

**Aim:** The current outbreak of COVID-19 has affected global mobility in the form of various travel disruptions, restrictions and blockages. To better understand how COVID-19 affects global mobility, IOM is developing a global mobility database by mapping and gathering data from the locations, status and different restrictions of Points of Entry (PoE), globally. This Points of Entry Baseline Assessment provides an overview and analysis on data from various countries, territories and areas (CTAs)

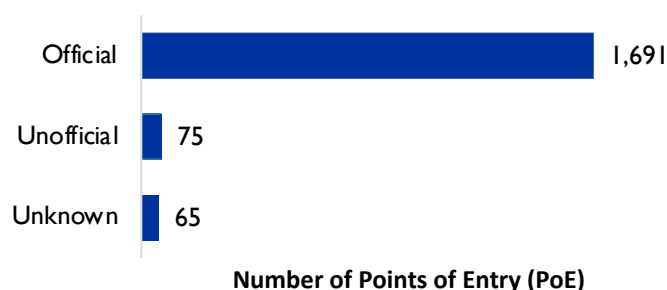

**Overview:** As of 29th March 2020 (17:00 CET), data for the baseline assessment of Points of Entry (PoE) has been collected and processed for **133** countries/areas\*\*.

- The PoE Baseline database contains information on **1,831** points of entry.
- These consist of **381** airports, **132** internal transit points, **1,075** land border points and **243** sea border points.
- Of the **1,831** PoEs assessed, **1,589** (87%) have some form of restriction placed upon them; **889** were being fully closed for entry and exit and **587** partially closed.
- Of the assessed PoE's, **92%** were reported to be official points of entry. **8%** were unofficial or unknown.
- The most common restriction period ranged between **14 days to one month** (49% of all assessed PoEs).
- Of the **487** Points of Entry imposing some form of health restriction / requirements, **41%** are reportedly conducting routine health screenings, and a further **38%** have COVID-19 specific screening activities ongoing.

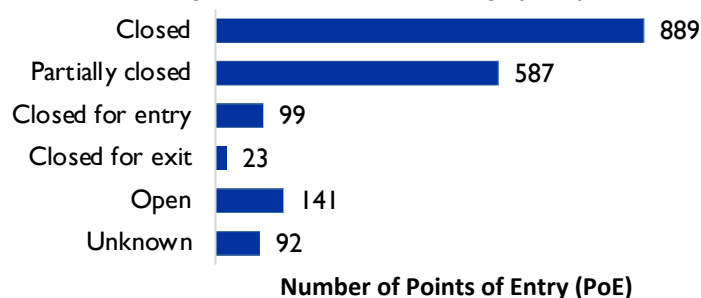

This information is collected through IOM offices and networks and all information presented is from the PoE Baseline database and is subject to change with time. For most up to date updates, visit: <https://migration.iom.int/>

#### Methodology

DTM utilizes in-country expertise of IOM offices around the world to collect relevant information in a systematic and structured approach. Data is collected for following observation points:

- Points of entry and exit (airports, land borders and seaport)
- Transit points (in country locations on crossroads between cities and regions)
- Areas (regions or cities in the country)

(More detailed description and methodology are available at: [Methodology Framework](#))
