

EMERGENCY EVENT TRACKING

Data collection: 19 April 2020

CONFLICT

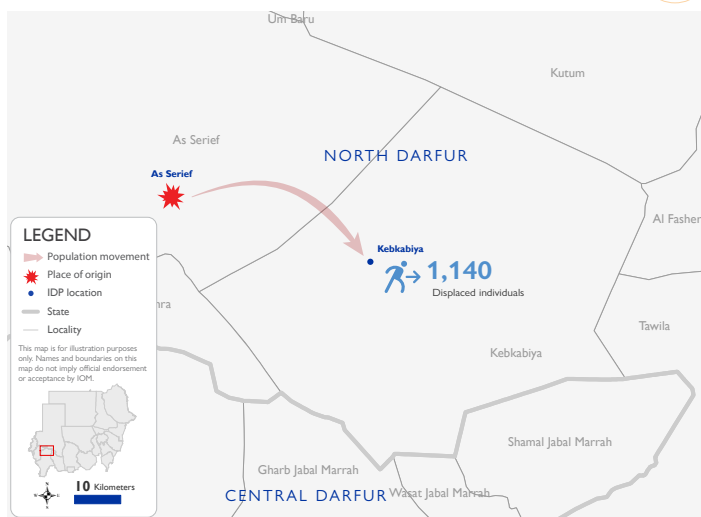

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round One](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by intra-communal conflict in As Serief, North Darfur. Between 31 March and 3 April 2021, violent clashes erupted within the Bani Hassen tribe in As Serief town, causing many households to flee the area towards Kebkabiya and its surrounds. The villages surrounding As Serief have been looted and burnt down. Armed forces have been deployed to contain the situation, which remains tense and unpredictable.

The first update estimates a total number of 1,140 individuals (247 households) displaced across Medan Alkgeel, Hai Alsafa and Hai Alkobri villages (Kebkabiya locality), and seeking shelter with host communities, in rented accommodation, abandoned buildings or critical shelters, as well as gathering in open areas. All individuals are Sudanese nationals. At least 109 individuals of the captured caseload have additional vulnerabilities in need of assistance and support. Reports indicate that all the internally displaced persons (IDPs) have lost personal belongings and livestock. Based on a ranking scale, the three main priority needs identified are food, non-food items and WASH (water, sanitation, and hygiene). Field teams report that the displacement is ongoing, with figures expected to rise.

Demographics

Priority Needs

(Ranking scale)

Vulnerabilities

Return Intention

Data collected through the return intention indicator suggests that all IDPs in Medan Alkgeel, Hai Alsafa and Hai Alkobri villages (100%) intend to return to their locations of origin upon improvement of the security situation.

Shelter Indicator

Approximately 111 IDP households (45%) are sheltering in abandoned buildings or critical shelters dispersed across Medan Alkgeel, Hai Alsafa and Hai Alkobri villages, whilst 84 households (34%) are sheltering in host community accommodation, 37 households (15%) in rented accommodation and 15 households (6%) gathering in open areas of Hai Alkobri village – in critical need of emergency shelter.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.
