

FLASH UPDATE • STORM DANIEL IN NORTHEASTERN LIBYA

29 September 2023

HIGHLIGHTS

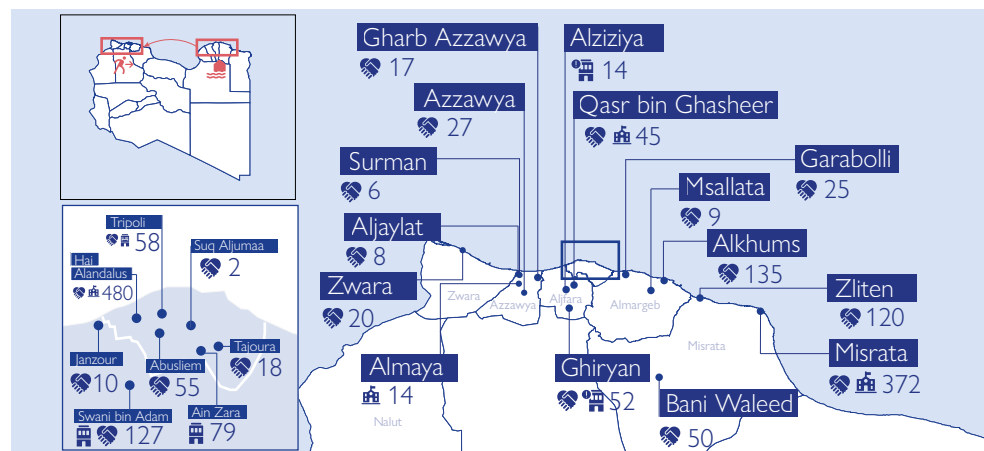

- There are an estimated **42,045 individuals**¹ who remain displaced after storm Daniel made landfall in northeastern Libya on 11 September 2023.
- DTM Libya has continued identifying displaced households from Derna in **western municipalities** (see map 1). A total of four per cent of displaced individuals are in western Libya. The majority of displaced individuals (96%) are located in **eastern Libyan municipalities**, the largest shares of whom are in the municipalities

of Derna (40%), Albayda (12%), Shahat (10%), Benghazi (8%), Tobruk (7%) and Labraq (6%) (see tables 1 and 2).

