IOM's Emergency Tracking Tool (ETT) is deployed in Nigeria's northeastern states. Only Local Government Areas (LGAs) in which the IDP population changed since the latest DTM round of assessments are represented in this report. The data has been collected by DTM staff deployed at the locations listed and cross-checked with the partners present on the ground.

NEW ARRIVAL MALNUTRITION SCREENING SUMMARY (CHILDREN 6-59 MONTHS)

An exhaustive nutrition screening using monitoring of symptoms of acute malnutrition mid upper arm circumference (MUAC) and Oedema was conducted by Nutrition Sector partners for 147 children of 6-59 months. Of the 147 children screened, the MUAC reading recorded 1 child (from an inaccessible area) in the Red category, 12 in the Yellow category and 134 measured in the Green category. No cases of Oedema were reported in the 4 LGAs that we received reports from.

The results also include 68 children from neighbouring Cameroon and Republic of Niger (26 children moved to Bama, 4 to Gwoza, 4 to Mobbar and 34 moved to Ngala); of all the 68 children measured, one child was in the red category, 60 in the green category and 7 measured in the yellow category. All children found with acute malnutrition have been admitted for treatment.

Please note, the data presented are not surveillance results and should be interpreted with caution.
