LIBYA'S MIGRANT REPORT

ROUND 19

APRIL 2018

DISPLACEMENT TRACKING MATRIX

Funded by the European Union the Displacement Tracking Matrix (DTM) in Libya tracks and monitors population movements in order to collate, analyze and share information packages on Libya's populations on the move. DTM is designed to support the humanitarian community with demographic baselines needed to coordinate evidence-based interventions. DTM's Flow Monitoring and Mobility Tracking package includes analytical reports, datasets, maps, interactive dashboards and websites on the numbers, demographics, locations of origin, displacement and movement patterns, and primary needs of mobile populations. For all DTM reports, datasets, static and interactive maps and interactive dashboard please visit www.globaldtm.info/libya/

FLOW MONITORING MIGRANT REPORT

DTM's Flow Monitoring Migrant Report presents four sets of data delivering a comprehensive overview on the number, nationalities and locations where migrants are present in Libya, the recently observed flows and routes used by Libya's migrant community and the latest reports of incidents at sea. As described in the methodology, this report is based on DTM Libya's revised 2018 methodology aimed at increasing the programmes ability to identify a greater number of migrants currently in Libya, increase data credibility criteria and deliver more accessible and user-friendly reports.

MIGRANT DISTRIBUTION PER MANTIKA

MIGRANT BASELINE

The 19th round of data collection took place in April 2018. IOM identified 690,351 migrants in Libya. Migrants were identified in all the baladiyas, within 550 muhallas and originated from more than 41 countries.

As displayed in the maps on page 6-7, out of the total number of migrants identified, 645,659 individuals (94%) originate from 32 different African countries with 44,232 individuals (6%) from 9 Asian and Middle Eastern countries. The remaining 460 individuals were recorded with unknown/other country of origin.

The top 5 nationalities identified were Nigerien, Egyptian, Chadian, Sudanese and Ghanaian, together these nationalities account for up to 65% of Libya's migrant population.

Out of the 645,659 individuals from Africa, 447,086 (69%) originate from Sub-Saharan countries and 198,573 individuals (31%) from North African countries.

Two-thirds of both African and Asian migrants were identified in Libya's western mantikas, with the highest concentration in Tripoli and surrounding areas. Other identified African migrants were split between East and South (20% and 16% respectively), while the remaining Asian migrants were identified largely in the East (33% in the East, 1% in the South).

MIGRANT ROUTES

The map on page 9 presents the routes taken by migrants who departed from Nigeria, Mali, Burkina Faso, Bangladesh, Ghana and Cameroon to reach Libya.

Data used to create this map was collected through Flow Monitoring profile surveys conducted with migrants in Libya in April 2018.

NIGERIA

All the migrants who departed Nigeria and indicated the routes they took to reach Libya reported travelling through Niger.

MALI

39% of migrants departing Mali reported entering Libya through Niger and 35% entered directly through Algeria. The remaining 26% travelled through Burkina-Faso and then Niger to reach Libya.

BURKINA-FASO

The routes taken by migrants departing Burkina-Faso and travelling with group was different from the route taken by those who travelled alone.

94% of the surveyed migrants who departed Burkina Faso - who disclosed the routes taken - reported travelling to Libya with a group; 87% travelled directly via Niger and 7% reported crossing Mali and Niger to reach Libya.

The remaining 6% reported travelling alone to Libya and they chose a different route, they travelled primarily to Mali and then to Algeria before entering Libya.

BANGLADESH

92% of Bangladeshi nationals surveyed reported traveling directly to Libya by plane. 6% travelled to Egypt first and then onwards to Libya. The remaining 2% travelled to Sudan and then to Libya.

