

COVID-19 MOVEMENT RESTRICTIONS

LIBYA MOBILITY RESTRICTION DASHBOARD #1 (08 APRIL 2020)

Reported Covid-19 Cases in Libya

Source: National Center for Disease Control, 07 April 2020

19 Confirmed
0 Recovered
1 Deaths

Mobility Restrictions

In response to the Covid-19 pandemic, Libyan authorities initiated public health measures in March 2020 aimed at curbing the spread of COVID-19. These measures include travel and mobility restrictions due to the closure of airports, points of entry (POE) along land borders and maritime boundaries, as well as domestic movement restrictions.

- Points of entry along land borders are closed for entry and exit of passengers; two land border crossing points, Emsaed and Ras Ajdir remain open for commercial traffic.
- All international airports are closed for entry and exit.
- Local authorities in border cities such as Al Kufra and Al Jaghubub have implemented stricter measures by implementing municipal entry restrictions into their cities.

Restrictions implemented as public health measures against Covid-19 have the potential to result in unintended negative consequences for populations on the move such as migrants, refugees, and internally displaced persons (IDPs) who depend on the ability to move for their safety, livelihoods, and overall wellbeing.

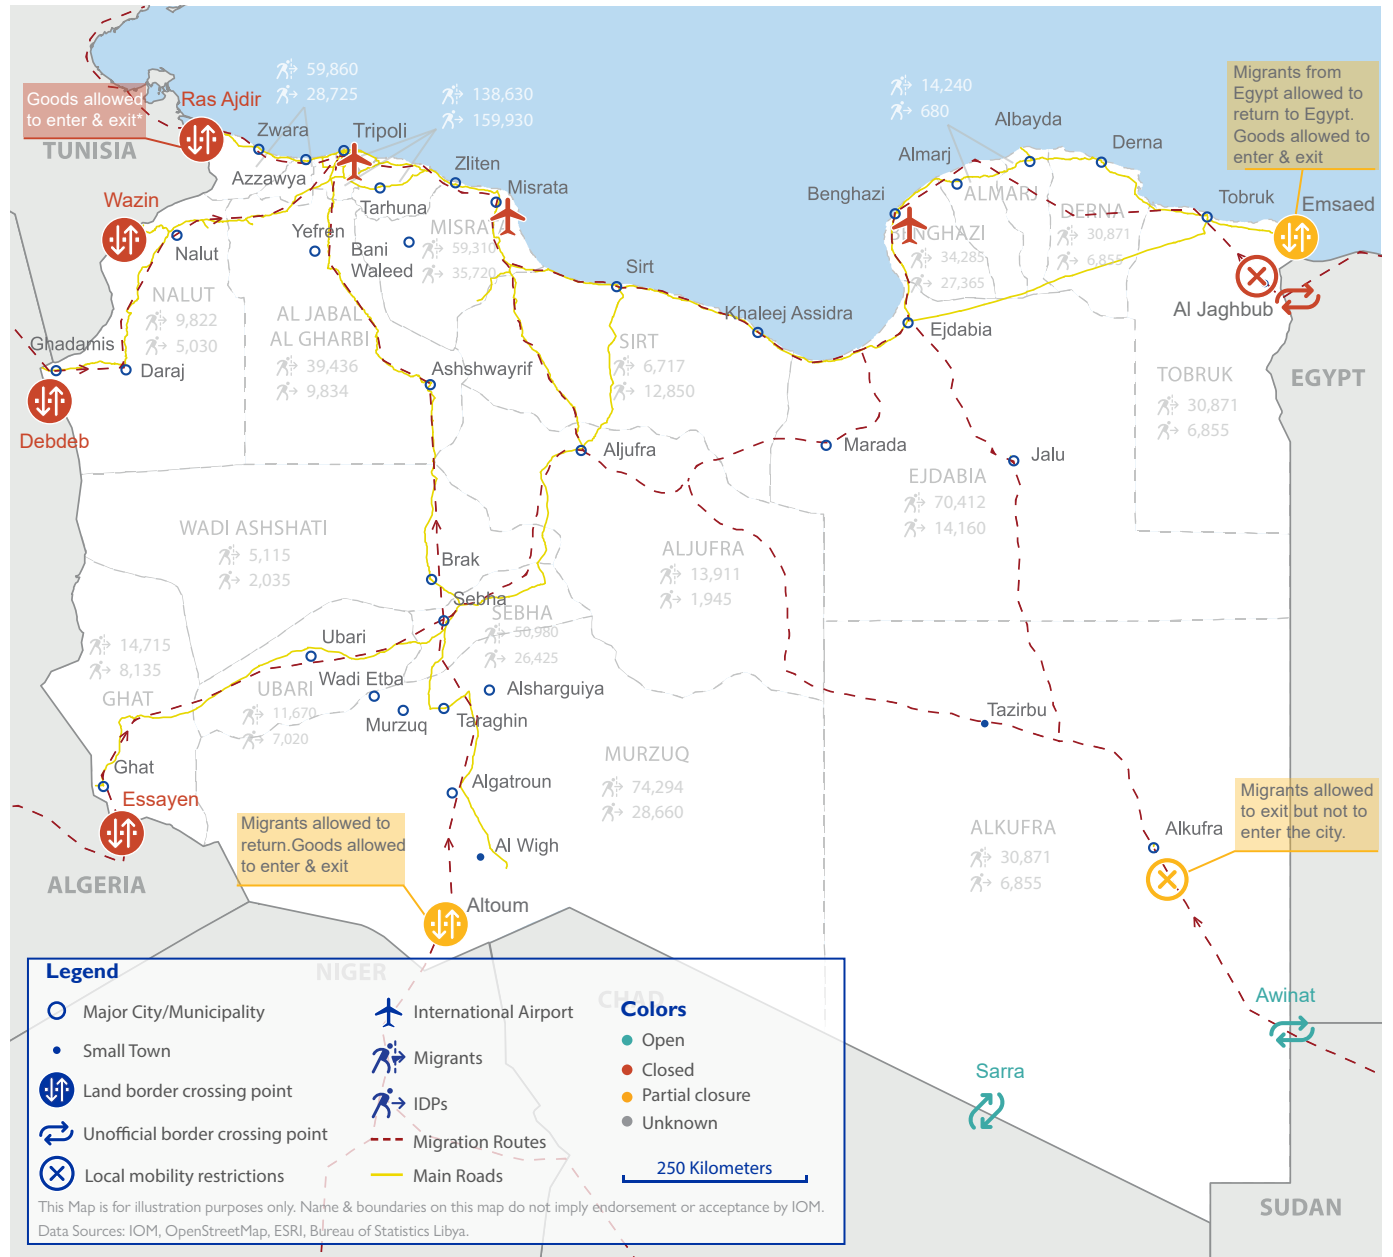

After the first Covid-19 case was confirmed in Libya on 24 March, authorities have started to enforce curfew in the whole country:

Location	Curfew
East	From 3PM to 6AM
West	From 2PM to 7AM
South	From 3PM to 7AM

373,709 IDPs in Libya

654,081 Migrants in Libya
