

OVERVIEW

In October 2019, a total of 10,554 movements were observed across Ethiopia's five flow monitoring points (FMPs). This represents a 3% increase in comparison with September 2019 when 10,208 movements were observed. A total of 7,792 movements leaving Ethiopia were observed, of which 4,305 were going to the Kingdom of Saudi Arabia (KSA). 2,762 individuals were entering Ethiopia, of which 1,908 were observed coming from Sudan

For incoming movements, bus/truck was the most often cited means of transportation with 78.7% responses, while 13% travelled by taxis or cars, 5.9% traveled on foot, 1.6% traveled by boat and less than 1% used other means of transport. Similarly, most outgoing movements relied on buses or trucks (72.4%), while 9.8% used taxis or cars and 9.3% took place by train. 6% of the movements took place on foot, and the remaining 2.4% used other means of transport.

The majority of the observed population was male (70%), while 30% was females. 9% of those moving were children, out of which three quarters were boys.

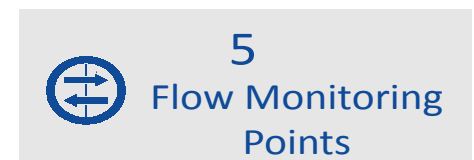

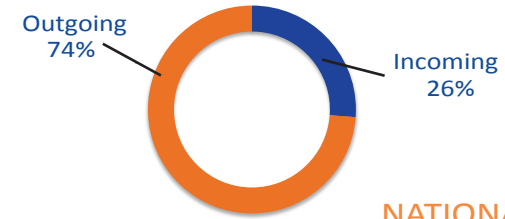

DEMOGRAPHICS

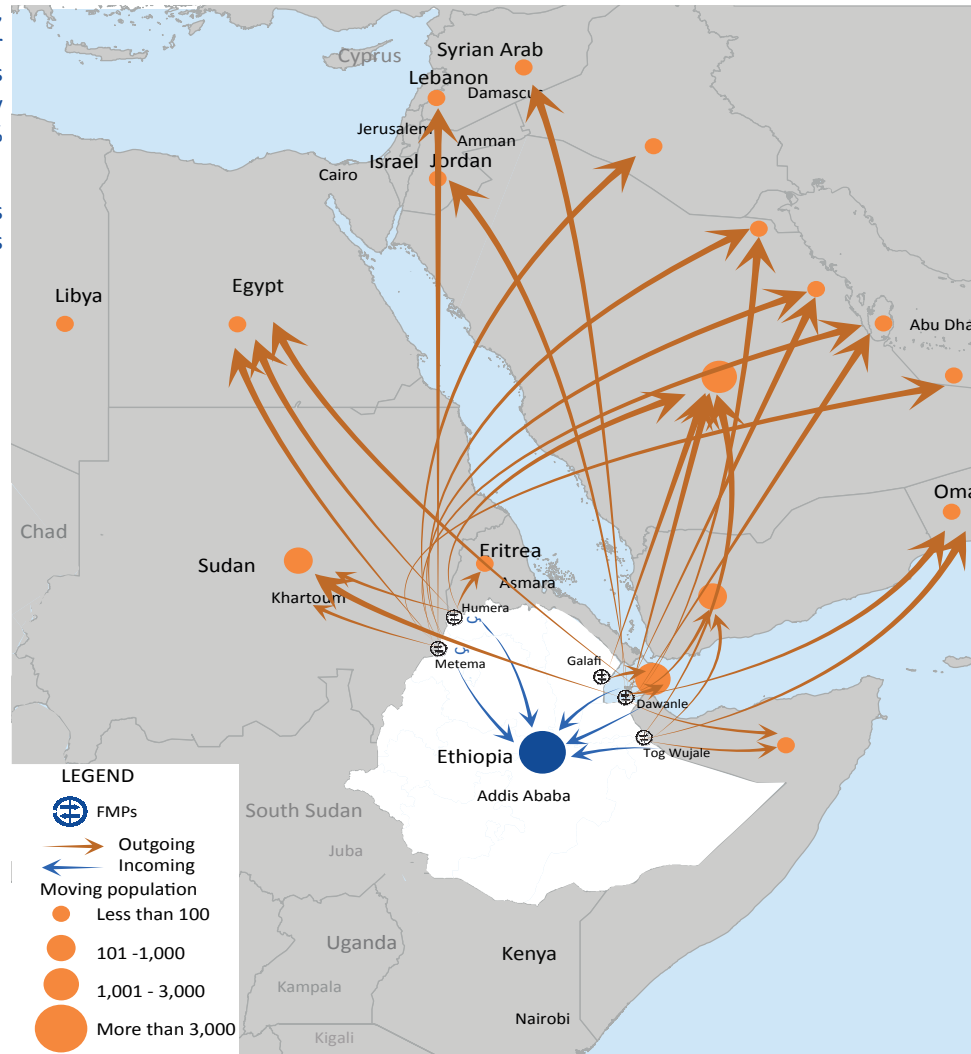

VULNERABILITY PROFILE

	4.1%	Unaccompanied children
	1.8%	Children under 5 years
	1.3%	Pregnant and lactating women
	0.5%	Elderly people

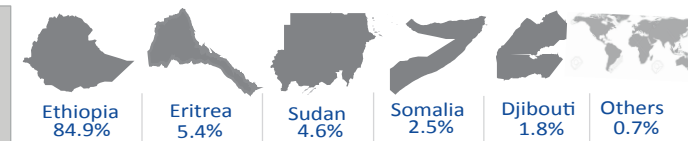

KEY FIGURES

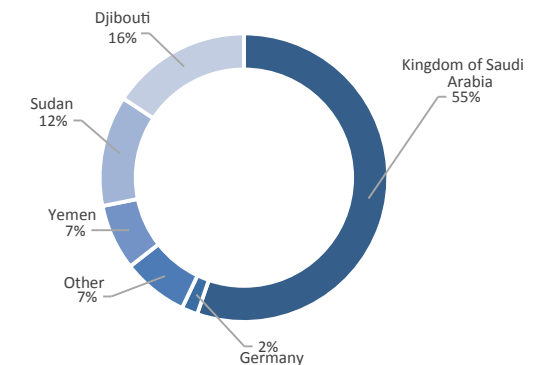

MOVEMENT ILLUSTRATION

NATIONALITIES OF PEOPLE ON THE MOVE

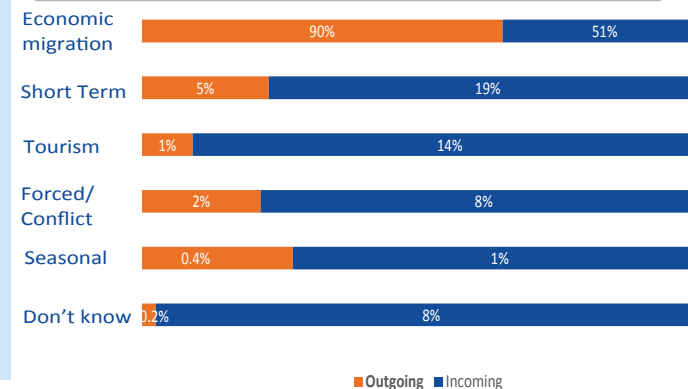

INTENDED DESTINATIONS

*Please note that figures from Yemen and Saudi Arabia should be interpreted jointly, as movement to KSA often passes through Yemen.

Type of Flow

*Flow monitoring dashboard is updated on a monthly basis. The next report will appear in the 2nd week of December, 2019 reflecting movements observed throughout the month of November 2019.
