by this crisis.

MAP - DISPLACEMENT

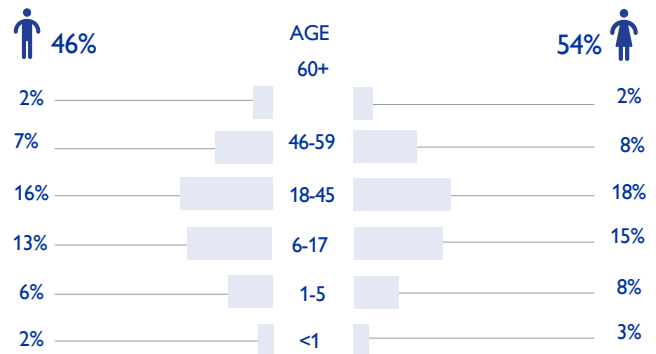

KEY DISPLACEMENT FIGURES

IDP FIGURES

COUNTY	MALE	FEMALE	TOTAL	TRIGGER
Renk	18,218	21,518	39,736	Disaster (Flooding)
Fangak	3,382	3,888	7,270	Disaster (Flooding)
Terekeka	3,240	3,716	6,956	Disaster (Flooding)
Tonj East	2,871	3,594	6,465	Disaster (Flooding)
Aweil West	2,274	2,551	4,825	Disaster (Flooding)
Pochalla	1,631	1,915	3,546	Disaster (Flooding)
Aweil North	1,509	1,826	3,335	Disaster (Flooding)
Jur River	1,248	1,202	2,450	Disaster (Flooding)
Abyei AA	763	887	1,650	Disaster (Flooding)
Total	35,136	41,097	76,233

TOP THREE PRIORITY NEEDS RANKED

Perceptions of current needs are linked to key informant insights, highlighting and prioritizing immediate challenges or gaps in this specific context.

METHODOLOGY AND CONTEXT

The Event Tracking tool is a rapid displacement tracking system that collects data on over 50 households' movements through assessments by DTM staff and local enumerators. Information is gathered via direct visits or interviews with key informants, cross-referenced with secondary sources for accuracy. The data reflects the situation at the time of assessment, and while efforts are made to ensure accuracy, the comprehensive coverage nationwide cannot be guaranteed by the International Organization for Migration (IOM).
