IOM's Emergency Tracking Tool (ETT) is deployed in Nigeria's northeastern states. Only Local Government Areas (LGAs) in which the IDP population changed since the latest DTM round of assessments are represented in this report. The data has been collected by DTM staff deployed at the locations listed and cross-checked with the partners present on the ground.

NEW ARRIVAL MALNUTRITION SCREENING SUMMARY (CHILDREN 6-59 MONTHS)

An exhaustive nutrition screening using mid-upper arm circumference (MUAC) and Oedema for acute malnutrition was conducted by Sector partners for 199 children of 6-59 months. Of the 199 children screened, the MUAC reading was 4 children (2 from In-accessible and 2 from accessible areas) in the Red category, 12 were in the Yellow category and 183 were measured in the Green category. No case of Oedema was reported in the 5 LGAs that we received reports from.

The results also include 47 children from neighboring countries (13 in Bama, 9 in Gwoza, 11 in Mobbar and 14 in Ngala). Of all the 47 children measured, 1 was recorded in the Red category, 41 in the Green category and the remaining 5 in the Yellow category. All children found with acute malnutrition have been admitted for treatment. Please note, the data presented are not surveillance results and should be interpreted with caution.