GHANA

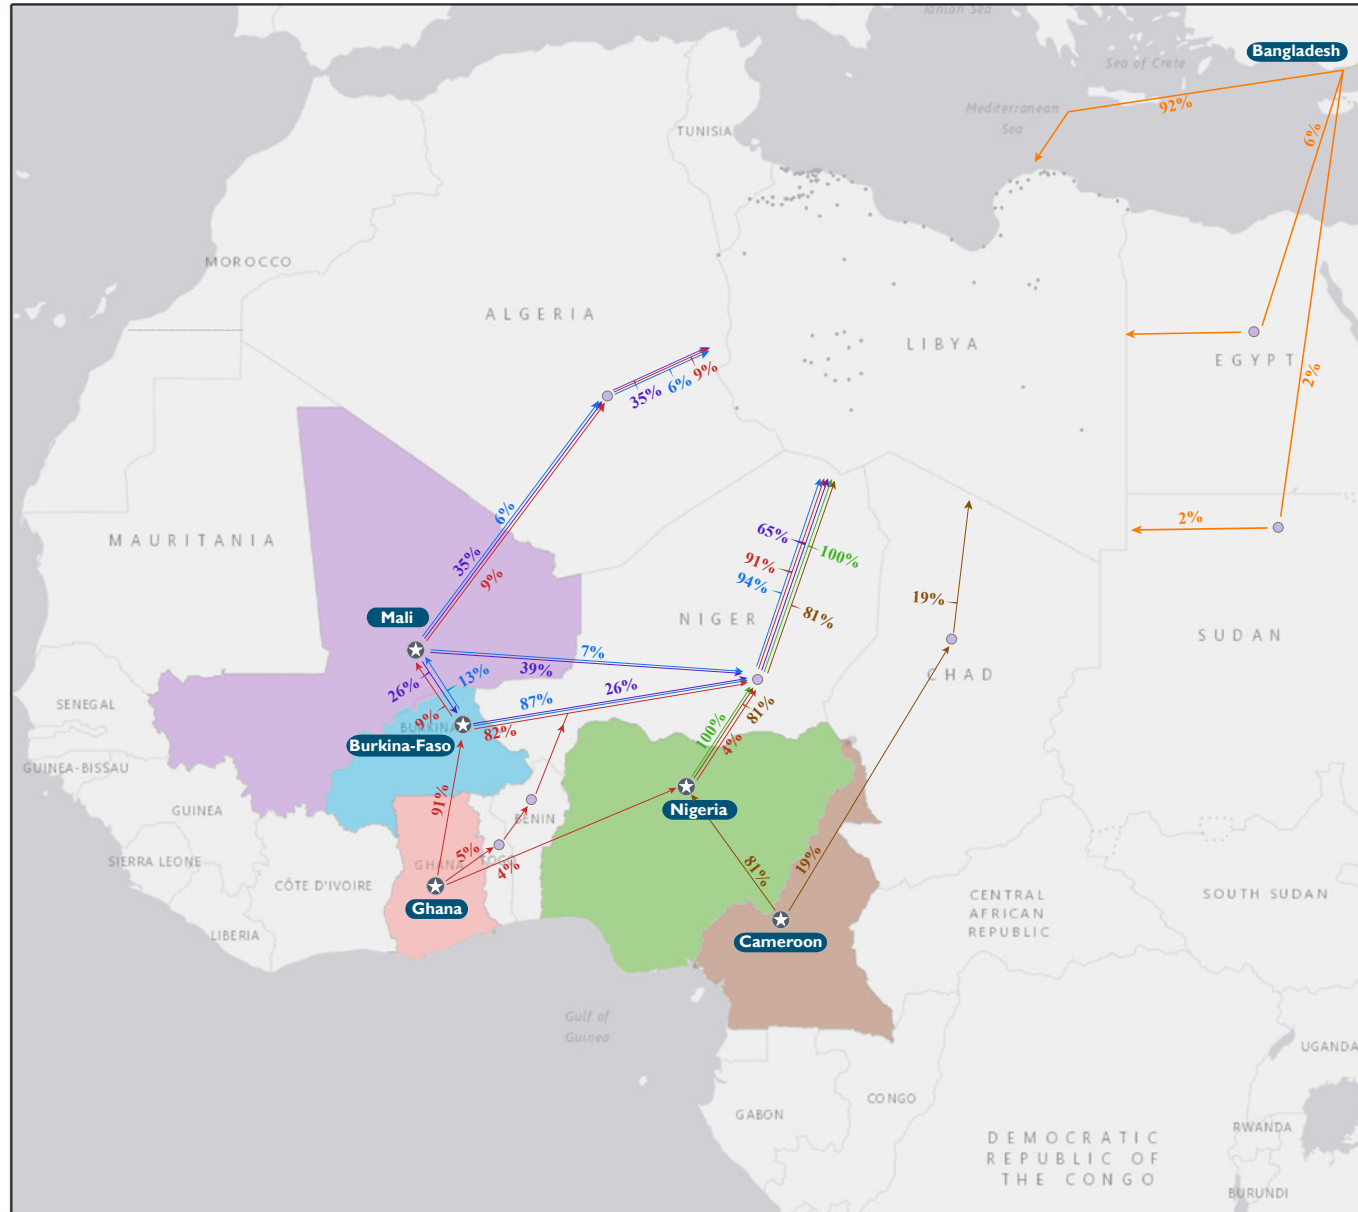

The main route taken by Ghanaian nationals surveyed (82%) was through Burkina-Faso and Niger successively. Another 9% of Ghanaian reported travelling through Burkina-Faso, Mali and Algeria successively before reaching Libya. The remaining 9% indicated other routes.

CAMEROON

81% of Migrants who departed Cameroon reported travelling through Nigeria and Niger