WEEKLY FLOW MONITORING SNAPSHOT

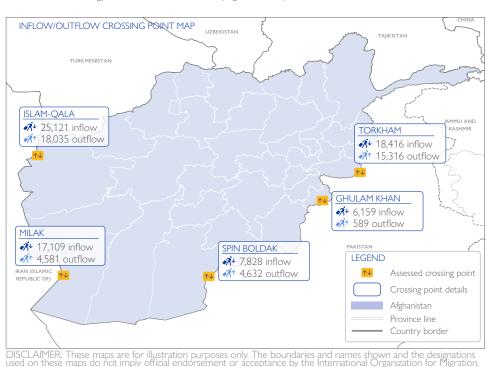

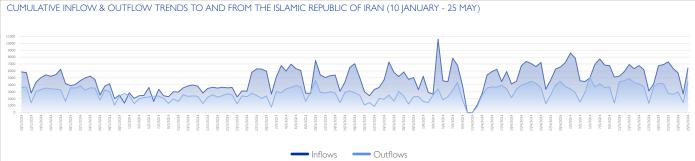

19 - 25 MAY 2024, DATA UPDATED AS OF 21:00 ON 25 MAY

OVERVIEW

IOM Afghanistan's DTM Flow Monitoring activity, initiated at the beginning of 2024, seeks to quantify and better understand the mobility dynamics at Afghanistan's borders. On 10 January 2024, DTM began deploying field teams at four border crossing points with the Islamic Republic of Iran (IRN) and Pakistan (PAK), expanding to another border crossing point Ghulam Khan as of 11 February (see map below for the locations of all five crossing points), to conduct two interlinked exercises. The first is a headcount of all individuals entering or leaving Afghanistan (including returnees), also called Flow Monitoring Counting (FMC), to gauge flow volume. The second is a survey of randomly selected Afghan national individuals or groups entering or leaving Afghanistan, also called the Flow Monitoring Survey (FMS), to understand the profiles, motivations, and vulnerabilities of the target population. The inflow from Pakistan increased over the monitoring period. This may be related to media reports and speculation about a potential resumption of the repatriation process, targeting primarily Afghan Citizen Card (ACC) holders, starting from April 15, 2024. However, according to the Pakistani Ministry of Foreign Affairs as of April 26, the repatriation process has not yet begun. Additionally, the Government of Pakistan recently extended the validity of 1.3 million PoR cards for Afghan refugees in Pakistan up to June 30, with their repatriation planned for after the repatriation of ACC holders (Voice of America News). This snapshot provides key findings combining various IOM data sources, including DTM Afghanistan's FMC and FMS activities, DTM Pakistan's Flow Monitoring of Afghan returnees, and IOM Afghanistan's Cross-Border Post-Arrival Humanitarian Assistance (CB-PAHA) program, for the period 19 to 25 May 2024. For more information about methodology, see the section in the last page of this report titled "IOM INFLOW DATA."

^{*} More information on the methodology of collecting data on different subsets of inflow groups can be found on the last page of this report in the section titled "IOM Documented returnees include Proof of Registration (PoR) holders. Source: IOM DTM Pakistan and UNHCR Pakistan

^{***} This data is collected by IOM CB-PAHA. Individuals receive post-arrival assistance from IOM and support from Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit https://afghanistan.iom.int/situation-reports. Consortium is led by IOM. For more information and access to the Consor***** DTM Afghanistan does not collect data on subsets of outflow groups.

→ INFLOWS

FMC TOTAL INDIVIDUALS: 74,633

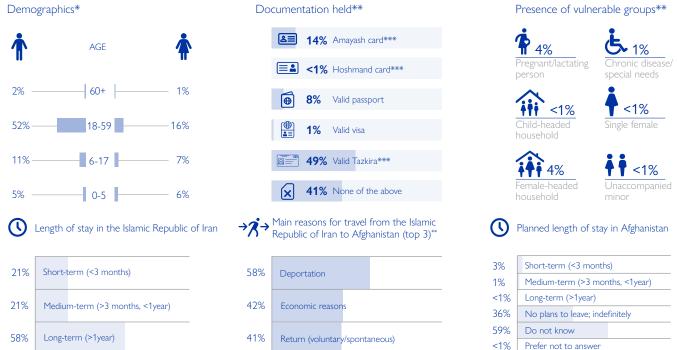

FMS TOTAL RESPONDENTS: 4,801

The following analysis compiles responses from 4,801 total Afghan nationals (2,383 at the border with the Islamic Republic of Iran, 2,418 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups entering Afghanistan.