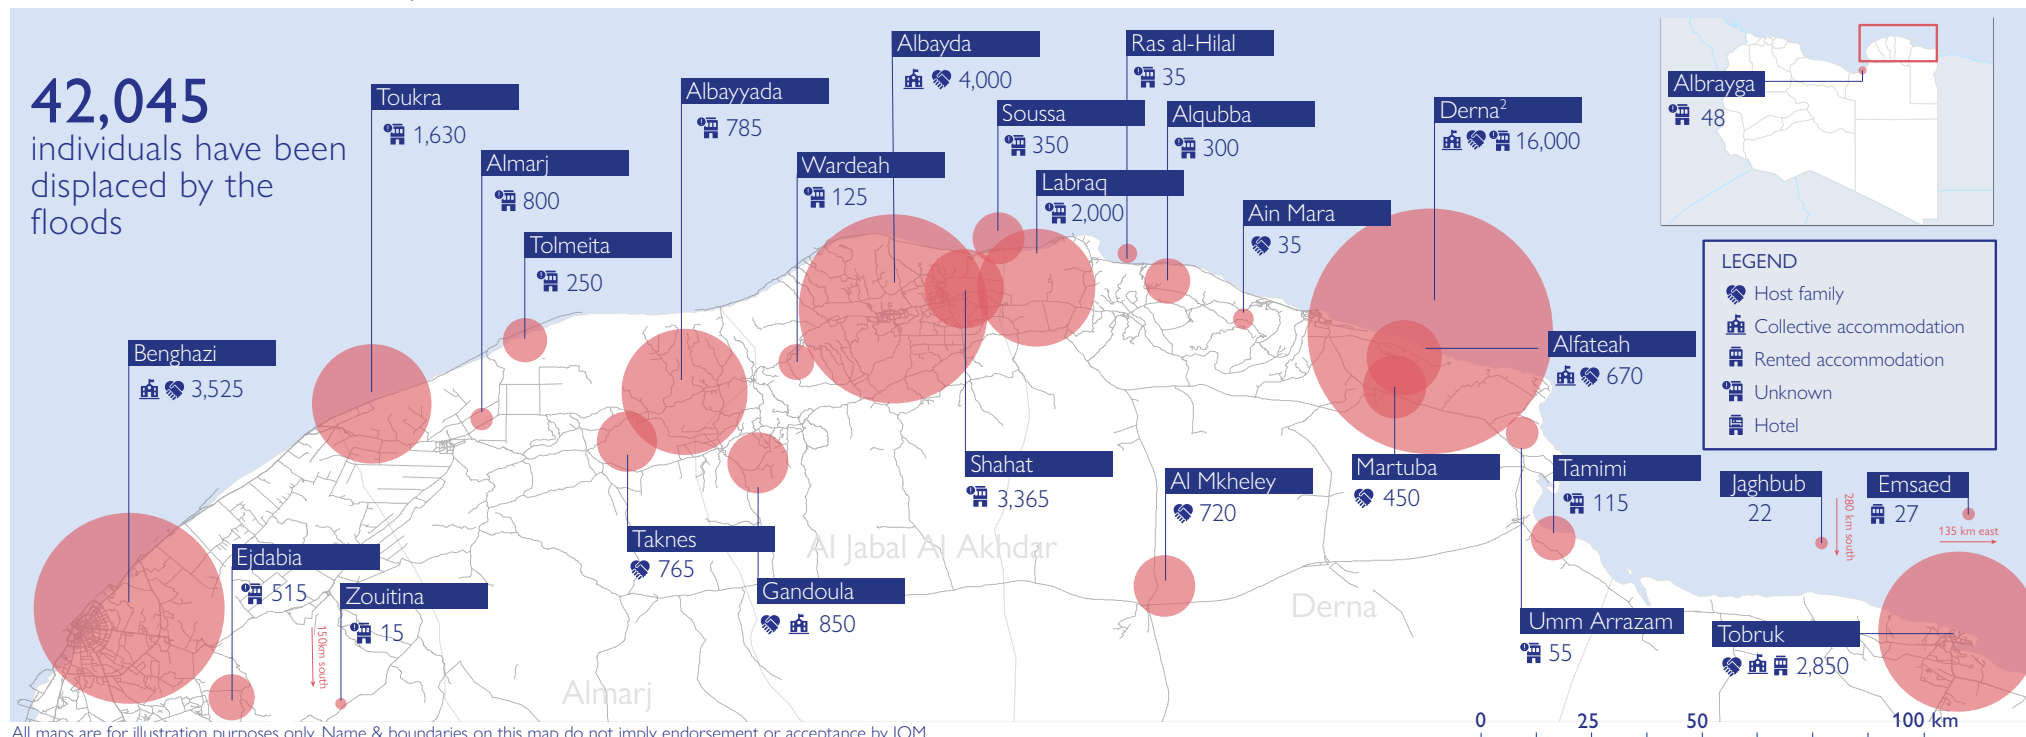

- According to field reports, there are **12 collective sites of accommodation**, such as schools, housing displaced individuals primarily from Derna and Albayda on a temporary basis. There are nine in the municipality of Derna and one in Benghazi. In Albayda, displaced households are accommodated at two hotels.

¹ The variations in numbers of displaced individuals reported is related to the quickly evolving situation and limited access of the field assessment team.
² The number of displaced individuals identified by key informants within Derna is likely to be an underestimation given the dynamic context, and the complex process of registering displaced individuals. The number of displaced individuals for Derna (16,000) does not include those displaced in Alfateah and Ras al-Hilal (two communities (muhallas) which are also part of the municipality of Derna according to the common operational dataset).