to reach Libya with 19% reportedly travelling through Chad prior to reaching Libya.

DEMOGRAPHICS AND SHELTER

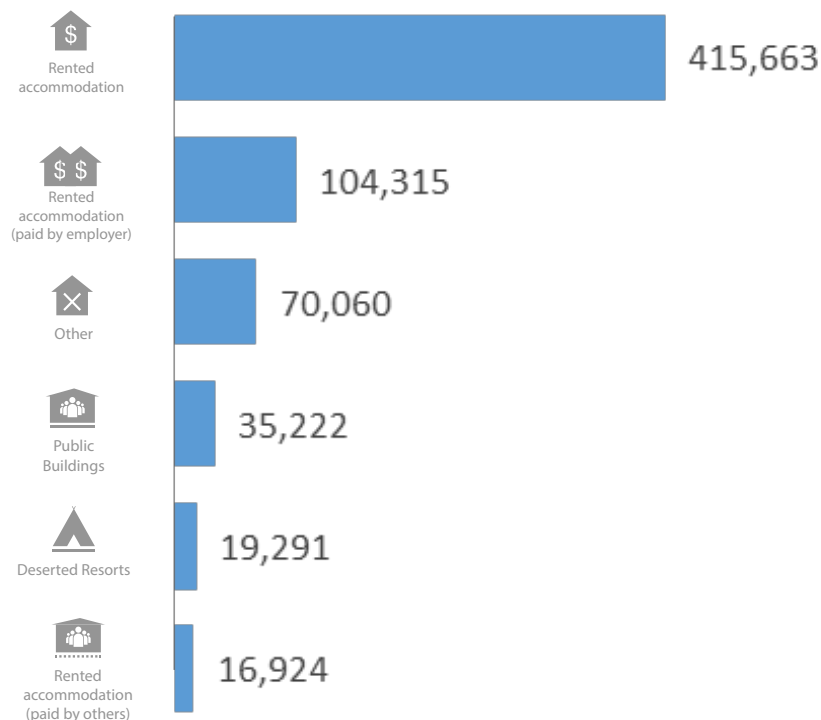

Out of the 690,351 migrants identified 91% were reported as adults and 9% as minors. The majority of adult migrants were reported as male (89%) and the remaining 11% as female. Of the minors, 58% were reported as accompanied and 42% as unaccompanied.

