BURUNDI - TANZANIA BORDER FLOWS*

TYPE OF FLOWS

Type of flows *	Total	Outflow	Inflow
Economic migration (Daily movements)	29%	41%	16%
Seasonal migration	14%	18%	9%
Economic migration (< 6 months)	13%	10%	15%
Return to habitual residence	9%	4%	14%
Family visits	8%	7%	9%
Goods purchasing	6%	4%	7%
Travel to collect aid	5%	5%	5%
Economic migration (> 6 months)	5%	3%	8%
Tourism	5%	4%	5%
Economic migration (Unknown duration of stay)	4%	1%	8%
Health care	3%	2%	3%
Other	1%	1%	1%

*Economic migration: Migratory movements for which the motive is the search of economic opportunities.

Seasonal migration: Migration due to changes in the climate.

Return to habitual residence: Movements of migrants returning home after a voluntary trip.

Family visits: Movements of migrants to visit family or participate in social events and whose duration of stay does not exceed 3 months.

Goods purchasing: Movements of migrants to buy consumer goods.

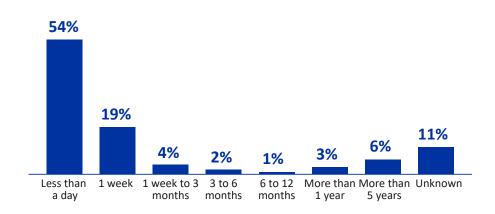

Travel to collect aid: Movements of migrants who do not reside in the camps but go in case of a distribution to receive food and other non-food items.

Tourism: Migration to visit touristic sites.

Health care: Migration for basic or specialized health care.

Other: Movement for other reasons.

INTENDED DURATION OF STAY

METHODOLOGY

Flow Monitoring is a component of the DTM methodology aimed at providing information on population movements at points of transit. Flow Monitoring provides information on trends on key variables at locations of high mobility.

Data collection is carried out at 8 Flow Monitoring Points (FMPs) located at unofficial Points of Entry (POEs) in the provinces of Cankuzo and Muyinga since October 2018 and in the Provinces of Rutana and Ruyigi since November 2018. The movements are observed and recorded 7 days per week (from 6 am to 6 pm) at Flow Monitoring Points and enumerators conduct interviews with migrants to collect information on migration flows. Data in this report covers the period between May 1 and 30, 2019. Short-term movements for market visits are not considered during observations.