Entering Afghanistan with the intention to transit to a third country was very uncommon; the intended destination of almost all respondents arriving from the Islamic Republic of Iran or Pakistan was Afghanistan. While movements from Iran were mainly characterized by deportees and those traveling for economic reasons, movements from Pakistan involved voluntary returns and family-related visits. In comparison to former weeks, during which respondents coming from Pakistan were more likely to cite feeling unsafe as a reason for movement than those coming from the Islamic Republic of Iran, in this reporting period, the opposite was true. Thirty per cent of respondents from the Islamic Republic of Iran reported feeling unsafe, while 16 per cent from Pakistan reported the same.

*** Amayesh, and Hoshmand cards are issued by the Islamic Republic of Iran. Proof of Residence (PoR), Partnerslip, VRF Asylum, and Afghan Citizen Card (ACC) are cards issdued in Pakistan. and Tazkira is the Afghan national ID

◆ COUTFLOWS

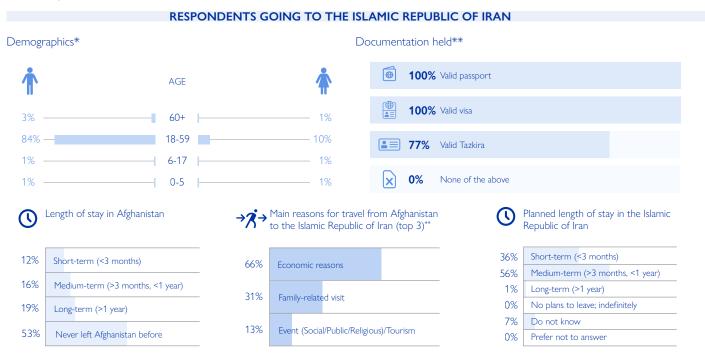

FMC TOTAL INDIVIDUALS: 43,153

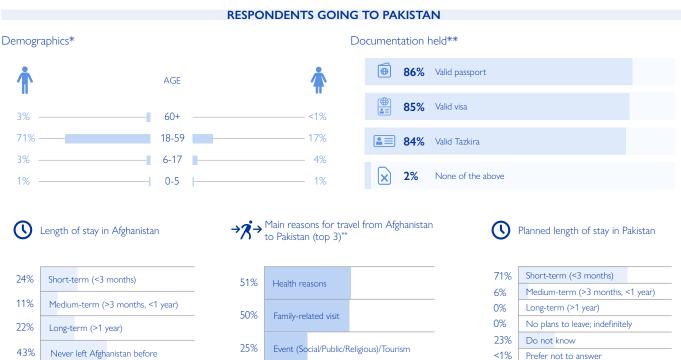

FMS TOTAL RESPONDENTS: 1,822

The following analysis compiles responses from 1,822 total Afghan nationals (501 at the border with the Islamic Republic of Iran, 1,321 at the border with Pakistan) interviewed by DTM Afghanistan during its FMS activity among individuals and groups leaving Afghanistan.

Virtually all respondents leaving Afghanistan possessed travel documents. This stands in contrast with the majority of those arriving to Afghanistan, who were not carrying travel documents. Many of those going abroad reported that this was their first time leaving Afghanistan. Most respondents going to the Islamic Republic of Iran intended to stay there for a year or less, while most going to Pakistan planned shorter trips; the majority intended to stay less than three months. These intentions reflect respondents' reasons for migration. While family-related visits were a common reason to leave Afghanistan for both those going to Pakistan and those going to the Islamic Republic of Iran, accessing healthcare, which can often constitute a shorter visit, was more common among the former, whereas economic motivations, likely related to employment, were more common among the latter.

** Multiple answers were possible. As a result, percentages may exceed 100%

IOM INFLOW DATA

DTM Afghanistan, DTM Pakistan, and IOM Afghanistan's Cross Border Post-Arrival Humanitarian Assistance (CB-PAHA) program use different methodologies to collect data on various demographic subsets of individuals entering Afghanistan (inflows). The following flow chart illustrates the relationships between the subsets and how IOM coordinates its various activities and methodologies to develop more robust and comprehensive databases on movements into Afghanistan.

DATA ON ASSISTED AFGHAN RETURNEES

IOM Afghanistan's CB-PAHA program collects information on undocumented Afghan returnees who pass through reception centers near the border and receive assistance from IOM and Border Consortium partners. The Border Consortium is led by IOM. For more information and access to the Consortium dashboard, visit https://afghanistan.iom.int/situation-reports.

CUMULATIVE TRENDS: NUMBER OF RETURNEES ASSISTED BY IOM (10 JANUARY - 25 MAY)