Corrigendum:

In the previous report 56% of minors were accompanied and 44% unaccompanied.

MIGRANT SHELTER TYPE

75% of the migrants identified were living in rented accommodations; 60% are paying for their own accommodation and 15% were living in accommodations rented by their employer.

ASIAN AND MIDDLE EASTERN MIGRANTS

Out of the 690,351 nationals identified, 6% (44,232 individuals) originated from Asian and Middle Eastern countries.

Migrants originating from Bangladesh represented the majority of Asian and Middle Eastern nationalities recorded (24,145). Syrians were the second highest number of recorded migrants originating from Asian and Middle Eastern countries (12,482). Palestinian nationals represented 10% of Libya's Asian and Middle Eastern migrant population with 5% of migrants representing Pakistan. Philippines, India, Iraq, Jordan and Turkey nationals represented the minority; their total proportion did not exceed 2%.

SUB-SAHARAN MIGRANTS

Out of the total number of migrants 94% (645,659 individuals) originate from African countries. 32 African nationalities were identified in Libya during this round. Out of the African nationals identified, 447,086 originated from Sub-Saharan countries.

The majority of Sub-Saharan migrants (69%) were identified in the West. The region of Tripoli hosted 27% of the Sub-Saharan migrants identified in Libya.

20% of the Sub-Saharan migrants were identified in the South, mainly in Murzuk and Sebha. The remaining 11% were identified in the East.

NORTH AFRICAN MIGRANTS

Out of the total number of African migrants identified 31% (198,573 individuals) originate from North African countries. 58% of them were Egyptian, 35% Sudanese, 3% Moroccan and 3% Tunisian nationals. The remaining 1% were identified as Algerian nationals. When disaggregated by mantika, Tripoli had the highest proportion (16%) of North African migrants, followed by Ejdabia (15% of all North African migrants identified in Libya).

MIGRATION FLOWS

DTM

THE UN MIGRATION AGENCY

This chapter presents the statistical findings on both the absolute and estimated number of arrivals and departures across Flow Monitoring Points covered by DTM in 20 regions of Libya in April 2018.

Flow Monitoring Points (FMPs) are specific locations within Libya's municipalities where a high number of migrants are indentified as arriving or departing.

This chapter quantifies the absolute and estimated daily-observed arrivals and departures, by nationality, area of departure and intended country of destination. All data collected at each location is aggregated and reported at regional level in order to provide a statistical analysis of the fluidity of migration in Libya.

The data summarized in the tables is complemented by a regional analysis of Murzuq, Tobruk, Almageb, Alkufra and Aljufra to provide better contextual understanding related to why migrants are transiting through these specific areas and to provide evidence as to why certain routes are more frequently used over others.

REGIONAL STATISTICS OF MIGRATION FLOWS

DTM

THE UN MIGRATION AGENCY

MURZUQ

During the reporting period, the number of arrivals increased due to lack of security patrols on the border as reported by field observers. 2,464 individuals were observed arriving at the FMPs with the majority coming from Niger and Nigeria.

However, the number of departures decreased due to the clashes in Sebha. 1,959 individuals, mostly Chadian and Nigerian, came from Agadez (Niger) and departed towards Sebha. Their final destinations were recorded as Germany and Italy.

TOBRUK

2,012 migrants were observed arriving at flow monitoring locations within Tobruk during the reporting period. Simultaneously, 2,009 migrants were observed departing from the same region.

The majority of the observed arrivals came through Matruh (Egypt). The main nationalities identified for arrivals and departures were Egyptian and Sudanese with Italy and Libya the primary intended destinations.

ALMARGEGB

1,654 individual arrivals and 1,752 observed departures were recorded in FMP locations during the assessment days.

The majority of migrants reported coming from Tripoli or from other locations within the region of Almargeb. Also departures reported mainly travelling to other location within Almargeb or to Tripoli the region.

