

- 177 122** estimated returnees arrived in Chad
- 240 000** returnees projected to arrive in Chad until April 30
- 122 191** Returnees registered
- 365** third country nationals referred to IOM
- 66%** returnees registered
- 53%** registered returnees are female
- 6 980** registered returnees are children under 18
- 2 313** registered returnees are pregnant women
- 52** returnee locations identified in 3 locations

APERÇU DE LA SITUATION

3 June 2024

- Nearly 750,000 people have crossed into Chad since the onset of the crisis in Sudan. IOM estimates that more than **173 124** among them are Chadian returnees and expects this number to rise to **240 000** by the end of April 2024, due to ongoing conflict in Darfur and the current suspension of the humanitarian corridor between Adré and Darfur.
- IOM, as the lead agency for the returnee response, collaborates with a range of operational partners including the Government of Chad, UNHCR, OCHA, LWF, PUI, UNICEF, MSF, UNFPA, LMI, ICRC, IRC, ACTED, the Chadian Red Cross, HELP-Tchad, ATURAD, Concern Worldwide, COOPI, INTERSOS, and WFP.
- In coordination with CNARR and humanitarian organizations, IOM has registered **122 191 returnees** and identified **365 third-country nationals** (from South Sudan, Niger, Ethiopia, the Central African Republic, Burkina Faso, Sierra Leone, Nigeria, and Uganda) **52 localities** in three provinces.
- Most of the returnees currently live in spontaneous locations near the border and are in urgent need of food, water, sanitation and hygiene, shelter, household items, health, and protection.
- IOM is developing the returnee communities of Tongori, Ouaddaï province, and Degoussa, Sila province which, with over 13,000 and 25,000 individuals respectively, are the two largest returnee sites in eastern Chad. IOM and partners offer shelter, NFI, WASH, MPCA, and Protection/MHPSS assistance in those two sites.
- IOM coordinates with local authorities and diplomatic representations for the voluntary return to their home countries of **third-country nationals (TCNs)** from countries including Ethiopia, South Sudan, Nigeria, Niger, and Cameroon previously living in Sudan and displaced to eastern Chad.
- Moreover, IOM is the lead agency in resiliency programming among returnees and host communities. This implies transitioning from temporary shelters to more durable housing solutions, to support livelihoods opportunities and improve access to basic needs and services. Adjunctly to this, IOM also supports the Humanitarian, Development and Peace Nexus which seeks to strengthen relations between the different communities for longstanding peace.

Assistance Humanitaire et Résilience

IOM continues to develop returnee sites of Deguessa in Sila province, and Tongori in Ouaddaï province. IOM has allocated 3,788 transitional shelters to some of the most vulnerable households in each site. In addition to shelter support, IOM is improving access to safe water and sanitation for over 80,000 for returnees by creating new boreholes and latrines and distributing essential WASH kits, has enabled over 40,000 individuals to meet their most essential needs through multipurpose cash assistance, and has supported the ability of over 47,000 individuals to carry out essential household tasks through non-food items distributions. In total, 27 returnee sites have benefitted from IOM emergency assistance. Moreover, IOM supports the development of interventions that promote resiliency and durable solutions which benefit returnees and host communities alike. IOM distributed kits to returnees of Tongori so that they may build their houses with bricks, which thereby improves their living standard, broadening their skillsets as a new means to their livelihood. Finally, IOM launched community stabilization activities in two of the largest returnee and host community locations in Ouaddaï and Sila as new essential infrastructure has been erected.

Protection & Social cohesion

In Tongori and Deguessa sites, IOM is implementing community-based protection to strengthen the resilience of displaced communities. In both sites IOM is developing a referral system for protection cases, including persons with disabilities, in close coordination with protection actors. Protection and MHPSS activities in these sites include support site committees, group and individual counselling sessions, recreational activities, sensitization sessions on PSEA for residents and humanitarian actors, and identification and provision of direct protection assistance for vulnerable households and individuals on a case-by-case basis. Particular emphasis is placed on peaceful coexistence between returnees and host communities via consistent community engagement and the formation of joint committees comprising host community members and returnees. Across both sites, nearly 40,000 individuals are benefitting from Protection and MHPSS services from IOM and partners.

Identification et Enregistrement des Retournés

IOM's Displacement Tracking Matrix (DTM) is a leading tool to monitor and analyse displacement flows. IOM DTM teams, including locally recruited and trained enumerators, are deployed across Sila and Ouaddaï provinces on an ongoing basis to identify and register vulnerable returnee households, including newly arrived households as well as households in remote locations not previously identified. IOM continues to identify vulnerable returnees living either in host communities or in displacement sites in close collaboration with local authorities and communities in order to provide lifesaving assistance to those in need. IOM's identification and registration system is indeed the starting point for returnees to access assistance from IOM or to be referred to other humanitarian actors. IOM is working closely with CNARR and local authorities in updating returnee figures in Deguessa through biometric registration, thus enabling quantitative and qualitative data to be soon available at the household and individual level.

Coordination Humanitaire

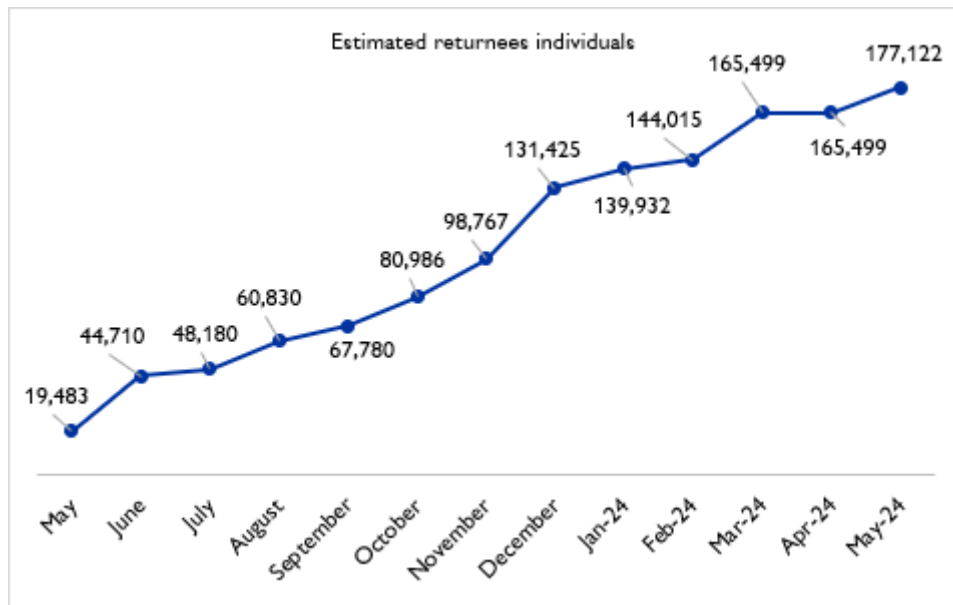

As the lead agency for the humanitarian response to returnees, IOM continues to coordinate with national, international, and government partners (CNARR, local authorities) to deliver vital services to vulnerable returnee households in the east of Chad. IOM continues to support and coordinate the delivery of WASH, food, protection, health, shelter, NFI, and education assistance in returnee sites by national and international partners including UNICEF, UNFPA, WFP, Concern Worldwide, LWF, LMI, Help Tchad, INTERSOS, COOPI, and the Chadian Red Cross. IOM is also managing the first Humanitarian Hub in Farchana, to accommodate UN agencies and NGOs operating in Chad and Sudan.
