

ETT Report : No. 331 | 5 — 11 June 2023

NUMBER OF NEW ARRIVALS

NEW ARRIVALS SCREENING BY NUTRITION PARTNERS

The DTM Emergency Tracking Tool (ETT) is deployed to track and collect information on large and sudden population movements, provide frequent updates on the scale of displacement and quantify the affected population when needed. As a sub-component of the Mobility Tracking methodology in Nigeria, ETT utilizes direct observations and a broad network of key informants to capture the best estimates of the affected population per location, enabling targeted humanitarian response planning.

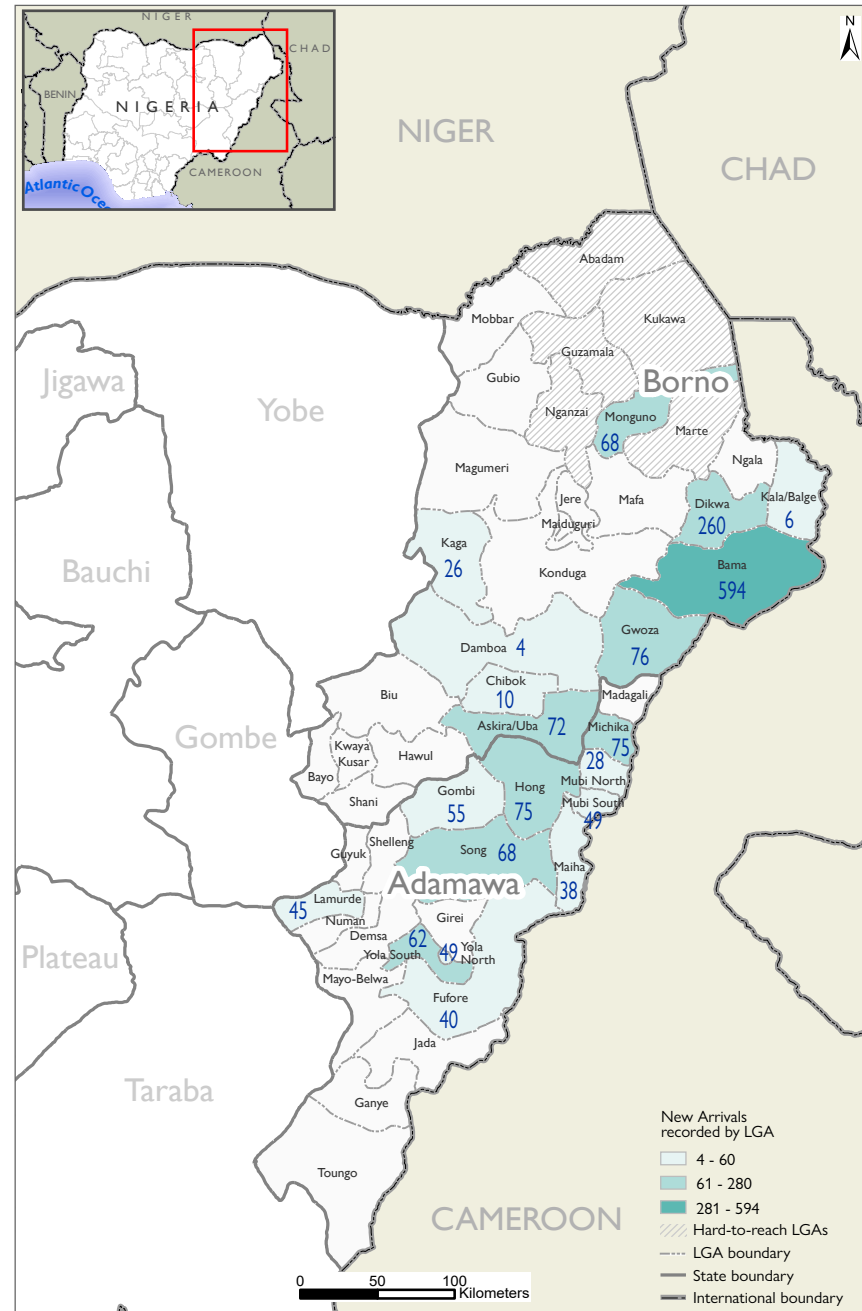

Between 5 and 11 June 2023, a total of 1,700 new arrivals were recorded at locations in Adamawa and Borno states. The new arrivals were recorded at locations in Askira/Uba, Bama, Chibok, Damboa, Dikwa, Gwoza, Kaga, Kala/Balge* and Monguno Local Government Areas (LGAs) of the most conflict-affected Borno State and in Fufore, Gombi, Hong, Lamurde, Maiha, Michika, Mubi North, Mubi South, Song, Yola North and Yola South LGAs of Adamawa State.

ETT assessments identified the following movement triggers: improved security (581 individuals or 34%), poor living conditions (407 individuals or 24%), seasonal farming (292 individuals or 17%), military operations (205 individuals or 12%), access to humanitarian support (161 individuals or 9%), family re-unification (43 individuals or 3%), fear of attacks (10 individuals or 1%) and camp closure (1 individual or <1%).

MALNUTRITION SCREENING SUMMARY OF THE NEW ARRIVALS (CHILDREN 6 — 59 MONTHS)

Between 5 and 11 June 2023, an exhaustive nutrition screening using Mid-Upper Arm Circumference (MUAC) and oedema for acute malnutrition was conducted by sector partners for 366 children of 6-59 months. Of the 366 children screened, the MUAC reading indicated that 15 children were recorded in the red category, 42 children in the yellow category and 309 children in the green category. No case of oedema was reported in the six LGAs assessed.

Among the 366 children screened, 133 children arrived from neighbouring countries (5 in Monguno LGA and 128 in Mobbar LGA); of all the 133 children measured; 124 were in green, eight were in yellow and one was in the red. All children found with acute malnutrition have been admitted in the treatment programme.

LGA	Breakdown of MUAC reading by category						Total
	Green (≥12.5cm)		Yellow (11.5cm - 12.5cm)		Red (<11.5cm)		
	Inaccessible	Accessible	Inaccessible	Accessible	Inaccessible	Accessible