The main nationalities recorded were Egyptian and Ghanaian with Italy and

ALKUFRA

919 individuals, mainly Sudanese and Chadian, were observed arriving at the assessed locations (FMPs). On the other side, 844 individuals were observed departing to Murzuq and Ejdabia.

The main nationality of departure is Somalian and the planned destination is Italy and Libya.

ALJFARA

During the reporting period, 489 individuals were observed arriving at the region from Tripoli. However, 298 individuals were recorded departing the region towards Tripoli and Azzawya.

Nigerian and Malian were the most predominant nationalities recorded. The planned destination for the majority of migrants was Italy.

MARITIME INCIDENTS

As of the 29th of April 2018, the total number of arrivals to Italy was recorded at 9,467 individuals since the beginning of the year. Compared to the same period from last year the number of arrivals to Italy has decreased (12,943 arrivals recorded in the same period of the previous year). Furthermore, 370 individuals reportedly died attempting to cross through the Central Mediterranean route during the same period.

1,485 migrants were returned by coast guards in April 2018 and 11 bodies were retrieved.

IOM Libya continues to monitor trends and patterns between migrants identified in Libya and those who continue making their journey onward to Europe.

METHODOLOGY

DTM's Migration Information Package is part of IOM Libya's Flow Monitoring operations, dedicated to the delivery of routine information packages on migration. Through consultations with humanitarian actors, Government authorities and Donor stakeholders DTM Libya is revising its methodology to increase its pool of Key Informants (KIs), broaden its assessment tools, revise how migrants are identified, improve data credibility criteria and expand its overall outreach (please see [IOM Libya's Press release](#) dated 20/02/18).

Based on the already implemented methodological updates DTM has managed to expand its information gathering systems towards better capturing the total number of migrants in country.

At field level DTM is working with its enumerators towards strengthening triangulation mechanisms through an increased number of sources at different administrative levels involving: Local Crisis Committee representatives, humanitarian and civil society organisations, representative of local security forces, local community and tribal leaders, baladiya and muhalla representatives, representatives of educational facilities, representatives of health facilities, representative of migrants networks, local religious leaders and migrants community leaders.

Simultaneously, DTM is working with its implementing partners in revising how information is collected and to improve the quality of information. To this end DTM has carried out a data verification process in Misrata, Sebha and Al Kufra.

DTM's data verification process is an initiative towards ensuring that DTM is delivering the highest quality data possible. In a final push towards harmonizing DTM's methodological revisions and an overall programme improvement, a new set of assessment tools will be launched in 2018. The new tools are based on consultations with all partners and stakeholders, particularly with UNICEF. In 2018 DTM expects to double the number of KIs from whom it gathers information, better capture the total number of migrants in country, mainstream protection throughout the programme and create more flexible and dynamic portals from where partners can access data. DTM Libya's overall goal for 2018 is to deliver a stronger and more flexible programme that provides a reliable platform for the accountable use of data.

In 2018 DTM will complete the training of its implementing partners on the 2018 methodology and assessment tools. Upon the launch of the 2018 programme a fully revised and updated methodology will be republished.

METHODOLOGY

CONCEPT

IOM defines a migrant as any person who is moving or has moved across an international border or within a state away from his/her habitual place of residence, regardless of (1) the person's legal status; (2) whether the movement is voluntary or involuntary; (3) what the causes for the movement are; or (4) what the length of the stay is. For DTM programmatic purposes in Libya, a migrant is considered any person present in Libya who does not possess Libyan nationality.

Accordingly, DTM does not differentiate between migrant statuses, length of residence in the country, or migratory intentions. It counts as migrants those who may have come from refugee producing countries, along with long-term residents and labour migrants who engage in a circular migration pattern between Libya and their homes.

For more details, please see DTM Libya's 2017 Methodologies please refer DTM's Flow Monitoring and Mobility Tracking methodologies at: www.globaldtm.info/libya
