

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements as well as security and climatic emergencies. Information is collected through phone interviews with key informants and direct observation.

Origins and host locations of displaced persons

Event Summary

Since 08 December 2023, armed clashes have broken out in the municipality of Tabarre, particularly in the neighborhoods of HT Monquette, Truitier, Tapage and Dumornay. These clashes caused the displacement of approximately **317 households (1,240 individuals)**.

These neighborhoods had suffered attacks in July 2023 (see [ETT 20](#)) and later experienced a relative lull inciting some people to return there. These people have therefore just been displaced again.

Nearly half of these people (48%) took refuge in the site of Jean Marie Vincent which was created following the attacks of July 2023. This site had 923 people before the arrival of newly displaced people and now hosts 1,523 people with the latest arrivals.

Host locations of displaced persons

(See page 2 for more details on host locations)

This map is for illustration purposes only. The depiction and use of boundaries, geographic names and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

Methodology

	Assessment conducted in affected areas	
	Assessment conducted through phone interviews with key informants	

Limits

The information presented in this report may not represent all displacements caused by this incident. Indeed, it is possible that some displacements were not detected by key informants. In the case new displacement information caused by this incident is reported, updates can be made accordingly.

Furthermore, it is important to consider that figures are estimates and not data from a counting or registration of displaced households.
